1Z0-1163-1 Exam Brain Dumps, 1Z0-1163-1 Exam Duration

ActualTestsQuiz can not only save you valuable time, but also make you feel at ease to participate in the exam and pass it successfully. ActualTestsQuiz has good reliability and a high reputation in the IT professionals. You can free download the part of Oracle 1Z0-1163-1 exam questions and answers ActualTestsQuiz provide as an attempt to determine the reliability of our products. I believe you will be very satisfied of our products. I have confidence in our ActualTestsQuiz products that soon ActualTestsQuiz's exam questions and answers about Oracle 1Z0-1163-1 will be your choice and you will pass Oracle certification 1Z0-1163-1 exam successfully. It is wise to choose our ActualTestsQuiz and ActualTestsQuiz will prove to be the most satisfied product you want.

Oracle Fusion Cloud Applications SCM Foundations Associate - Rel 1

Sample Questions (Q17-Q22):

NEW QUESTION # 17

What is the primary purpose of the Supplier Collaboration feature in Oracle Fusion Cloud Procurement?

- A. It allows suppliers to view and respond to purchase orders in real time.
- B. It restricts suppliers from accessing invoice details.
- C. It eliminates the need for supplier performance reviews.
- D. It automates the creation of supplier contracts.

Answer: A

Explanation:

The Supplier Collaboration feature (D) in Oracle Fusion Cloud Procurement, often via the Supplier Portal, allows suppliers to view and respond to purchase orders (POs) in real time, fostering efficient communication. Suppliers can access PO details (e.g., 500 units due next week), confirm acceptance, or propose adjustments instantly, reducing delays. Option A is incorrect-performance reviews remain necessary, supported by collaboration data. Option B is false-contract creation is a separate process, not automated here. Option C is wrong-suppliers can view invoices and POs, not be restricted. For example, a supplier might use this feature to confirm a PO and flag a shipment delay, enabling proactive buyer adjustments. This real-time interaction strengthens partnerships, improves visibility, and accelerates procurement cycles.

NEW QUESTION # 18

Which key metric measures the effectiveness of the Demand to Management OMBP in Oracle Fusion Cloud SCM?

- A. Forecast Accuracy, evaluates the precision of demand predictions against actual market demand.
- B. Supplier Lead Time, which measures supplier response efficiency.
- C. Inventory Turnover, which tracks the speed of inventory movement.

Answer: A

Explanation:

For the Demand to Management OMBP, Forecast Accuracy is the primary metric, as it evaluates how precisely demand predictions match actual market demand, a foundational step in effective supply chain planning. Calculated as a percentage (e.g., actual demand of 800 units versus a forecast of 850 yields 94% accuracy), it directly reflects the OMBP's ability to drive downstream processes like procurement and production. Option B (Supplier Lead Time) measures supplier performance, which affects supply execution but not demand forecasting accuracy. Option C (Inventory Turnover) tracks inventory movement efficiency, an outcome influenced by forecast accuracy, not a direct measure of the OMBP itself. Accurate forecasts prevent overproduction or shortages-for example, overestimating demand by 20% could lead to \$50,000 in excess inventory costs, underscoring the metric's importance.

NEW QUESTION # 19

What is the function of Cost Rollup in Oracle Fusion Cloud SCM?

- A. It ensures material costs remain unchanged over time.
- B. It tracks only direct labor expenses, excluding materials.
- C. It calculates the total cost of a product by aggregating material, labor, and overhead expenses.

Answer: C

Explanation:

Cost Rollup in Oracle Fusion Cloud SCM aggregates all cost components-material, labor, and overhead-to calculate the total cost of a product. This process rolls up costs from raw materials through production stages, providing a comprehensive view for pricing and profitability analysis. For example, producing a widget might involve \$5 in materials, \$3 in labor, and \$2 in overhead; Cost Rollup totals this to \$10 per unit. Option B is incorrect because it excludes materials and overhead, which are integral to the process. Option C is false-Cost Rollup reflects current costs, not fixed values, adapting to fluctuations like material price changes. This function supports accurate financial reporting, cost control, and strategic decision-making by revealing true production costs.

NEW QUESTION # 20

What is a key feature of the Supply Chain Orchestration process in Oracle Fusion Cloud SCM?

- A. It automates the execution of supply chain tasks across different applications, ensuring end-to-end process integration.
- B. It only manages warehouse operations without linking to procurement or manufacturing.
- C. It provides a manual approach to tracking supply chain transactions.

Answer: A

Explanation:

The Supply Chain Orchestration (SCO) process in Oracle Fusion Cloud SCM is a pivotal feature that automates the execution of supply chain tasks across multiple applications, including procurement, manufacturing, and inventory management. It ensures seamless end-to-end process integration by coordinating activities like order fulfillment, material transfers, and production scheduling. Option A is incorrect because SCO extends beyond warehouse operations to integrate with procurement and manufacturing. Option C is also inaccurate as SCO eliminates manual tracking by leveraging automation, improving efficiency and visibility across the supply chain. This capability reduces delays and enhances coordination, aligning with Oracle's goal of a connected supply chain ecosystem.

NEW QUESTION # 21

What is the main purpose of the Supply Chain Collaboration feature in Oracle Fusion Cloud SCM?

- A. It eliminates the need for supplier contracts.
- B. It automates internal financial reporting without supplier interaction.
- C. It enables real-time communication between suppliers and buyers for improved supply chain visibility.

Answer: C

Explanation:

The Supply Chain Collaboration feature in Oracle Fusion Cloud SCM facilitates real-time communication between suppliers and buyers through tools like the Supplier Portal, improving visibility into supply chain activities such as order status and inventory levels. Option A is incorrect as it involves supplier interaction, not just internal reporting. Option B is false—contracts remain essential. This collaboration enhances coordination and responsiveness across the supply chain.

NEW QUESTION # 22

.....

One more thing to give you an idea about the top features of Oracle Fusion Cloud Applications SCM Foundations Associate - Rel 1 (1Z0-1163-1) exam questions before purchasing, the ActualTestsQuiz are offering free ActualTestsQuiz 1Z0-1163-1 Exam Questions demo download facility. This facility is being offered in all three ActualTestsQuiz 1Z0-1163-1 exam practice question formats.
