

SC-401 Reliable Test Objectives - Realistic Administering Information Security in Microsoft 365 100% Pass Quiz

P.S. Free 2025 Microsoft SC-401 dumps are available on Google Drive shared by TestPassed: https://drive.google.com/open?id=1PSeGEnZVVzNbZ0uR-zhd9d2cRCOkI_hg

As the actual Administering Information Security in Microsoft 365 (SC-401) certification exam costs a high penny, TestPassed provides a free demo before your purchase so you can be well aware of the Microsoft SC-401 exam questions. The Administering Information Security in Microsoft 365 (SC-401) exam dumps are instantly downloadable right after your purchase. In the same way, TestPassed provides a money-back guarantee if in any case, you are unable to pass the Microsoft SC-401 Certification but the terms and conditions are mentioned on the guarantee page.

Microsoft SC-401 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">• Implement Data Loss Prevention and Retention: This section evaluates Data Protection Officers on designing and managing data loss prevention (DLP) policies and retention strategies. It includes setting policies for data security, configuring Endpoint DLP, and managing retention labels and policies. Candidates must understand adaptive scopes, policy precedence, and data recovery within Microsoft 365.
Topic 2	<ul style="list-style-type: none">• Protect Data Used by AI Services: This section evaluates AI Governance Specialists on securing data in AI-driven environments. It includes implementing controls for Microsoft Purview, configuring Data Security Posture Management (DSPM) for AI, and monitoring AI-related security risks to ensure compliance and protection.
Topic 3	<ul style="list-style-type: none">• Manage Risks, Alerts, and Activities: This section assesses Security Operations Analysts on insider risk management, monitoring alerts, and investigating security activities. It covers configuring risk policies, handling forensic evidence, and responding to alerts using Microsoft Purview and Defender tools. Candidates must also analyze audit logs and manage security workflows.
Topic 4	<ul style="list-style-type: none">• Implement Information Protection: This section measures the skills of Information Security Analysts in classifying and protecting data. It covers identifying and managing sensitive information, creating and applying sensitivity labels, and implementing protection for Windows, file shares, and Exchange. Candidates must also configure document fingerprinting, trainable classifiers, and encryption strategies using Microsoft Purview.

SC-401 certification can help you prove your strength and increase social competitiveness. Although it is not an easy thing for somebody to pass the exam, but our SC-401 exam torrent can help aggressive people to achieve their goals. This is the reason why

we need to recognize the importance of getting the test SC-401 Certification. More qualified certification for our future employment has the effect to be reckoned with, only to have enough qualification certifications to prove their ability, can we win over rivals in the social competition.

Microsoft Administering Information Security in Microsoft 365 Sample Questions (Q155-Q160):

NEW QUESTION # 155

You have a Microsoft 365 E5 subscription. The subscription contains a user named User1 and the sensitivity labels shown in the following table.

Name	Authenticated users: View content(VIEW)	Authenticated users: Copy and extract content(EXTRACT)	Authenticated users: Export content(EXPORT)
Label1	Granted	Not granted	Not granted
Label2	Granted	Granted	Not granted
Label3	Granted	Not granted	Granted

You publish the labels to User1.

The subscription contains the files shown in the following table.

Name	Label
File1	Label1
File2	Label2
File3	Label3

Which files can Microsoft 365 Copilot summarize for User1?

- A. File1, File2. and File3
- B. File2 and File3 only
- C. File3 only
- D. File2only

Answer: D

Explanation:

Microsoft 365 Copilot can only process (summarize, answer questions about) a labeled file when the user has the Copy and extract content (EXTRACT) usage right granted by the applied sensitivity label.

From the table of labels:

- * Label1 # VIEW only (no EXTRACT) # Copilot cannot summarize.
- * Label2 # VIEW and EXTRACT granted # Copilot can summarize.
- * Label3 # VIEW and EXPORT (no EXTRACT) # Copilot cannot summarize.

Since File2 is labeled Label2, it's the only file for which User1 has the required EXTRACT permission, so it's the only file Copilot can summarize.

References:

Microsoft Learn - Sensitivity labels and Copilot for Microsoft 365: Copilot requires the Copy and extract content (EXTRACT) permission to process labeled content.<https://learn.microsoft.com/microsoft-365/compliance/sensitivity-labels-copilot>

Microsoft Learn - Usage rights for encryption with sensitivity labels (VIEW, EXTRACT, EXPORT definitions)<https://learn.microsoft.com/microsoft-365/compliance/encryption-sensitivity-labels#usage-rights-and-permissions>

NEW QUESTION # 156

You have a Microsoft 365 E5 subscription that uses Microsoft Purview.

