# 800-150 Exam Tips - 800-150 Pass Guarantee

What's more, part of that DumpsTorrent 800-150 dumps now are free: https://drive.google.com/open?id=13BVbf-FhBz2zDDJJx_9IA1r01aYt3etr

DumpsTorrent has a professional team of IT experts and certified trainers who written the 800-150 exam questions and valid exam prep according to the actual test. You can download the Cisco free demo before you purchase. If you bought our 800-150 Exam PDF, you will be allowed to free update your dumps one-year. You just need to spend one or two days to practice questions and remember answers.

## Cisco 800-150 Exam Syllabus Topics:

| Topic | Details |
|---|---|
| Topic 1 | • Cisco Software: This section of the exam measures the skills of a Network Engineer and discusses Cisco's software systems and licensing. It explains the difference between IOS install and bundle modes and gives an overview of different licensing models. Students learn how to manage Cisco software images, including backing up, transferring, and installing images via FTP, TFTP, or USB. It also covers how to handle configuration files to keep devices running properly and ensure smooth upgrades or replacements. |
| Topic 2 | • Cisco Infrastructure and Collaboration Infrastructure: This section of the exam measures the skills of a Collaboration Engineer and focuses on Cisco infrastructure devices, endpoints, and collaboration technologies. It introduces network devices, collaboration endpoints like IP phones and video systems, and explains on-premises collaboration deployments using tools like Cisco Unified Communications Manager. It also covers how video systems integrate into collaboration environments and highlights Cisco's cloud services for enterprise communication, including Webex Meetings, Webex Teams, and hosted collaboration solutions. |

| | |
|---|---|
| Topic 3 | • Networking Foundations: This section of the exam measures the skills of a Network Engineer and covers the basic building blocks of computer networking. It explains different types of networks like local area networks and wireless networks, and introduces lightweight wireless LANs. It describes the layers of communication models like the OSI model and TCP<br>• IP stack, and explains how data moves across networks. It also discusses the physical cabling used in networks, such as Ethernet and fiber optics. Students will learn about network switching, IP addressing, subnetting, and routing at Layer 3. The section also introduces Cisco's campus network devices, data center switches, UCS servers, and collaboration devices, describing their roles and functions in the network. |
| Topic 4 | • Cisco UCS and Data Center Architecture: This section of the exam measures the skills of a Data Center Engineer and introduces Cisco's UCS and data center solutions. It explains the devices found in a data center, including switches, UCS servers, and director switches, and describes different server deployment models. Students will also learn about virtualization components like virtual machines, hypervisors, cloud computing concepts, and deployment models. The section covers how Cisco UCS devices fit into campus networks, edge locations, and data centers, and explains the key components and connections used in UCS architecture. |

## 800-150 Pass Guarantee, 800-150 Detailed Study Plan

If you buy our 800-150 exam questions, we will offer you high quality products and perfect after service just as in the past. We believe our consummate after-sale service system will make our customers feel the most satisfactory. Our company has designed the perfect after sale service system for these people who buy our 800-150 practice materials. We can promise that we will provide you with quality 800-150 training braindump, reasonable price and professional after sale service. As long as you have problem on our 800-150 exam questions, you can contact us at any time.

