Why do we need so many certifications? One thing has to admit, more and more certifications you own, it may bring you more opportunities to obtain a better job, earn more salary. This is the reason why we need to recognize the importance of getting the test C_TS422_2023 certification. Our passing rate is 98%-100% and there is little possibility for you to fail in the exam. But if you are unfortunately to fail in the exam we will refund you in full immediately. Some people worry that if they buy our C_TS422_2023 Exam Questions they may fail in the exam and the procedure of the refund is complicated.

SAP C_TS422_2023 Exam Syllabus Topics:

Topic	Details
Topic 1	• Managing Clean Core: This section covers the application of clean core principles to enhance business process agility, reduce adaptation efforts, and drive innovation in ERP systems.
Topic 2	• Material Requirements Planning in SAP S • 4HANA: This part of the exam covers an examination of planning strategies, tools, and long-term planning concepts. Overview of MRP fundamentals and lot size procedures.
Topic 3	• Process Orders in SAP S • 4HANA: This section covers an introduction to process order components, processing, and relevant master data objects. Overview of Good Manufacturing Practices (GMP) features.
Topic 4	• Advanced Planning in SAP S • 4HANA: This section includes an overview of advanced planning fundamentals and master data. Explanation of key tools and processes. Discussion of planning evaluation concepts.
Topic 5	• Lean Manufacturing in SAP S • 4HANA: This section covers repetitive manufacturing master data, line load planning, and Kanban systems.
Topic 6	• Introduction to SAP S • 4HANA Production Planning: This section covers an overview of production planning components, functions, and planning approaches. Exploration of emerging trends.

Topic 7	- Capacity Planning in SAP S - 4HANA: This section covers a discussion of SAP S - 4HANA best practices, SAP HANA database concept, SAP Fiori user experience, and embedded analytics capabilities.
Topic 8	- Master Data in SAP S - 4HANA: This section covers the exploration of crucial production-related master data elements, with emphasis on bill of material, routing, and production version.

C_TS422_2023 Instant Discount, C_TS422_2023 Exam Objectives Pdf

Before you decide to get the C_TS422_2023 exam certification, you may be attracted by the benefits of C_TS422_2023 credentials. Get certified by C_TS422_2023 certification means you have strong professional ability to deal with troubleshooting in the application. Besides, you will get promotion in your job career and obtain a higher salary. If you want to pass your SAP C_TS422_2023 Actual Test at first attempt, C_TS422_2023 pdf torrent is your best choice. The high pass rate of C_TS422_2023 vce dumps can give you surprise.

SAP S/4HANA Cloud Private Edition - Production Planning and Manufacturing Sample Questions (Q10-Q15):

NEW QUESTION # 10
You have a scheduling agreement with a vendor. You want classic MRP to automatically create schedule lines in case of material shortage. What must you do?
Note: There are 2 correct answers to this question.

- A. Set the creation indicator for delivery schedule lines on the initial screen of the MRP run.
- B. Set the creation indicator for purchase requisitions on the initial screen of the MRP run.
- C. Add the agreement to the source list mark it for MRP relevance.
- D. Add the agreement to the quota arrangement mark it for MRP relevance.

Answer: A,C

NEW QUESTION # 11
Generic Parent » Generic 1 pt
What is the purpose of collective orders?

- A. To post any component withdrawal as single backflush with order confirmation
- B. To post production costs on a cost collector instead of the production order
- C. To combine order management of co-products and by-products with the main product
- D. To manage production orders for an entire finished product on multiple levels

Answer: D

Explanation:
Collective orders are used to represent multilevel production structures for materials produced in-house, where the manufacturing order for the highest material in the structure automatically generates manufacturing orders for the semifinished products in the structure. This allows for an integrated view of the production process and avoids unnecessary placements in storage or removals from storage between production levels. Collective orders can consist of planned orders, production orders, or process orders, and each order has its own order number. Collective orders can be processed with or without automatic goods movements, depending on the business scenario. Reference: Collective Orders | SAP Help Portal, Collective Order | SAP Help Portal, Combined production order Vs Collective production order in SAP PP

NEW QUESTION # 12

which actions does the system perform by default when you save a confirmation for a finished product in repetitive manufacturing?
Note: There are 3 Correct answers to this question.

