IT인증시험문제는 수시로 변경됩니다. 이 점을 해결하기 위해ExamPassdump의Splunk인증 SPLK-3002덤프도 시험변경에 따라 업데이트하도록 최선을 다하고 있습니다.시험문제 변경에 초점을 맞추어 업데이트를 진행한후 업데이트된Splunk인증 SPLK-3002덤프를 1년간 무료로 업데이트서비스를 드립니다.

Splunk SPLK-3002 인증 시험은 Splunk의 IT Service Intelligence (ITSI) 플랫폼 관리 및 사용에 대한 전문 지식을 시연하려는 IT 전문가를 위해 설계되었습니다. 이 시험에는 ITSI 아키텍처 및 배포, 데이터 수집 및 정규화, 이벤트 관리 및 서비스 분석을 포함한 다양한 주제가 다릅니다. 이 시험을 통과하면 Splunk ITSI를 사용하여 IT 서비스 제공을 개선하고 운영 효율성을 높이며 비즈니스 결과를 유도하는 기술과 지식을 검증합니다.

Splunk SPLK-3002 시험은 Splunk IT Service Intelligence를 사용하여 IT 서비스를 관리하는 IT 전문가의 기술과 전문성을 증명하고자 하는 사람들에게 훌륭한 자격증입니다. 이 시험은 ITSI의 필수적인 주제를 다루며, 시험에 통과함으로써 개인이 Splunk 환경에서 ITSI를 구성하고 관리할 수 있는 능력을 검증합니다. 적절한 준비를 통해, 후보자는 시험에 통과하고 IT 서비스 관리 분야에서의 경력 전망을 향상시킬 수 있습니다.

Splunk SPLK-3002인증시험대비자료 & SPLK-3002인기자격증 최신시험덤프자료

ExamPassdump를 선택함으로써 여러분은 Splunk 인증SPLK-3002시험에 대한 부담은 사라질 것입니다.우리 ExamPassdump는 끊임없는 업데이트로 항상 최신버전의 Splunk 인증SPLK-3002시험덤프임을 보장해드립니다.만약 덤프품질을 확인하고 싶다면ExamPassdump 에서 무료로 제공되는Splunk 인증SPLK-3002덤프의 일부분 문제를 체험하시면 됩니다.ExamPassdump 는 100%의 보장도를 자랑하며Splunk 인증SPLK-3002시험을 한번에 패스하도록 도와드립니다.

SPLK-3002 자격증 시험을 준비하기 위해서, 지원자들은 Splunk의 공식 교육 과정과 온라인 문서, 사용자 그룹 및 포럼과 같은 다른 자원을 활용할 수 있습니다. 공식 Splunk IT Service Intelligence Fundamentals 과정은 시험의 선수과목으로 권장됩니다. 또한, 지원자들은 ITSI 환경을 설정하고 구성하며, 실제 ITSI 프로젝트에서 작업하면서 실무 경험을 쌓을 수 있습니다.

최신 Splunk IT Service SPLK-3002 무료샘플문제 (Q78-Q83):

질문 # 78

Which of the following describes enabling smart mode for an aggregation policy?

- A. Enable grouping in Notable Event Review, select "Smart Mode", select "fields", and click "Save"
- B. Configure -> Policies -> Smart Mode -> Enable, select "fields", click "Save"

- C. Edit the notable event view, enable smart mode, select "fields", and click "Save"
- D. Edit the aggregation policy, enable smart mode, select fields to analyze, click "Save"

정답: B

설명:

Explanation

1. From the ITSI main menu, click Configuration > Notable Event Aggregation Policies.
2. Select a custom policy or the Default Policy.
3. Under Smart Mode grouping, enable Smart Mode.
4. Click Select fields. A dialog displays the fields found in your notable events from the last 24 hours.

질문 # 79

Which of the following describes entities? (Choose all that apply.)

- A. Entities must be IT devices, such as routers and switches, and must be identified by either IP value, host name, or mac address.
- B. Multiple entities can share the same alias value, but must have different role values.
- C. To automatically restrict the KPI to only the entities in a particular service, select "Filter to Entities in Service".
- D. An abstract (pseudo/logical) entity can be used to split by for a KPI, although no entity rules or filtering can be used to limit data to a specific service.

정답: C,D

설명:

Reference: <https://docs.splunk.com/Documentation/ITSI/4.10.2/SI/KPIfilter> Entities are IT components that require management to deliver an IT service. Each entity has specific attributes and relationships to other IT processes that uniquely identify it. Entities contain alias fields and informational fields that ITSI associates with indexed events. Some statements that describe entities are:

B). An abstract (pseudo/logical) entity can be used to split by for a KPI, although no entity rules or filtering can be used to limit data to a specific service. An abstract entity is an entity that does not represent a physical host or device, but rather a logical grouping of data sources. For example, you can create an abstract entity for each business unit in your organization and use it to split by for a KPI that measures revenue or customer satisfaction. However, you cannot use entity rules or filtering to limit data to a specific service based on abstract entities, because they do not have alias fields that match indexed events.

D). To automatically restrict the KPI to only the entities in a particular service, select "Filter to Entities in Service". This option allows you to filter the data sources for a KPI by the entities that are assigned to the service. For example, if you have a service for web servers and you want to monitor the CPU load percent for each web server entity, you can select this option to ensure that only the events from those entities are used for the KPI calculation.

질문 # 80

When in maintenance mode, which of the following is accurate?

- A. Once the window is over, KPIs and notable events will begin to be generated again.
- B. KPIs are shown in blue while in maintenance mode.
- C. Service health scores and KPI events are deleted until the window is over.
- D. Maintenance mode slots are scheduled on a per hour basis.

정답: A

설명:

Reference:

A is the correct answer because when in maintenance mode, KPIs and notable events will begin to be generated again once the window is over. Maintenance mode is a feature of ITSI that allows you to temporarily suspend alerts and health score calculations for a service or an entity during planned maintenance or downtime. During maintenance mode, KPI searches still run, but the results are buffered until the window is over. Once the window is over, the buffered results are processed and alerts and health scores are generated if necessary. Reference: [Overview of maintenance windows in ITSI]

질문 # 81

What is the range for a normal Service Health score category?

- A. 60-80
- B. 40-60
- C. 80-100
- D. 20-40

정답: C

설명:

In Splunk IT Service Intelligence (ITSI), the Service Health Score is a metric that provides a quantifiable measure of the overall health and performance of a service. The score ranges from 0 to 100, with higher scores indicating better health. The range for a normal Service Health score category is typically from 80 to

100. Scores within this range suggest that the service is performing well, with no significant issues affecting its health. This categorization helps IT and business stakeholders quickly assess the operational status of their services, enabling them to focus on services that may require attention or intervention due to lower health scores.

질문 # 82

Which ITSI components are required before a module can be created?

- A. One or more datamodels.
- B. One or more correlation searches and their associated entities.
- C. One or more services with KPIs and their associated base searches.
- D. One or more entity import saved searches.

정답: A

설명:

Before a module can be created in Splunk IT Service Intelligence (ITSI), it is essential to have one or more datamodels established. Datamodels in Splunk provide a structured format for organizing and interpreting data, which is crucial for modules within ITSI. Modules often rely on datamodels to extract, transform, and present data in a meaningful way, especially when dealing with complex datasets across various sources.

Datamodels serve as the foundation for the module's ability to categorize and analyze data efficiently, enabling the creation of KPIs, services, and visualizations that are aligned with the specific needs of the module. Having these datamodels in place ensures that the module can function correctly and provide valuable insights into the monitored IT environments.