## Cisco Supporting Cisco Devices for Field Technicians Sample Questions (Q74-Q79):

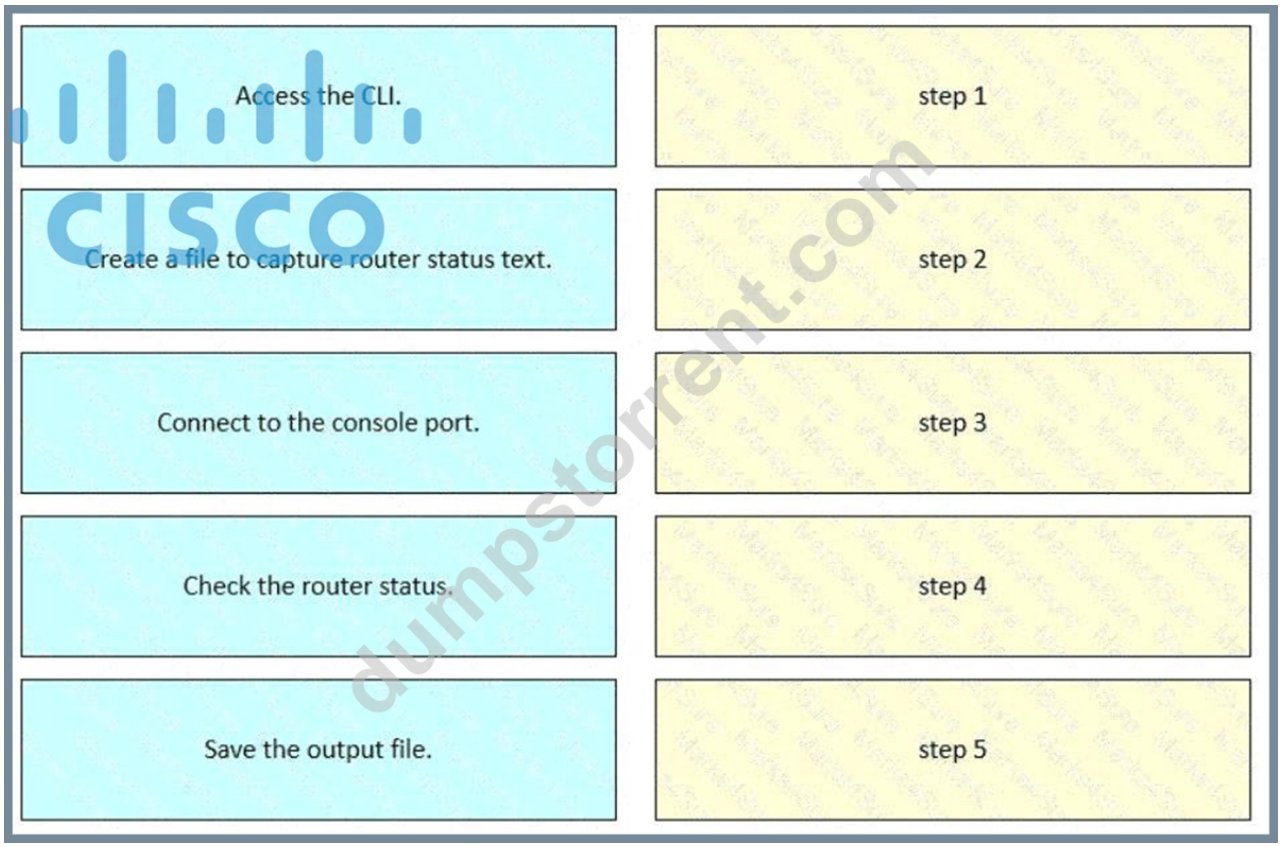
**NEW QUESTION # 74**
Which action must be taken before powering down the endpoint during thereplacement process of a Cisco collaboration device?

- A. Reset the device to factory settings.
- B. Install the new hardware.
- C. Activate the new device.
- D. Back up the configuration.

