You can prepare for the C_BCBAI_2502 with our test products including C_BCBAI_2502 PDF dumps questions, and test preparation software. You can prepare for the C_BCBAI_2502 through practice kits without facing any problem. You can get the desired score for the C_BCBAI_2502 and join the list of our satisfied customers. The C_BCBAI_2502 test questions and preparation material is prepared by highly skilled certified professionals.

SAP Certified Associate - Positioning SAP Business AI Solutions as part of SAP Business Suite Sample Questions (Q29-Q34):

NEW QUESTION # 29

Which of the following are features of the clean core dashboard? Note: There are 2 correct answers to this question.

- A. Customers can use the dashboard in the dev, test, and production tenants
- B. It can be accessed by using SAP For Me
- C. It can be used in all SAP S/4HANA Cloud editions
- D. Customers can grant access to the dashboard to partners

Answer: B,D

Explanation:

The SAP clean core dashboard provides tools to monitor and manage clean core compliance in SAP S/4HANA Cloud environments. The correct answers are "Customers can grant access to the dashboard to partners" and "It can be accessed by using SAP For Me," as these are documented features of the clean core dashboard.

SAP documentation states: "The clean core dashboard in SAP S/4HANA Cloud enables customers to monitor system compliance with clean core principles, ensuring minimal customizations and seamless upgrades. It can be accessed through SAP For Me, providing a centralized interface for system management." Additionally, "customers can grant access to the dashboard to partners," allowing external consultants or service providers to collaborate on maintaining clean core standards. This feature supports "transparent collaboration" and ensures alignment with SAP's extensibility guidelines.

The incorrect options are not features of the clean core dashboard. The dashboard is not explicitly documented as available in "dev, test, and production tenants," as its primary use is in production systems for monitoring live environments. The option "It can be used in all SAP S/4HANA Cloud editions" is incorrect, as the dashboard's availability may vary depending on specific editions (e.g., public vs. private cloud). SAP's clean core strategy documentation confirms the selected features as key capabilities of the dashboard.

NEW QUESTION # 30

Which SAP module focuses on workplace safety and environmental compliance? Please choose the correct answer.

- A. SAP Predictive Analytics
- B. SAP Financial Closing Cockpit
- C. SAP Environment, Health, and Safety (EHS)
- D. SAP Business Network

Answer: C

Explanation:

SAP Environment, Health, and Safety (EHS) is the dedicated module for managing workplace safety and environmental compliance, ensuring organizations meet regulatory and sustainability standards. The correct answer is SAP Environment, Health, and Safety (EHS), as it is explicitly designed for this purpose.

SAP documentation states: "SAP Environment, Health, and Safety (SAP EHS) supports companies in managing workplace safety, environmental compliance, and sustainability initiatives. It helps organizations comply with global regulations, ensure safe working conditions, and track environmental performance." SAP EHS enables companies to "monitor workplace incidents, manage safety protocols, and report on environmental compliance," such as emissions and waste management, to meet regulatory requirements.

For example, it supports "tracking and reporting environmental data" to ensure adherence to standards, aligning with SAP's sustainability-focused solutions.

The incorrect options are unrelated to workplace safety and environmental compliance. SAP Business Network focuses on supplier collaboration and procurement, not safety or compliance. SAP Financial Closing Cockpit is used for financial reporting, not environmental or safety management. SAP Predictive Analytics supports forecasting and trend analysis, not compliance. SAP EHS is the clear choice for this purpose, as confirmed by its role in SAP's sustainability portfolio.

NEW QUESTION # 31

What are the benefits of SAP AI-driven predictive analytics?

There are 3 correct answers to this question.

Response:

- A. Future trend forecasting
- B. Manual invoice processing
- C. Real-time decision-making insights
- D. Increased manual data entry
- E. Automated anomaly detection

Answer: A,C,E

NEW QUESTION # 32

(Which of the following makes SAP a trusted AI partner? Note: There are 3 correct answers to this question.)

- A. Commitment to data protection, privacy, security, and ethics
- B. Affirming the guiding principles of the UNESCO Recommendation on the Ethics of AI
- C. Unparalleled collaborations with leading general-purpose AI technology providers
- D. Unique access to, and understanding of, business data
- E. The AI use case 'Risk Classification & Assessment Process' within the SAP AI Ethics Handbook

Answer: A,B,E

Explanation:

Comprehensive and Detailed Explanation From Exact Extract: SAP is positioned as a trusted AI partner due to its strong commitment to data protection, privacy, security, and ethics, its affirmation of the UNESCO Recommendation on the Ethics of AI, and the inclusion of the 'Risk Classification & Assessment Process' as an AI use case in the SAP AI Ethics Handbook, which ensures structured risk reviews and ethical AI development.

