We ensure you that if you can't pass the exam just one time by using CCDAK training materials of us, and we will give you full refund. And the money will be returned to your payment account. In addition, CCDAK exam braibdumps are high-quality and accuracy, and they can help you pass the exam successfully. In order to build up your confidence for CCDAK Exam Materials, we are pass guarantee and money back guarantee, so you don't need to worry you will waste your money. We offer you free update for one year for CCDAK training materials, and our system will send update version to your email automatically.

The CCDAK certification exam covers a wide range of topics related to Kafka development, including Kafka basics, cluster setup, producer and consumer development, Kafka Streams, and Kafka Connect. CCDAK exam is designed to test a developer's ability to design, develop, and deploy Kafka-based applications using best practices and industry standards. CCDAK exam is divided into multiple sections, each focusing on a specific area of Kafka development. CCDAK exam requires a deep understanding of Kafka and its related technologies, making it a valuable certification for developers who are interested in building and maintaining Kafka-based applications.

To prepare for the CCDAK certification exam, Confluent offers a range of training courses and resources, including instructor-led training, online courses, and practice exams. These resources can help developers to gain the knowledge and skills necessary to pass the exam and earn their CCDAK Certification. Overall, the CCDAK certification exam is a valuable tool for Kafka developers looking to validate their skills and demonstrate their expertise in the field.

Confluent CCDAK (Confluent Certified Developer for Apache Kafka Certification Examination) is a certification exam designed to test the skills and knowledge of developers who work with Apache Kafka. CCDAK exam is based on a set of industry-standard best practices and is designed to validate the skills of developers who work with Kafka. CCDAK exam is designed to be challenging, but fair, and is intended to provide a reliable measure of a developer's ability to work with Kafka.

## Quiz 2026 Confluent CCDAK: Confluent Certified Developer for Apache Kafka Certification Examination Updated New Test Labs

Our company according to the situation reform on conception, question types, designers training and so on. Our latest CCDAK exam torrent was designed by many experts and professors. You will have the chance to learn about the demo for if you decide to use our CCDAK quiz prep. We can sure that it is very significant for you to be aware of the different text types and how best to approach them by demo. At the same time, our CCDAK Quiz torrent has summarized some features and rules of the cloze test to help customers successfully pass their exams.

### Confluent Certified Developer for Apache Kafka Certification Examination Sample Questions (Q219-Q224):

#### NEW QUESTION # 219

Your application is consuming from a topic with one consumer group.

The number of running consumers is equal to the number of partitions.

Application logs show that some consumers are leaving the consumer group during peak time, triggering a rebalance. You also notice that your application is processing many duplicates.

You need to stop consumers from leaving the consumer group.

What should you do?

- A. Split consumers in different consumer groups.
- **B. Increase `session.timeout.ms` property.**
- C. Add more consumer instances.
- D. Reduce `max.poll.records` property.

**Answer: B**

Explanation:

If the consumer fails to send heartbeats in time (due to being slow under load), it is considered dead, causing a rebalance. Increasing `session.timeout.ms` gives the consumer more time to process messages and send heartbeats, preventing premature removal.

From Kafka Docs > Heartbeats and Failures:

"If the consumer does not send a heartbeat in `session.timeout.ms`, it is considered dead and the group coordinator will trigger a rebalance." Reducing `max.poll.records` might slow consumption further. More consumers won't help since each partition already has a dedicated consumer.

Reference: Apache Kafka Consumer Configs > `session.timeout.ms`

#### NEW QUESTION # 220

You have a Kafka consumer in production actively reading from a critical topic.

You need to update the offset of your consumer to start reading from the beginning of the topic.

Which action should you take?

- A. Temporarily configure the topic's `retention.ms` parameter to 0 to empty the topic.
- **B. Update the consumer group's offset to the earliest position using the `kafka-consumer-groups` CLI tool.**
- C. Update the consumer configuration by setting `auto.offset.reset=earliest`.
- D. Start a new consumer application with the same consumer group id.

**Answer: B**

Explanation:

To reset offsets for an existing consumer group, you must use the `kafka-consumer-groups.sh` tool with the `--reset-offsets` and `--to-earliest` flags.

From Kafka Consumer Group Tool Documentation:

"You can use the `kafka-consumer-groups` tool to reset offsets for a consumer group. This is required if the consumer has already committed offsets."

\* Setting `auto.offset.reset=earliest` only works if no committed offset exists.

\* Starting a new consumer with the same group won't reset offsets.

\* Retention settings don't affect committed offsets.  
Reference:Kafka Consumer Group CLI Tool

#### NEW QUESTION # 221

In Kafka, every broker... (select three)

- A. is a controller
- B. knows the metadata for the topics and partitions it has on its disk
- C. contains only a subset of the topics and the partitions
- D. contains all the topics and all the partitions
- E. knows all the metadata for all topics and partitions
- F. is a bootstrap broker

Answer: C,E,F

Explanation:

Kafka topics are divided into partitions and spread across brokers. Each brokers knows about all the metadata and each broker is a bootstrap broker, but only one of them is elected controller

#### NEW QUESTION # 222

Kafka is configured with following parameters - log.retention.hours = 168 log.retention.minutes = 168 log.retention.ms = 168 How long will the messages be retained for?

- A. 168 minutes
- B. 168 hours
- C. Broker will not start due to bad configuration
- D. 168 ms

Answer: D

Explanation:

If more than one similar config is specified, the smaller unit size will take precedence.

#### NEW QUESTION # 223

Which KSQL queries write to Kafka?

- A. CREATE STREAM WITH <topic> and CREATE TABLE WITH <topic>
- B. COUNT and JOIN
- C. SHOW STREAMS and EXPLAIN <query> statements
- D. CREATE STREAM AS SELECT and CREATE TABLE AS SELECT

Answer: A,D

Explanation:

SHOW STREAMS and EXPLAIN <query> statements run against the KSQL server that the KSQL client is connected to. They don't communicate directly with Kafka. CREATE STREAM WITH <topic> and CREATE TABLE WITH <topic> write metadata to the KSQL command topic. Persistent queries based on CREATE STREAM AS SELECT and CREATE TABLE AS SELECT read and write to Kafka topics. Non-persistent queries based on SELECT that are stateless only read from Kafka topics, for example SELECT \* FROM foo WHERE. Non-persistent queries that are stateful read and write to Kafka, for example, COUNT and JOIN. The data in Kafka is deleted automatically when you terminate the query with CTRL-C.

#### NEW QUESTION # 224

.....

These formats are Confluent PDF Questions and practice test software. The Confluent Certified Developer for Apache Kafka Certification Examination CCDAK practice exam software is further divided into two formats. The name of these two formats is

Confluent CCDAK desktop practice test software and web-based Confluent CCDAK practice test software. Both Confluent CCDAK practice test software is the CCDAK Practice Exam that will give you a real-time CCDAK exam preparation environment to solve all Confluent Certified Developer for Apache Kafka Certification Examination CCDAK questions. With the Confluent CCDAK practice test software you can understand your weak topic areas. Later on, working on these Confluent CCDAK weak topic areas you can make it perfect.