**Answer: D**

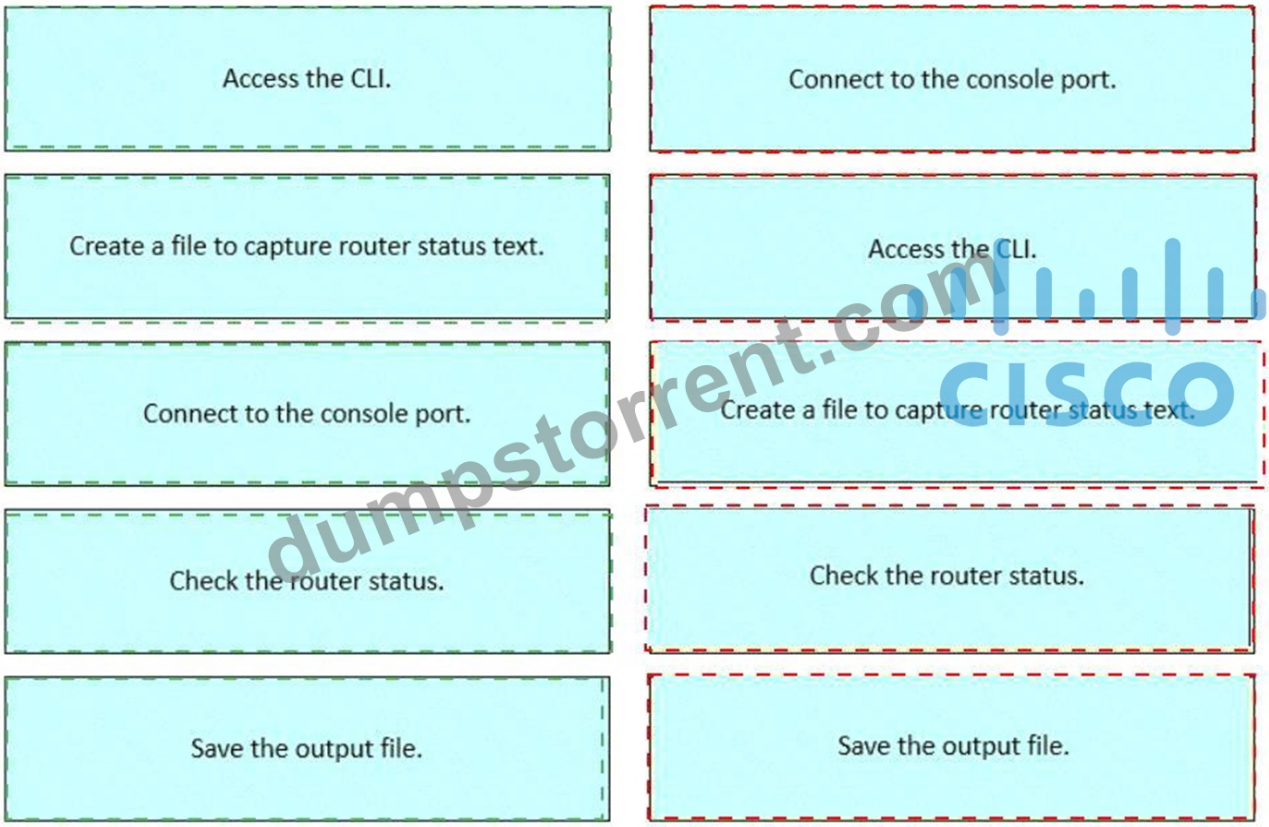
Explanation:
Before shutting down any Cisco collaboration device (such as an IP phone, video endpoint, or codec) for replacement, it is essential toback up the configuration. This ensures that all custom settings, including user profiles, network configurations, and service settings, are preserved and can be quickly restored on the replacement device.
This backup minimizes downtime and avoids manual reconfiguration errors during the swap process.
Reference:Supporting Cisco Devices for Field Technicians (FLDTEC) - Maintenance and RMA Procedures

**NEW QUESTION # 75**
Drag and drop the steps from the left into order to capture the status of a Cisco device.



**Answer:**

Explanation:



Explanation:

This procedure is taught in theFLDTEC courseunder theDevice Configuration and Verificationsection and reflects standard field technician workflows:

* Connect to the console portusing a console cable and terminal software (like PuTTY or Tera Term).
* Access the CLIof the Cisco device by logging in via the console session.

* Create a log fileor enable logging in the terminal emulator to begin capturing output.
* Check the router statususing commands such as show running-config, show ip interface brief, or show version.
* Save the output filefrom the terminal emulator for documentation, troubleshooting, or escalation.
This logical flow ensures accurate diagnostics and traceability during field support operations.

