

# Pass Guaranteed Quiz 2026 Nutanix NCP-CI-Azure– Efficient Exam Questions

2026 Latest DumpsTorrent NCP-CI-Azure PDF Dumps and NCP-CI-Azure Exam Engine Free Share:  
<https://drive.google.com/open?id=1tXd-ZWqrlpwZ2RyhIX36YgcfNJcoa0t2>

To help you pass Nutanix certification exam is the recognition of our best efforts. In order to achieve this goal, our IT experts and certified trainers have focused on the DumpsTorrent NCP-CI-Azure vce dumps with their rich experience and constantly keep the updating our NCP-CI-Azure Study Materials to ensure the accuracy of exam questions and answers. There are 24/7 customer assisting to support you if you have any questions.

## Nutanix NCP-CI-Azure Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"><li>Managing an NC2 on Azure Environment: This section relates to skills in identifying management tasks for nodes and clusters. Candidates will monitor cluster health and cloud resource performance, ensuring that all components function efficiently. Understanding these management tasks is vital for maintaining operational integrity in a hybrid cloud environment.</li></ul>
Topic 2	<ul style="list-style-type: none"><li>Planning an NC2 on Azure Deployment: This section of the exam measures the skills of IT Administrators and covers the preparation of the Azure cloud environment, including determining the appropriate Azure account and node types. It also involves subscribing to the NC2 service, which requires knowledge of authentication methods and organization naming conventions. Additionally, candidates must determine implementation requirements by evaluating deployment use cases and redundancy needs. Identifying networking requirements is crucial, focusing on connectivity options like VPN and CIDR ranges.</li></ul>
Topic 3	<ul style="list-style-type: none"><li>Configuring an NC2 on Azure Environment: This section evaluates the skills of IT Administrators and emphasizes modifying cloud networking security to protect resources. Candidates will configure Nutanix networking settings and troubleshoot connectivity issues to ensure seamless communication within the cloud environment.</li></ul>
Topic 4	<ul style="list-style-type: none"><li>Deploying an NC2 on Azure Environment: This section assesses the skills of Nutanix Cloud Operators and focuses on deploying the cloud cluster within the Azure environment. Candidates will learn to configure cloud provider networking effectively, ensuring that all necessary resources are correctly set up for deployment.</li></ul>

## Test NCP-CI-Azure Result | Latest NCP-CI-Azure Exam Experience

With the complete collection of Nutanix practice questions and answers, our website offers you the most reliable NCP-CI-Azure vce files for your exam preparation. In the NCP-CI-Azure actual test we have compiled real questions and answers so that you can prepare and pass exam in your first attempt. You can also check the demo of NCP-CI-Azure Dumps PDF before you decide to buy it.

### Nutanix Certified Professional - Cloud Integration - Azure (NCP-CI-Azure v6.7) Sample Questions (Q31-Q36):

#### NEW QUESTION # 31

A company has just adopted Nutanix as their technology of choice and is preparing to deploy Nutanix Cloud Clusters (NC@). Which step must be taken first to gain access to the NC2 console?

- A. Open a support case with Nutanix.
- **B. Create a My Nutanix account.**
- C. Navigate to cloud.nutanix.com
- D. Start a free trial via Billing Portal.

**Answer: B**

Explanation:

- \* Initial Access: To gain access to the NC2 console, users need to create an account on the Nutanix platform.
- \* My Nutanix Account: Creating a My Nutanix account provides access to the Nutanix console, support, and other resources.
- \* Free Trial and Billing Portal: Starting a free trial or accessing the billing portal can be subsequent steps but require an initial account.
- \* Support Case: Opening a support case is not necessary for initial access but might be needed for specific issues later.
- \* Conclusion: Creating a My Nutanix account is the first step to accessing the NC2 console and other Nutanix services.

#### NEW QUESTION # 32

What action is performed in Azure when an instance is reported as being in a terminated state, but NS2 expects it to be in a running state?

- **A. NS2 condemns the host and triggers replacement of the host**
- B. NS2 restart the AHV host
- C. NS2 automatically reconnects with the instance
- D. NS2 alert the administrator that a manual replacement is required

**Answer: A**

#### NEW QUESTION # 33

An administrator has recently deployed an NC2 on Azure cluster, but does not have connectivity back to the on-premises environment. The administrator would like to start working on configuring the new cluster.

What is the best way to get access to Prism Central?

- A. Deploy a Jump Host Instance in the Prism Central VNet inside a delegated subnet
- **B. Deploy a Jump Host in an external VNet and peer the VNets for communication between Prism Central VNet and the Jump Host VNet.**
- C. Deploy a Jump Host in an external VNet and peer the VNets for communication between bare-metal VNet and the Jump Host VNet.
- D. Deploy a Jump Host instance in the same subnet as the bare-metal.

**Answer: B**

Explanation:

Jump Host Deployment: A Jump Host provides a secure method to access the NC2 environment when direct connectivity is unavailable. Deploying it in an external VNet allows flexibility in managing network access and security.

VNet Peering: By peering the external VNet (where the Jump Host is deployed) with the VNet containing Prism Central, the administrator can establish a communication pathway. This setup enables secure and controlled access to Prism Central from the Jump Host.

#### NEW QUESTION # 34

Which resource is capable of being connected to a private endpoint as it is not displayed on delegated subnets?

- A. User VMs
- B. Hosts
- C. Prism Central
- D. CVMs

**Answer: C**

Explanation:

\* Private Endpoint: Private Endpoints allow secure access to Azure services over a private network connection. They do not typically appear on delegated subnets, which are used for specific Azure services.

\* Prism Central Connectivity: Prism Central can be connected to a private endpoint to ensure secure communication without exposing it to the public internet. This setup ensures secure and private management of the Nutanix environment.

\* Azure Private Endpoint Documentation

\* Nutanix NC2 Deployment and Security Guide

#### NEW QUESTION # 35

An administrator is tasked with creating a new subnet for a group of VMs that require inbound internet access. Internal private addresses must be obscured to servers on the public internet.

Which network is best suited for satisfying this requirement?

- A. Bastion based network
- B. NAT based network
- C. Layer 2 Stretch network
- D. No-NAT based network

**Answer: B**

Explanation:

NAT Based Network: A NAT-based network is designed to provide inbound and outbound internet access while obscuring the internal private addresses. This setup uses Network Address Translation (NAT) to map internal IP addresses to a public IP address, ensuring that internal addresses are not exposed to the public internet.

Security and Connectivity: NAT provides a layer of security by hiding internal IP addresses and allowing controlled access to external resources. This configuration is well-suited for VMs that need to communicate with servers on the public internet while maintaining the privacy of their internal network addresses.
