Answer: A,B,D

NEW QUESTION # 58

Which SU01 user types are NOT enabled for interaction? Note: There are 2 correct answers to this question.

- A. Dialog
- B. System
- C. Service
- D. Communications Data

Answer: B,C

NEW QUESTION # 59

What are some of the rules for SAP-developed roles in SAP S/4HANA Cloud Public Edition? Note: There are

3 correct answers to this question.

- A. Role maintenance reads applications from a catalog.
- B. Authorization defaults define role authorizations.
- C. Manual role authorizations are supported in custom catalogs.
- D. Role maintenance reads applications from role menus.
- E. Catalogs are assigned to role menus.

Answer: A,B,E

Explanation:

SAP-developed roles in SAP S/4HANA Cloud Public Edition follow specific rules to ensure standardized and secure access management. Role maintenance reads applications from a catalog, meaning that roles are built by incorporating apps and tiles from predefined business catalogs, which group related functionalities.

Authorization defaults define role authorizations, as SAP provides default authorization values for applications within these catalogs, ensuring consistent and secure permission assignments. Additionally, catalogs are assigned to role menus, allowing roles to include entire sets of applications and their associated authorizations, streamlining role configuration. Manual role authorizations in custom catalogs (option C) are not supported for SAP-developed roles, as these rely on predefined configurations. Role maintenance does not read applications from role menus (option B), as menus are an output of the catalog assignment process.

These rules ensure that SAP-developed roles are efficient, secure, and aligned with business processes, providing a robust framework for access control in SAP S/4HANA Cloud Public Edition.