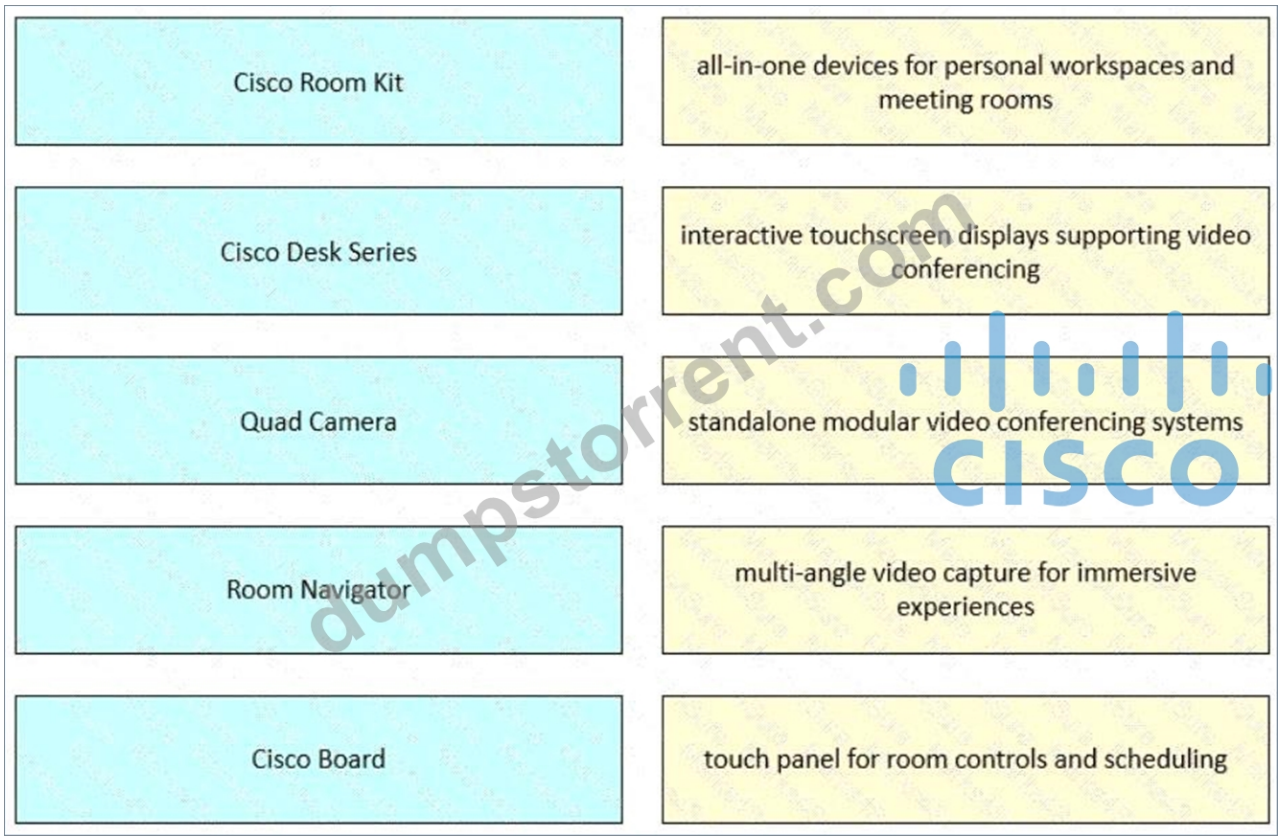
**NEW QUESTION # 76**
Which two devices are most commonly used in a WAN environment? (Choose two.)