- A. Archiving of document for assembly scrap
- B. Posting of production costs to the production cost collector
- C. Reduction of associated capacity requirements
- D. Material staging for next order in sequence
- E. posting of goods receipt for the product

Answer: B,C,E

Explanation:

When you save a confirmation for a finished product in repetitive manufacturing, the system performs the following actions by default12:
Posting of production costs to the production cost collector: The system calculates the actual costs for the confirmed quantity and posts them to the production cost collector assigned to the product. The production cost collector is a cost object that collects the costs for all confirmations of a product in a plant for a period.
Posting of goods receipt for the product: The system posts the confirmed quantity as a goods receipt to the warehouse. The product is valuated at the standard price defined in the material master record. The difference between the standard price and the actual costs is posted to a price difference account.
Reduction of associated capacity requirements: The system reduces the capacity requirements for the work center where the confirmation was made. The capacity requirements are calculated based on the confirmed quantity and the standard values for setup, machine, and labor time in the routing. PREMISE/f899ce30af9044299d573ea30b533f1c/9231f9504a62eb5ee10000000a44538d.html).

NEW QUESTION # 13

What happens when you set up detailed scheduling with the finite scheduling mode Insert Operation?
Note: There are 2 correct answers to this question.

- A. Sequencing on multiactivity resources is automatically updated.
- B. Neighboring operations can be moved in both directions in order to create a slot.
- C. Scheduling of an operation takes place as close as possible to the desired date.
- D. Changes are automatically implemented in the complete collective order.

Answer: C,D

NEW QUESTION # 14

Why would you use phantom assemblies? Note: There are 3 correct answers to this question.

- A. To reduce the number of material masters
- B. To increase the number of planning levels
- C. To make the assignment of components easier
- D. To simplify the structure of bills of material
- E. To reduce the number of changes required in bills of material

Answer: A,C,D

Explanation:

Phantom assemblies are assemblies that have their own product structure, but whose assembly does not actually physically exist. The components of the phantom assembly are incorporated directly in the superordinate product. The product structure of the superordinate product contains a reference to the phantom assembly. You can use phantom assemblies for the following purposes:
To simplify the structure of bills of material: Phantom assemblies allow you to group components that belong together logically or functionally, without creating an additional level in the product structure. This can make the product structure easier to maintain and understand.
To reduce the number of material masters: Phantom assemblies do not require a material master record in SAP S/4HANA, as they

are not physically produced or stored. This can save storage space and reduce the effort of creating and updating material masters. To reduce the number of changes required in bills of material: Phantom assemblies can be used to represent common subassemblies that are used in multiple products. This way, you only need to maintain the product structure of the phantom assembly once, and any changes will be reflected in all the products that reference it.

Phantom assemblies do not increase the number of planning levels, as they are not considered as separate planning objects. They also do not make the assignment of components easier, as the components are assigned to the superordinate product, not to the phantom assembly. Reference: Phantom Assembly | SAP Help Portal, Phantom Assembly | SAP Help Portal, Planning Phantom Assemblies | SAP Help Portal.

NEW QUESTION # 15

......

Once you decide to pass the SAP S/4HANA Cloud Private Edition - Production Planning and Manufacturing exam and get the certification, you may encounter many handicaps that you don't know how to deal with, so, you may think that it is difficult to pass the exam and get the certification. In order to help you solve these problem and help you pass the exam easy, we complied such a C_TS422_2023 exam torrent. We can promise that you will have no regret buying our SAP S/4HANA Cloud Private Edition - Production Planning and Manufacturing exam dumps. If you are hesitating to buy our C_TS422_2023 Test Quiz, if you are anxious about whether our product is suitable for you or not, we think you can download the trail version. We believe our SAP S/4HANA Cloud Private Edition - Production Planning and Manufacturing exam dumps will help you make progress and improve yourself.
