Exam Huawei H12-521_V1.0-ENU Torrent, Valid H12-521_V1.0-ENU Exam Fee

To increase your chances of success, consider utilizing the H12-521_V1.0-ENU Exam Questions, which are valid, updated, and reflective of the actual H12-521_V1.0-ENU Exam. Don't miss the opportunity to strengthen your Huawei H12-521_V1.0-ENU exam preparation with these valuable questions.

Huawei H12-521_V1.0-ENU (HCIP-Intelligent Vision V1.0) Certification Exam consists of multiple choice questions and simulation questions. H12-521_V1.0-ENU exam is divided into two parts: the theoretical part and the lab part. The theoretical part of the exam covers topics such as the principles and applications of intelligent vision technology, as well as the architectures and components of intelligent video systems. The lab part of the exam requires candidates to configure, deploy, and troubleshoot intelligent video systems. Upon passing the exam, candidates will be awarded the HCIP-Intelligent Vision V1.0 certification, which is recognized by industry professionals worldwide.

Huawei HCIP-Intelligent Vision V1.0 Sample Questions (Q29-Q34):

NEW QUESTION # 29

IVS3800 complete installation scenario, the server shipped to the site has completed the installation of Host os CSP and IVS applications.

- A. False
- B. True

Answer: A

NEW QUESTION # 30

When installing the behavior analysis/video summary/video search characteristic algorithm, only the VA type algorithm needs to be installed, and the MCS type algorithm does not need to be installed

- A. False
- B. True

Answer: A

NEW QUESTION # 31

Which of the following is not a typical scenario of "prevention and control grid"?

- A. Sports venues
- B. Square
- C. Community
- D. Financial unit

Answer: D

NEW QUESTION # 32

The () function can check the overall system information, including the resource running status and basic database information.

- A. Alarm
- B. Log
- C. Inspection
- D. Tour

Answer: C

Explanation:

For the routine maintenance and health monitoring of an intelligent vision system, administrators rely on specific diagnostic tools to ensure all components are functioning optimally. While "Alarms" alert users to immediate faults and "Logs" provide a historical record of system events, the Inspection function is designed for proactive and comprehensive system health checks.

This specialized tool is used to monitor the "pulse" of the entire platform. According to the maintenance standards, the Inspection function can check the overall system information, including the resource running status and basic database information. This includes verifying the CPU and memory utilization of service nodes, checking the connectivity of storage volumes, and ensuring that the underlying database- which stores critical metadata like target recognition results and system configurations- is responsive and healthy. Regular inspections are a cornerstone of ultra-simplified O & M (Operations and Maintenance), allowing technicians to identify performance bottlenecks or minor inconsistencies before they escalate into critical alarms. By consolidating system-wide resource data and database status into a single inspection report, the IVS platform enables administrators to maintain a stable environment for continuous intelligent analysis and data structuring.

NEW QUESTION # 33

In order to improve the brightness of the camera screen, what is the priority to adjust?

- A. Focal length
- B. Field of view
- C. Resolution
- D. Aperture

Answer: D

NEW QUESTION # 34

.....

DumpsKing wants to win the trust of HCIP-Intelligent Vision V1.0 (H12-521_V1.0-ENU) exam candidates at any cost. To achieve this objective DumpsKing is offering real, updated, and error-free HCIP-Intelligent Vision V1.0 (H12-521_V1.0-ENU) exam dumps in three different formats. These HCIP-Intelligent Vision V1.0 (H12-521_V1.0-ENU) exam questions formats are DumpsKing Huawei H12-521_V1.0-ENU dumps PDF files, desktop practice test software, and web-based practice test software.
