

EPIC EDI101 VCE Dumps & Testking IT echter Test von EDI101

Epic EDI101 Bridges Interfaces (2023/2024) Rated A

Does every HL7 message have to be encoded with the characters 1A-&? No, the encoding characters can be any printable character.

Imagine that your message begins with MSH1A&1. How would you encode the string "Th result is positive & has a value of 2.7 x 10A3."? The result is positive \T has a value of 2.7 x 10S3.

Why is the NTE segment special? Context, its meaning depends on the segment it follows

What is the difference between receiving an empty field || and the delete sequence? An empty field is ignored by the interface, whereas the delete character will delete information from the database, assuming the field in question supports the delete character.

Aside from HL7 Version 2, name two other standards supported in Bridges? X12, FHIR, NCPDP, DICOM, and Direct.

Die echten und originalen Prüfungsfragen und Antworten zu EDI101 (CEE: Bridges Interfaces Application Essentials Exam (2026 Version)) bei ExamFragen wurden verfasst von unseren EPIC-Experten mit den Informationen von EDI101 (CEE: Bridges Interfaces Application Essentials Exam (2026 Version)) aus dem Testcenter wie PROMETRIC oder VUE.

EPIC EDI101 Zertifizierungsprüfung sowie Cisco, IBM, HP Prüfungen sind jetzt sehr populär. Wenn Sie die EPIC EDI101 Zertifizierung bekommen wollen, realisieren die EPIC EDI101 Dumps von ExamFragen Ihren Wunsch. Nach dem Erfolg der EPIC EDI101 Zertifizierung können Sie auch andere IT-Zertifizierungsprüfungen ablegen. Es gibt keine Probleme für alle EPIC Prüfungen, wenn Sie Prüfungsfragen und Antworten von besitzen.

CEE: Bridges Interfaces Application Essentials Exam (2026 Version) cexamkiller Praxis Dumps & EDI101 Test Training Überprüfungen

ExamFragen zusammengestellt EPIC ExamFragen EDI101 mit Original-Prüfungsfragen und präzise Antworten, wie sie in der eigentlichen Prüfung erscheinen. Eine der Tatsachen Sicherstellung einer hohen Qualität der CEE: Bridges Interfaces Application Essentials Exam (2026 Version)-Prüfung ist die ständig und regelmäßig zu aktualisieren. ExamFragen ernannt nur die besten und kompetentesten Autoren für ihre Produkte und die Prüfung ExamFragen EDI101 zum Zeitpunkt des Kaufs ist absoluter Erfolg.

EPIC CEE: Bridges Interfaces Application Essentials Exam (2026 Version) EDI101 Prüfungsfragen mit Lösungen (Q28-Q33):

28. Frage

A new error started logging to your interface and your team decides that this error should be worked on an existing workqueue. You properly update the workqueue rule to include the new error. Which of the following will your workqueue contain moving forward if you take no other actions? (SELECT ALL THAT APPLY)

- A. All errors previously added to the workqueue
- B. No occurrences of the new error
- C. All occurrences of the new error, past and future
- D. Future occurrences of the new error, and none of the previous occurrences

Antwort: A,D

Begründung:

Workqueue rules in Bridges are generally not retroactive by default. Once you update a rule, only future occurrences of the error will be caught by the new logic (Option A). Any errors that were already in the workqueue from previous rules will remain there (Option C). To get past occurrences of the new error into the workqueue, you would need to run the Maintenance utility described in Question 26.

29. Frage

When applying a filter on a related record in the message companion, you notice that a message for a particular patient is not showing up in your results. Which of the following could be a reason for this behavior?

- A. The patient is not linked to the message due to a failure error in message processing.
- B. You must specify "contains" instead of "equals" in your message search criteria.
- C. The message companion only works for outgoing messages.
- D. The message was retriggered from another message.

Antwort: A

Begründung:

The Message Companion relies on a successful link between a message and a specific record (like a Patient or Encounter). If a message encounters a failure error during processing (e.g., a critical identification error), Bridges may be unable to definitively link that message to the patient record in Chronicles. Because the link is missing, the message will not appear in tools like the Message Companion that filter specifically by that patient's ID.

30. Frage

All Triggers in Interface System Defaults can only be configured to trigger messages to a single interface.

- A. False
- B. True

Antwort: A

Begründung:

Epic's trigger logic is highly flexible. A single event in Chronicles (such as a patient admission) can be configured within the System Defaults or specialized trigger tables to send data to multiple interfaces simultaneously. This is common when an admission needs to notify a Lab system, a Pharmacy system, and a Dietary system all at once.

31. Frage

Which of the following refers to specifically the 2nd component in the 5th field of PID?

- A. PID-5