- A. Modems
- B. Hubs
- C. Optical fiber converters
- D. Network interface cards
- E. Wireless access points

**Answer: A,C**

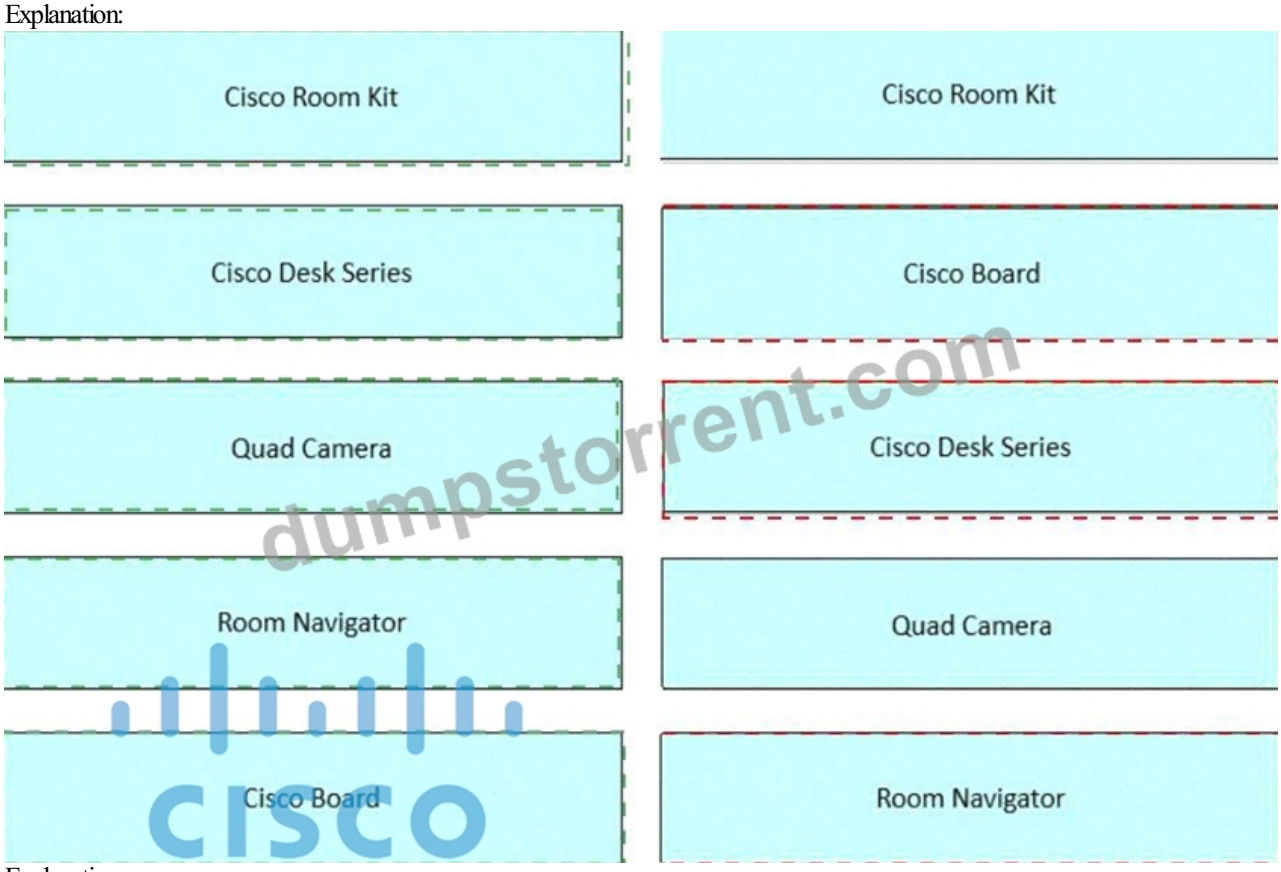
Explanation:
In the context ofWide Area Networks (WANs), the key objective is to connect geographically separated networks using service provider infrastructure. The FLDTEC course emphasizes that WAN environments typically involve devices that can handle different physical transmission mediums and protocols.
Modems:
* Modulate and demodulate analog signals to digital signals.
* Used in WAN environments to connect over analog lines like DSL or leased lines.
* Essential for interfacing between digital routers and analog telephone networks.
Optical Fiber Converters:
* Also known asmedia converters, they are used to convert electrical signals to optical signals (and vice versa) for fiber transmission.
* Common in WAN scenarios where long-distance high-speed transmission over fiber is required.
Incorrect Options:
* A. Hubs: Obsolete Layer 1 devices used in LANs, not suitable for WANs.
* D. Network Interface Cards (NICs): Used in end devices for LAN connectivity.
* E. Wireless Access Points: Typically used in WLANs within local premises, not WAN infrastructure.
This aligns withCisco's WAN architecture fundamentalsas highlighted in FLDTEC under "Cisco Equipment and Related Hardware."

