

# Microsoft AZ-120 Exam Dumps - Secret Hacks To Crack AZ-120 Exam

BONUS!!! Download part of ITexamReview AZ-120 dumps for free: <https://drive.google.com/open?id=1ZwdjIUyO8cC4pb9WKL-OfhVionBMeYCF>

To pass the Microsoft AZ-120 exam on the first try, candidates need Planning and Administering Microsoft Azure for SAP Workloads updated practice material. Preparing with real AZ-120 exam questions is one of the finest strategies for cracking the exam in one go. Students who study with AZ-120 Real Questions are more prepared for the exam, increasing their chances of succeeding. The AZ-120 exam preparation calls for a strong preparation and precise Microsoft AZ-120 practice material.

The Planning and Administering Microsoft Azure for SAP Workloads (AZ-120) exam dumps is released in three different formats. The formats are AZ-120 PDF dumps format, web-based practice exam, and desktop practice test software. The AZ-120 dumps PDF is a printable format, meaning the user can print the real Microsoft Certification Exams questions and carry them anywhere, anytime. It is also a portable format, meaning the Planning and Administering Microsoft Azure for SAP Workloads (AZ-120) dumps PDF can be accessed on smartphones, tablets, and laptops.

## Microsoft - AZ-120 - High Pass-Rate Valid Dumps Planning and Administering Microsoft Azure for SAP Workloads Questions

Our AZ-120 practice braindumps have striking achievements up to now with passing rate up to 98-100 percent. Because we clearly understand your exam hinge on the quality of our AZ-120 exam prep. So we understand your worries. Some immoral companies' may cash in on you at this moment by making use of your worries. On the contrary, we admire your willpower and willing to offer the most sincere help. To have our AZ-120 study engine, this decision of you may bring stinking achievements in the future.

## Microsoft Planning and Administering Microsoft Azure for SAP Workloads Sample Questions (Q27-Q32):

### NEW QUESTION # 27

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

**Answer:**

Explanation:

Explanation

Box 1: Yes

By moving much of Azure's software-defined networking stack off the CPUs and into FPGA-based SmartNICs, compute cycles are reclaimed by end user applications, putting less load on the VM, decreasing jitter and inconsistency in latency.

Box 2: Yes

Box 3: No

Accelerated Networking (AN) is generally available (GA) and widely available for Windows and the latest distributions of Linux

### NEW QUESTION # 28

You have an SAP HANA on Azure (Large Instances) deployment.

You need to generate health check log files for the Deployment.

What should you do?

- A. From a SSH session on the HANA Large instance node.  
Run/var/waagent/Microsoft.AzureCAT.AzureEnhancedMonitoring.MonitorX64Linux-1.0.082/AzuredMonitoring - monitoring.
- B. From the Azure portal, select New support request.
- C. From the Azure portal, select Diagnose and solve problems.
- D. From A SSH session on the HANA large instances node, run/opt/sgi/health\_check/microsoft\_tdi-sh.

**Answer: D**

### NEW QUESTION # 29

You have an Azure subscription.

You plan to deploy a SAP NetWeaver landscape that will use SQL Server on Azure virtual machines. The solution must meet the following requirements:

The SAP application and database tiers must reside in the same Azure zone.

The application tier in the Azure virtual machines must belong to the same Availability Set.

Which four actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

NOTE: More than one order of answer choices is correct. You will receive credit for any of the correct orders you select.

**Answer:**

Explanation:

□ Explanation

Text Description automatically generated with medium confidence

□ Step 1: Create a proximity placement group

A proximity placement group is a logical grouping of Azure resources within the same Azure data center in order to reduce latency.

Step 2: Create an Availability Set

Create an availability set that references the Azure proximity group.

By adding the availability sets to proximity placement groups, the network latencies are considerably reduced, thereby improving the overall performance.

Step 3: Deploy SQL Server on Azure Virtual machines

Step 4: Deploy the application tier in the Azure virtual machines

Deploy the application layer VMs by referencing the availability set and the proximity placement group.

<https://docs.microsoft.com/en-us/azure/virtual-machines/workloads/sap/sap-proximity-placement-scenarios>

### NEW QUESTION # 30

You plan to migrate an SAP environment to Azure.

You need to recommend a solution to migrate the SAP application servers to Azure. The solution must minimize downtime and changes to the environments.

What should you include in the recommendation?

- A. Azure Storage Explorer
- B. Azure Import/Export service
- C. Azure Site Recovery

- D. AzCopy

**Answer: C**

Explanation:

Site Recovery is used to manage and orchestrate disaster recovery of on-premises machines and Azure VMs.

However, it can also be used for migration. Migration uses the same steps as disaster recovery with one exception. In a migration, failing machines over from your on-premises site is the final step. Unlike disaster recovery, you can't fail back to on-premises in a migration scenario.

<https://docs.microsoft.com/en-us/azure/site-recovery/migrate-tutorial-on-premises-azure>

<https://www.microsoft.com/en-us/itshowcase/strategies-for-migrating-sap-systems-to-microsoft-azure>

### NEW QUESTION # 31

You have an SAP environment on Azure that uses multiple subscriptions.

To meet GDPR requirements, you need to ensure that virtual machines are deployed only to the West Europe and North Europe Azure regions.

Which Azure components should you use?

- A. Azure resource locks and the Compliance admin center
- B. Azure Security Center and Azure Active Directory (Azure AD) groups
- **C. Azure management groups and Azure Policy**
- D. Azure resource groups and role-based access control (RBAC)

**Answer: C**

Explanation:

Azure Policy enables you to set policies to conform to the GDPR. Azure Policy is generally available today at no additional cost to Azure customers. You can use Azure Policy to define and enforce policies that help your cloud environment become compliant with internal policies as well as external regulations.

Azure Policy is deeply integrated into Azure Resource Manager and applies across all resources in Azure.

Individual policies can be grouped into initiatives to quickly implement multiple rules. You can also use Azure Policy in a wide range of compliance scenarios, such as ensuring that your data is encrypted or remains in a specific region as part of GDPR compliance.

Microsoft is the only hyperscale cloud provider to offer this level of policy integration built in to the platform for no additional charge.