You are creating an exact data match (EDM) classifier named EDM1.

For EDM1, you upload a schema file that contains the fields shown in the following table.

Column name	Match mode
PP	EU Passport Number
Name	All Full Names
DateOfBirth	Single-token
AccountNumber	Multi-token

What is the maximum number of primary elements that EDM1 can have?

- A. 0
- B. 1
- C. 2
- D. 3

Answer: A

Explanation:

In Microsoft Purview Exact Data Match (EDM) classifiers, a primary element is a unique, identifying field used for data matching. EDM allows up to two primary elements per schema.

From the provided table, the Match mode indicates how data is analyzed:

PP (EU Passport Number) # Likely a primary element because it's unique.

Name (All Full Names) # Typically not a primary element as names are common.

DateOfBirth (Single-token) # Usually a secondary element, not unique.

AccountNumber (Multi-token) # Can be a primary element, as it's a unique identifier.

Since EDM supports a maximum of two primary elements, the correct answer is 2.

NEW QUESTION # 157

You have a Microsoft 365 E5 tenant that contains a trainable classifier named Classifier1.

You need to increase the accuracy of Classifier1. The solution must use the principle of least privilege.

Which feature should you use and to which role group should you be added? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

Explanation:

Answer Area

Microsoft

Feature: Microsoft Information Governance

Role group: Compliance Data Administrator

NEW QUESTION # 158

You have a Microsoft 365 E5 subscription that contains a Microsoft SharePoint Online site named Site1 and the data loss prevention (DLP) policies shown in the following table.

Name	Priority	Rule
DLP1	0	Rule1
DLP2	1	Rule2
DLP3	2	Rule3
DLP4	3	Rule4

The DLP rules are configured as shown in the following table.

Rule	User notifications	Policy tip	If there's a match for this rule, stop processing additional DLP policies and rules
Rule1	On	Tip 1	Enabled
Rule2	On	Tip 2	Disabled
Rule3	On	Tip 3	Enabled
Rule4	On	Tip 4	Disabled

All the policies are assigned to Site1.

You need to ensure that if a user uploads a document to Site1 that matches all the rules, the user will be shown the Tip 2 policy tip. What should you do?

- A. Change the priority of DLP2 to 3.
- B. Change the priority of DLP2 to 0.
- C. Prevent additional processing of the policies if there is a match for Rule2
- D. Enable additional processing of the policies if there is a match for Rule1.

Answer: C

NEW QUESTION # 159

You have a Microsoft 365 alert named Alert2 as shown in the following exhibit.

View alerts

Microsoft

Export Filter

	Severity	Alert name	Status	Category	Activity count	Last occurrence...
<input type="checkbox"/>	Medium	Alert2	Resolved	Data loss prevention	1	6 days ago

You need to manage the status of Alert2. To which status can you change Alert2?

- A. Investigating only
- B. Investigating, Active, or Dismissed
- C. Dismissed only
- D. Active or Investigating only
- E. The status cannot be changed.

Answer: B

Explanation:

Step 1 - Scenario

The alert in the exhibit is named Alert2.

Current status = Resolved.

The task is to identify which statuses you can change the alert to.

Step 2 - Microsoft 365 Alert Lifecycle

In Microsoft 365 compliance and security alerts, an alert can move between multiple statuses depending on investigation and remediation. The available statuses are:

Active - The alert is new and not yet acted upon.

Investigating - The alert is under review.

Resolved - The alert has been addressed.

Dismissed - The alert is ignored or deemed not relevant.

Step 3 - Status changes from "Resolved"

If an alert is in the Resolved state, administrators can reopen or reclassify it. According to Microsoft documentation, from Resolved, you can change it to:

Active

Investigating

Dismissed

This allows flexibility in continuing investigations if needed or dismissing false positives.

Step 4 - Microsoft Reference

From Microsoft Docs: "You can change the status of an alert between Active, Investigating, Resolved, and Dismissed to reflect its current stage in the triage process." Reference: Manage alerts in the Microsoft 365 security and compliance center

NEW QUESTION # 160

.....

How far is the word from the deed? If you are a man of strong will, victory is at hand. Since you want to pass Microsoft SC-401 Exam, you must get the Microsoft SC-401 certification. TestPassed provide you with the latest certification training information and the most accurate tests answers. Real questions and answers can make your dream come true.
