## Professional Latest Salesforce-MuleSoft-Developer-I Test Preparation: Salesforce Certified MuleSoft Developer (Mule-Dev-201)

Our Salesforce-MuleSoft-Developer-I training quiz is the top selling products in the market. You will save a lot of preparation troubles if you purchase our Salesforce-MuleSoft-Developer-I study materials. Our Salesforce-MuleSoft-Developer-I exam braindumps are highly similar to the real test. Almost all questions of the real exam will be predicated accurately in our Salesforce-MuleSoft-Developer-I Practice Questions, which can add you passing rate of the exam. And you will find that our prices for the exam products are quite favorable.

### Salesforce Salesforce-MuleSoft-Developer-I Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"> <li>Transforming Data with DataWeave: It involves writing DataWeave scripts and using DataWeave functions. This topic also includes defining and using DataWeave variables, functions, and modules, and applying correct syntax.</li> </ul>
Topic 2	<ul style="list-style-type: none"> <li>Creating Application Networks: The topic of creating Application Networks encompasses understanding MuleSoft's proposal for closing the IT delivery gap and describing the role and characteristics of the modern API. It also includes the purpose and roles of a Center for Enablement (C4E), and the benefits of API-led.</li> </ul>
Topic 3	<ul style="list-style-type: none"> <li>Structuring Mule Applications: Structuring Mule applications covers parameterizing an application and defining and reusing global configurations. It includes breaking an application into multiple flows using private flows, subflows, and the Flow Reference component.</li> </ul>
Topic 4	<ul style="list-style-type: none"> <li>Processing Records: Processing records includes methods for processing individual records in a collection and explaining how Mule events are processed by the For Each scope. It also involves using the Batch Job with Batch Steps and a Batch Aggregator.</li> </ul>
Topic 5	<ul style="list-style-type: none"> <li>Handling Errors: Handling errors includes describing default error handling in Mule applications and defining custom global default error handlers. It involves comparing On Error Continue and On Error Propagate scopes, creating error handlers for a flow, using the Try scope, and mapping errors to custom application errors.</li> </ul>
Topic 6	<ul style="list-style-type: none"> <li>Routing Events: It focuses on using the Choice router for conditional logic and the Scatter-Gather router to multicast events. This topic also involves validating data by using the Validation module.</li> </ul>
Topic 7	<ul style="list-style-type: none"> <li>Building API Implementation Interfaces: This topic involves manually creating a RESTful interface for a Mule application and generating a REST Connector from a RAML specification. It also includes describing the features and benefits of APIkit.</li> </ul>
Topic 8	<ul style="list-style-type: none"> <li>Accessing and Modifying Mule Events: It describes the Mule event data structure. Moreover, the topic focuses on usage of transformers and enriching Mule events.</li> </ul>
Topic 9	<ul style="list-style-type: none"> <li>Using Connectors: It focuses on retrieving data from REST services using HTTP Request or REST Connector. Moreover, the topic covers using a Web Service Consumer connector for SOAP web services and the Transform Message component.</li> </ul>
Topic 10	<ul style="list-style-type: none"> <li>Debugging and Troubleshooting Mule Applications: Using breakpoints to inspect a Mule event during runtime, installing missing Maven dependencies, and reading and deciphering Mule log error messages are sub-topics of this topic.</li> </ul>
Topic 11	<ul style="list-style-type: none"> <li>Designing APIs: Designing APIs involves describing the lifecycle of the modern API and using RAML to define various aspects of an API. It includes identifying when to use query parameters vs URI parameters, and defining API parameters.</li> </ul>

## Salesforce Certified MuleSoft Developer (Mule-Dev-201) Sample Questions (Q115-Q120):

### NEW QUESTION # 115

Refer to the exhibits. In the color flow , both the variable named color and payload are set to "red".

An HTTP POST request is then sent to the decideColor flow's HTTP Listener.

What is the payload value at the Logger component after the HTTP request completes?

□

- A. blue
- B. red
- C. Error message
- D. white

**Answer: A**

### NEW QUESTION # 116

Refer to the exhibits.

□ What payload and quantity are toggled at the end of the main flow?

- A. [[1,2,3,4], 10]
- B. [order1order2order3order4, 14]
- C. [[order1, order2, order3, order4], 14]
- D. [[1,2,3,4],14]

**Answer: D**

### NEW QUESTION # 117

Refer to the exhibits.

□

The Validation component in the Try scope throws an error.

What response message is returned to a client request to the main flow's HTTP Listener?

The Validation component in the Try scope throws an error. What response message is returned to a client request to the main flow's HTTP Listener?

- A. Success - main flow
- B. Error - main flow
- C. Validation Error
- D. Error - Try scope

**Answer: A**

Explanation:

Note that private flow has error scope defined as On Error Continue . So when error occurs in private flow , it is handled by this On Error Continue scopewhich sends success response back to main flow and does not throw back an error. So main continues normally and payload is set to Success - main flow.

Hence correct answer is Success - main flow

1) HTTP listener received request

2) The Flow Referencecalls the child flow

3) The Is Number validator creates an Error Object because the payload isn't an integer. Child Flow execution stops

#[error.description] = "payload is not a valid INTEGER value"

#[error.errorType] = VALIDATION:INVALID\_NUMBER

4) The OnError Continue handles the errorThe payload is set to "Error - Sub Flow"

5) "Error - Sub Flow" is returned to the main flow as if the child flow was a success. The Set Payload is executed. The payload is reset to "Success - Finished Main Flow"

6) "Success- Main Flow" is returned to the requestor in the body of the HTTP request. HTTP Status Code:

200

As you can see, in the above example, because the error was caught by an On Error Continue scope in the child flow (RED in, GREEN out) when the Mule Message returns to the parent flow, the parent flow knows none-the-different that there was a failure

because the on error continue returns a 200 success message. Note that because, to the mainFlow, the childFlow appeared to succeed, the processing of mainFlow resumed after the flow reference.

### NEW QUESTION # 118

Refer to the exhibits. In the color flow , both the variable named color and payload are set to "red".

An HTTP POST request is then sent to the decideColor flow's HTTP Listener.

What is the payload value at the Logger component after the HTTP request completes?

□

- A. blue
- B. red
- C. Error message
- D. white

**Answer: A**

### NEW QUESTION # 119

An API has been created in Design Center. What is the next step to make the API discoverable?

- A. Publish the API from inside flow designer
- B. Publish the API to Anypoint Exchange
- C. Deploy the API to a Maven repository
- D. Enable autodiscovery in API Manager

**Answer: B**

Explanation:

Correct answer is Publish the API to Anypoint Exchange

Anypoint Exchange makes this possible by making it discoverable in below ways

- 1) In private exchange for internal developers
- 2) In a public portal for external developers/clients

Here is diagram created by me to help you understand sequence:

□

### NEW QUESTION # 120

.....

If you still spend a lot of time studying and waiting for Salesforce-MuleSoft-Developer-I qualification examination, then you need our Salesforce-MuleSoft-Developer-I test prep, which can help solve all of the above problems. I can guarantee that our study materials will be your best choice. Our Salesforce-MuleSoft-Developer-I valid practice questions have three different versions, including the PDF version, the software version and the online version, to meet the different needs, our Salesforce-MuleSoft-Developer-I Study Materials have many advantages, and you can free download the demo of our Salesforce-MuleSoft-Developer-I exam questions to have a check.