Exact extracts supporting this:

Commitment to data protection, privacy, security, and ethics: "SAP's AI Ethics efforts are guided by a multi-stakeholder approach and a strong governance framework, coordinated by the AI Ethics Office. The approach is based on SAP's Global AI Ethics Policy and development standards for responsible AI innovation... Principles include proportionality and do not harm, safety and security, fairness and non-discrimination, sustainability, right to privacy and data protection, human oversight and determination, transparency and explainability, responsibility and accountability, awareness and literacy, and multistakeholder and adaptive governance and collaboration."sap.com "SAP prioritizes data privacy and security, ensuring customer data remains safeguarded within its ecosystem Customer data is not shared with third-party large language model (LLM) providers for training their models."sap.com Affirming the guiding principles of the UNESCO Recommendation on the Ethics of AI: "Our guiding principles are based on UNESCO's Recommendation on the Ethics of Artificial Intelligence."sap.com "...affirming the 10 guiding principles of the UNESCO Recommendation on the Ethics of Artificial Intelligence. These principles cover proportionality and do no harm, safety and security, fairness and non-discrimination, sustainability, right to privacy and data protection, human oversight and determination, transparency and explainability, responsibility and accountability, awareness and literacy, and multi-stakeholder and adaptive governance and collaboration."news.sap.com "SAP's AI Ethics policy is based on the UNESCO Recommendation on the Ethics of Artificial Intelligence, ensuring human-centered AI systems that respect and augment humans while retaining human oversight."sap.com The AI use case 'Risk Classification & Assessment Process' within the SAP AI Ethics Handbook: "The assessment process enables SAP to conduct a structured review that targets critical AI risks. Our product standard risk management framework helps to ..." "Risk Classification & Assessment Process Flowchart."sap.com "...the establishment of our AI use case 'Risk Classification & Assessment Process' within our AI Ethics Handbook."learning.sap.com Other options are incorrect because:

Option B: While SAP leverages business data responsibly and has understanding through grounding AI in customer data, it does not claim "unique access" as data usage is governed by customer agreements and opt-outs, emphasizing shared rather than exclusive access.

Option D: SAP has collaborations with AI providers like Cohere, Microsoft, and others, but these are described as strategic

partnerships rather than "unparalleled," with focus on ecosystem integration rather than being a primary trust factor in ethics contexts. Reference from Positioning SAP Business AI Solutions as part of SAP Business Suite documents or Study Guide: Derived from the official SAP AI Ethics Handbook and related product pages, as well as the SAP Learning course "Discovering SAP Business AI," which highlights responsible AI practices in positioning SAP Business AI within the SAP Business Suite. The UNESCO affirmation and risk assessment process are key elements in the C_BCBAI_2502 study materials for ethical AI positioning.

NEW QUESTION # 33

(What are the main categories of using AI in Cloud ERP? Note: There are 2 correct answers to this question.)

- A. Profitability optimization
- B. Productivity and efficiency
- C. Process knowledge
- D. Process-related decision optimization

Answer: B,D

Explanation:

Comprehensive and Detailed Explanation From Exact Extract: The main categories of using AI in Cloud ERP are productivity and efficiency, which focus on automating tasks and streamlining workflows, and process-related decision optimization, which involves leveraging AI for better decision-making and outcome predictions in business processes.

Exact extracts supporting this:

"Challenges and benefits of Artificial Intelligence in Cloud ERP can be divided into two main categories: Process-related decision optimization; Productivity and efficiency."learning.sap.com

"These can be divided into two main categories: Process-related decision optimization."learning.sap.com (Implying the second as productivity and efficiency from context.) Other options are incorrect because:

Option C: Process knowledge is not identified as a main category; AI embeds knowledge but categories focus on optimization and efficiency.

Option D: Profitability optimization is a potential outcome but not a primary category; emphasis is on decision and productivity aspects.

Reference from Positioning SAP Business AI Solutions as part of SAP Business Suite documents or Study Guide: From the SAP Learning course "Positioning SAP Business AI," unit "Summarizing Key Solutions of Business AI," and "Understanding SAP Business AI for SAP S/4HANA Cloud," which categorize AI usage in Cloud ERP as decision optimization and productivity/efficiency, supporting positioning within the SAP Business Suite per C_BCBAI_2502 materials.
