## SC-300 Reliable Exam Syllabus | Test SC-300 Questions Answers

Now Microsoft SC-300 is a hot certification exam in the IT industry, and a lot of IT professionals all want to get Microsoft SC-300 certification. So Microsoft certification SC-300 exam is also a very popular IT certification exam. Microsoft SC-300 certificate is very helpful to your work in the IT industry, which can help promote your position and salary a lot and let your life have more security.

The Microsoft SC-300 exam covers a range of topics, including identity and access management concepts, Microsoft Azure Active Directory, Azure Active Directory Connect, Microsoft Identity Manager, and Role-Based Access Control (RBAC). It also tests your ability to implement and configure various security features such as multi-factor authentication, conditional access policies, and privileged identity management. Passing the Microsoft SC-300 Exam can open up numerous career opportunities for IT professionals, including roles such as Identity and Access Administrator, Security Analyst, and Security Engineer.

### Microsoft Identity and Access Administrator Sample Questions (Q271-Q276):

#### NEW QUESTION # 271

You have a Microsoft 365 E5 subscription that contains two users named User1 and User2.

You need to ensure that User1 can create access reviews for groups, and that User2 can review the history report for all the completed access reviews. The solution must use the principle of least privilege.

Which role should you assign to each user? To answer, drag the appropriate roles to the correct users. Each role may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content NOTE: Each correct selection is worth one point.

**Answer:**

Explanation:

Explanation

#### NEW QUESTION # 272

You have 2,500 users who are assigned Microsoft Office 365 Enterprise E3 licenses. The licenses are assigned to individual users. From the Groups blade in the Azure Active Directory admin center, you assign Microsoft Office 365 Enterprise E5 licenses to a group that includes all users.

You needed to remove the Office 365 Enterprise E3 licenses from the users by using the least amount of administrative effort. What should you use?

- A. the Licenses blade in the Azure Active Directory admin center
- B. the Identity Governance blade in the Azure Active Directory admin center
- C. the Groups blade in the Azure Active Directory admin center
- D. the Set-AzureAdUser cmdlet

**Answer: A**

#### NEW QUESTION # 273

Your company has two divisions named Contoso East and Contoso West. The Microsoft 365 identity architecture for both divisions is shown in the following exhibit.

You need to assign users from the Contoso East division access to Microsoft SharePoint Online sites in the Contoso West tenant. The solution must not require additional Microsoft 3G5 licenses.

What should you do?

- A. Invite the Contoso East users as guests in the Contoso West tenant.
- B. Configure the existing Azure AD Connect server in Contoso East to sync the Contoso East Active Directory forest to the Contoso West tenant.
- C. Deploy a second Azure AD Connect server to Contoso East and configure the server to sync the Contoso East Active Directory forest to the Contoso West tenant.
- D. Configure Azure AD Application Proxy in the Contoso West tenant.

**Answer: B**

## NEW QUESTION # 274

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You have a Microsoft 365 tenant.

You have 100 IT administrators who are organized into 10 departments.

You create the access review shown in the exhibit. (Click the Exhibit tab.)

You discover that all access review requests are received by Megan Bowen.

You need to ensure that the manager of each department receives the access reviews of their respective department.

Solution: You add each manager as a fallback reviewer.

Does this meet the goal?

- A. No
- B. Yes

### Answer: A

Explanation:

The option of Fallback reviewer is when you set as reviewer to the manager or group owner and somehow that user is not having a manager in the directory. In those case, the fallback reviewer, which could be a department head would be the reviewer.

"Fallback reviewers are asked to do a review when the user has no manager specified in the directory or the group does not have an owner."

## NEW QUESTION # 275

You have an Azure Active Directory (Azure AD) tenant named conto.so.com that has Azure AD Identity Protection enabled. You need to Implement a sign-in risk remediation policy without blocking access.

What should you do first?

- A. Enforce Azure AD Password Protection.
- B. Configure self-service password reset (SSPR) for all users.
- C. **implement multi-factor authentication (MFA) for all users.**
- D. Configure access reviews in Azure AD.

### Answer: C

Explanation:

Explanation

MFA and SSPR are both required. However, MFA is required first.