**NEW QUESTION # 77**
Drag and drop the Cisco collaboration endpoints from the left onto the corresponding descriptions on the right.



**Answer:**

Explanation:

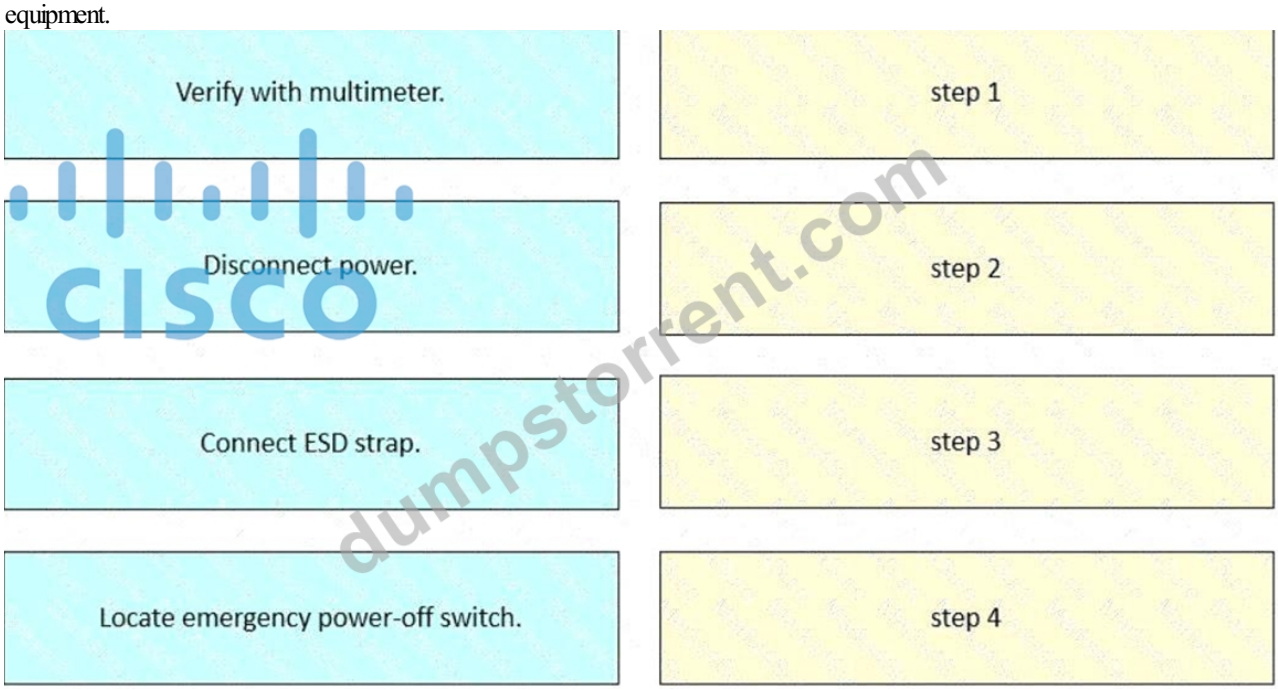


Explanation:

* Cisco Room Kit# All-in-one devices for personal workspaces and meeting rooms
* Cisco Desk Series# Standalone modular video conferencing systems
* Quad Camera# Multi-angle video capture for immersive experiences
* Room Navigator# Touch panel for room controls and scheduling

