HPE6-A88 certifications are thought to be the best way to get good jobs in the high-demanding market. There is a large range of HPE6-A88 certifications that can help you improve your professional worth and make your dreams come true. Our HPE6-A88 Certification Practice materials provide you with a wonderful opportunity to get your dream certification with confidence and ensure your success by your first attempt.

## HPE Aruba Networking ClearPass Exam Sample Questions (Q18-Q23):

### NEW QUESTION # 18

An IT administrator is configuring ClearPass to authenticate users in a large organization. They set the Base DN to the OU containing user accounts but noticed that computer accounts are not authenticated. What could be the reason for this issue?

- A. The Base DN is too narrow, excluding the OU with computer accounts.
- B. The password for the service account has expired.
- C. The ClearPass account does not have write access to the directory.

**Answer: A**

Explanation:

If the Base DN is set only to the OU containing user accounts, ClearPass will not search other OUs - such as those containing computer accounts - during authentication. Expanding the Base DN to a higher-level directory path that includes both user and computer OUs ensures all relevant objects are accessible for authentication.

### NEW QUESTION # 19

An IT professional is configuring the OnGuard agentless solution for a company's Windows clients. They need to ensure that the necessary prerequisites are met. Which configuration is required on the Policy Manager server?

- A. The Policy Manager server should be running both Agentless OnGuard and the Persistent Agent.
- B. The Policy Manager server should be joined to a Domain.
- C. The Policy Manager server should not support SMB v2 on Windows endpoints.

**Answer: B**

Explanation:

Unlike agent-based solutions where the client initiates contact, Agentless OnGuard requires ClearPass to "reach out" to the Windows endpoint using WMI and SMB. For ClearPass to have the necessary permissions to perform these remote administrative tasks on domain-joined machines, the ClearPass Policy Manager server must itself be joined to the Active Directory domain. This allows the server to use domain administrator or service account credentials to authenticate against the target endpoints.

### NEW QUESTION # 20

A network administrator is troubleshooting an issue where endpoints are not receiving updated enforcement decisions after a second authentication. What is the most likely configuration change needed?

- A. Increase the frequency of the posture checks.
- B. Disable the "Use Cached Results" on enforcement tab.
- C. Disable endpoint re-authentication.

**Answer: B**

### NEW QUESTION # 21

An IT technician is tasked with ensuring that the Network Access Device's (NAD) trust chain is properly configured on ClearPass. They select RadSec for the network device and observe that the PSK is automatically set to 'radsec'. What critical step should the technician take next to ensure secure communication?

- A. Verify that the NAD's trust chain is trusted on ClearPass.
- B. Manually override the PSK field with a custom value.
- C. Reboot the network device to apply the RadSec configuration.

**Answer: A**

Explanation:

RadSec (RADIUS over TLS) replaces the traditional MD5-based Pre-Shared Key (PSK) with a secure TLS tunnel. While the UI might show a placeholder "radsec" PSK, the actual security relies on Mutual Authentication via certificates. For the TLS handshake to succeed, ClearPass must trust the Certificate Authority (CA) that signed the NAD's certificate, and vice versa. Therefore, verifying that the NAD's trust chain is uploaded to the ClearPass Trust List is the most critical step for a successful connection.

#### **NEW QUESTION # 22**

When configuring a new custom Operator Profile in ClearPass, an administrator needs to ensure that the system properly assigns this profile to users based on their roles. What critical step must be taken to meet this need?

- **A. Edit the built-in Guest Operator Login policy to include the new custom profile.**
- B. Include the operator account's role evaluation in the enforcement policy to select the new custom Operator Profile.
- C. Modify the Local User Repository to directly assign the custom profile to each user.

**Answer: A**

Explanation:

Custom Operator Profiles (which define what a Guest administrator can see and do) are mapped to users during their login to the ClearPass Guest/Workflows interface. For a new profile to be active, the administrator must navigate to the Guest Operator Login policy and add a rule that assigns that specific profile based on the user's ClearPass Role. Without this mapping in the login policy, the system will fall back to a default profile or deny access.

#### **NEW QUESTION # 23**

.....

With the development of technology, our HPE6-A88 training engine will be updated regularly. Actually, we never stop researching the new functions of the study materials. Normally, we will release our new version of the HPE6-A88 exam simulation on our website once it passed the tests. Many details will be perfected in the new version of our HPE6-A88 Study Materials not only on the content, but also on the displays. And we have been in this career for over ten years, our HPE6-A88 learning guide is perfect.

**HPE6-A88 Valid Learning Materials:** <https://www.exam4tests.com/HPE6-A88-valid-braindumps.html>

These formats are Exam4Tests HPE6-A88 PDF dumps files, desktop practice test software, and web-based practice test software, Exam4Tests services include supplying easy to use HPE Aruba Certified HPE6-A88 practice exam questions for your self-assessment that will surely aid in the preparation for your HP HPE6-A88 exam, HP HPE6-A88 Valid Exam Sample If the clients use our PDF version they can read the PDF form conveniently and take notes.
