With our Salesforce-MuleSoft-Developer-I exam questions, you can adjust yourself to the exam speed and stay alert according to the time-keeper that we set on our Salesforce-MuleSoft-Developer-I training materials. Therefore, you can trust on our products for this effective simulation function will eventually improve your efficiency and assist you to succeed in the Salesforce-MuleSoft-Developer-I Exam. If you are ready, the Salesforce-MuleSoft-Developer-I exam will just be a piece of cake in front of you. And our Salesforce-MuleSoft-Developer-I exam questions are the right tool to help you get ready.

Salesforce Salesforce-MuleSoft-Developer-I Exam Syllabus Topics:

Topic	Details
Topic 1	Accessing and Modifying Mule Events: It describes the Mule event data structure. Moreover, the topic focuses on usage of transformers and enriching Mule events.
Topic 2	Transforming Data with DataWeave: It involves writing DataWeave scripts and using DataWeave functions. This topic also includes defining and using DataWeave variables, functions, and modules, and applying correct syntax.
Topic 3	Creating Application Networks: The topic of creating Application Networks encompasses understanding MuleSoft's proposal for closing the IT delivery gap and describing the role and characteristics of the modern API. It also includes the purpose and roles of a Center for Enablement (C4E), and the benefits of API-led.
Topic 4	Debugging and Troubleshooting Mule Applications: Using breakpoints to inspect a Mule event during runtime, installing missing Maven dependencies, and reading and deciphering Mule log error messages are sub-topics of this topic.
Topic 5	Structuring Mule Applications: Structuring Mule applications covers parameterizing an application and defining and reusing global configurations. It includes breaking an application into multiple flows using private flows, subflows, and the Flow Reference component.
Topic 6	Handling Errors: Handling errors includes describing default error handling in Mule applications and defining custom global default error handlers. It involves comparing On Error Continue and On Error Propagate scopes, creating error handlers for a flow, using the Try scope, and mapping errors to custom application errors.

Pass Guaranteed 2026 Salesforce First-grade Salesforce-MuleSoft-Developer-I: Exam Salesforce Certified MuleSoft Developer (Mule-Dev-201) Guide Materials

Citing an old saying as "Opportunity always favors the ready minds". In the current era of rocketing development of the whole society, it's easy to be eliminated if people have just a single skill. Our Salesforce-MuleSoft-Developer-I learning materials will aim at helping every people fight for the Salesforce-MuleSoft-Developer-I certificate and help develop new skills. Our professionals have devoted themselves to compiling the Salesforce-MuleSoft-Developer-I exam questions for over ten years and you can trust us for sure.

Salesforce Certified MuleSoft Developer (Mule-Dev-201) Sample Questions (Q180-Q185):

NEW QUESTION # 180

Refer to the exhibits. The Set Payload transformer in the addItem child flow uses DataWeave to create an order object.

What is the correct DataWeave code for the Set Payload transformer in the createOrder flow to use the addItem child flow to add a router call with the price of 100 to the order?

- A. `lookup( "addItem", { price: "100", item: "router", itemType: "cable" } )`
- **B. `lookup( "addItem", { payload: { price: "100", item: "router", itemType: "cable" } } > )`**
- C. `addItem( { payload: { price: "100", item: "router", itemType: "cable" } } > )`
- D. `addItem( { price: "100", item: "router", itemType: "cable" } )`

Answer: B

NEW QUESTION # 181

Refer to the exhibit.

What is the output payload in the On Complete phase

- **A. summary statistics with NO record data**
- B. The records processed by all batch steps: [StepTwostepOne1, stepTwostepOne2, StepTwoStepOne3]
- C. The original payload: [1,2,3]
- D. The records processed by the last batch step: [StepTwo1, StepTwo2, StepTwo3]

Answer: A

Explanation:

This is a tricky question. On complete phase payload consists of summary of records processed which gives insight on which records failed or passed. Hence option 4 is correct answer MuleSoft Documentation Reference : <https://docs.mulesoft.com/mule-runtime/4.3/batch-processing-concept#on-complete>

NEW QUESTION # 182

Which one of them is NOT a flow in Mule?

- A. async flow
- B. sync flow
- **C. async sub flow**
- D. subflow

Answer: C

Explanation:

Correct answer is async sub flow. Rest are valid flows in Mule.

Sub flow is always synchronous.

NEW QUESTION # 183

What is not the function of API Gateway ?

- A. Meter the traffic flowing through
- **B. Specify throttling , security and other policies**
- C. Determine which traffic is authorized to pass through the API to backend services
- D. Logs all transactions , collecting and tracking analytics data

Answer: B

Explanation:

Correct answer is Specify throttling , security and other policies

MuleSoft Doc Ref : <https://docs.mulesoft.com/api-manager/2.x/api-gateway-capabilities-mule4> API Gateway is responsible for below functions.

- 1) Determine which traffic is authorized
- 2) Meter the traffic
- 3) Logs transaction
- 4) Apply throttling and other policies (Not specifying. These are specified in API Manager)

NEW QUESTION # 184

Refer to the exhibits. The Mule application does NOT define any global error handlers.

A web client sends a POST request to the Mule application with this input payload. The File Write operation throws a FILE: CONNECTIVITY error.

What response message is returned to the web client?

- A. "File written"
- B. "FILE: CONNECTMTV"
- **C. "ORDER: NOT CREATED"**
- D. "OTHER ERROR"

Answer: C

NEW QUESTION # 185

.....