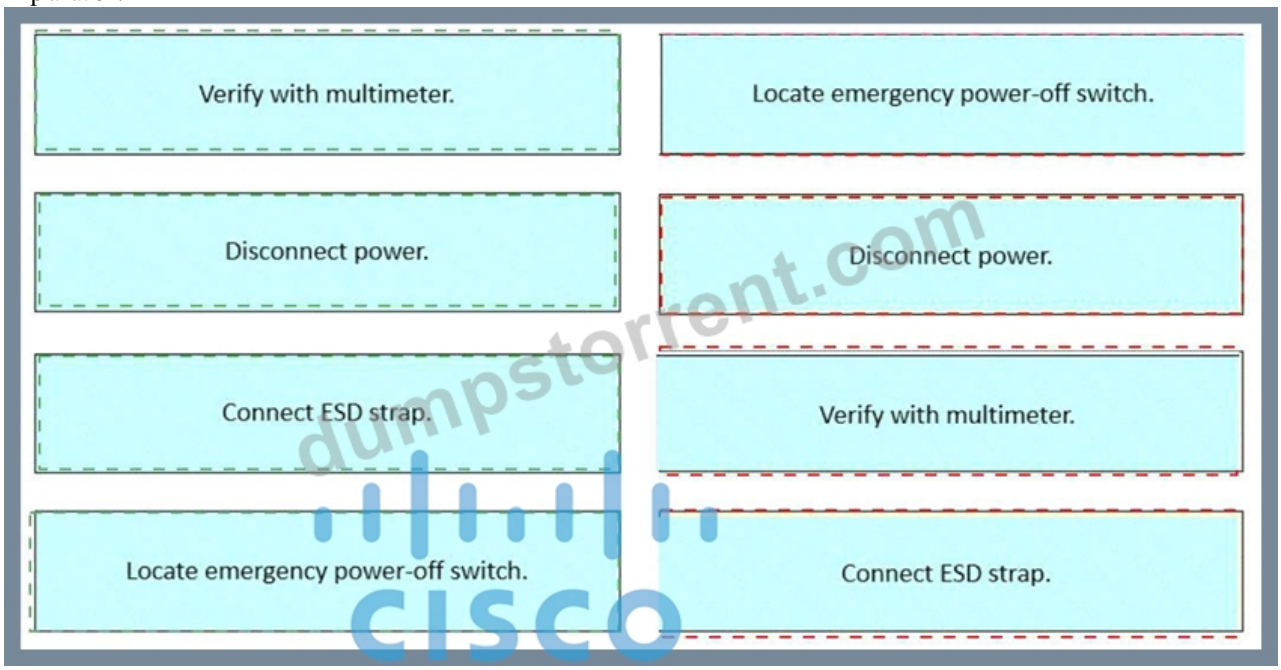
* Cisco Board# Interactive touchscreen displays supporting video conferencing Cisco's collaboration portfolio includes a wide variety ofhardware endpointsused toenhance remote communication and conference room experiences. These are highlighted in the FLDTEC material as follows:
* Cisco Room Kit: Combines camera, codec, speakers, and microphones into one device - designed for easy integration with displays in meeting spaces.
* Cisco Desk Series: Purpose-built for desktop video conferencing and modular setups.
* Quad Camera: Offersautomatic speaker trackingandintelligent framing, used in large rooms for immersive experiences.
* Room Navigator: Used tocontrol meetings, reserve rooms, and manage smart building functions.
* Cisco Board: Interactive digital whiteboard that integratesvideo conferencing, whiteboarding, and wireless sharing.

**NEW QUESTION # 78**
Drag and drop the safety actions that must be taken prior to beginning work into order on the right for working with electrical equipment.

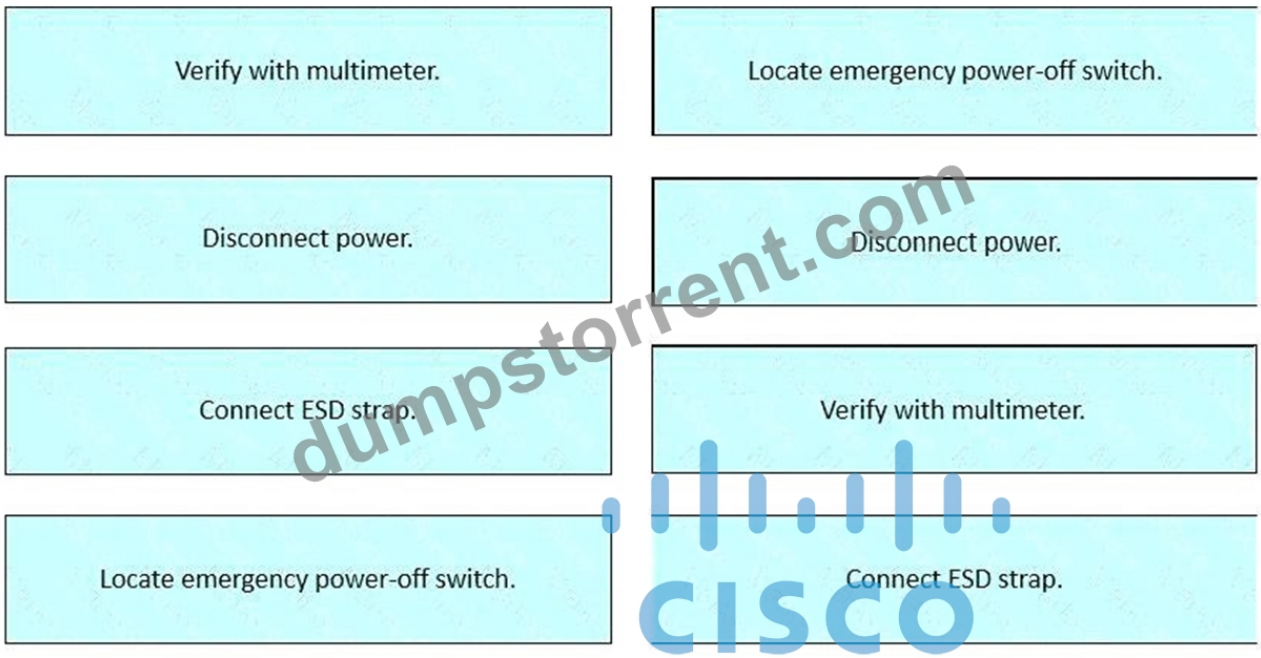


**Answer:**

Explanation:



Explanation:



dumpstorrent.com

In theFLDTEC course, underSafety and ESD Procedures, Cisco outlines the following safety workflow before working on any network hardware:
* Locate Emergency Power-Off Switch: Identifying how to cut power quickly is essential in case of an electrical fault or emergency.
* Disconnect Power: Always ensure the power source is turned off and disconnected before handling any components.
* Verify with Multimeter: Use a multimeter to confirm that no voltage is present before proceeding.
* Connect ESD Strap: Once confirmed safe, attach your ESD strap to a grounded point to prevent electrostatic damage to sensitive components.
Following this process is critical not only forpersonal safetybut also forequipment protection, especially duringhardware installation, maintenance, or RMA replacements.

**NEW QUESTION # 79**
.....

Take advantage of this golden opportunity, and download our Supporting Cisco Devices for Field Technicians (800-150) updated exam questions to grab the most prestigious credential in one go. DumpsTorrent has formulated the Supporting Cisco Devices for Field Technicians (800-150) exam dumps in these three user-friendly formats: Supporting Cisco Devices for Field Technicians (800-150) Web-Based Practice Test, Desktop Practice Exam Software, and 800-150 questions PDF file. You will find the specifications of these formats below to understand them properly.
