

practice material. Preparing with real JN0-452 exam questions is one of the finest strategies for cracking the exam in one go. Students who study with JN0-452 Real Questions are more prepared for the exam, increasing their chances of succeeding. The JN0-452 exam preparation calls for a strong preparation and precise Juniper JN0-452 practice material.

Juniper Mist AI Wireless, Specialist (JNCIS-MistAI-Wireless) Sample Questions (Q55-Q60):

NEW QUESTION # 55

Which of these is a proactive troubleshooting capability of Marvis?

- A. Automatically identifying and reporting systemic network issues, like a site-wide DHCP failure, often before users are impacted.
- B. Allowing an administrator to run a packet capture for a specific client.
- C. Displaying the event log for a client after a user reports a problem.
- D. Listing all the APs at a site.

Answer: A

NEW QUESTION # 56

Your customer added an Apple TV in their conference room so that employees can easily share their screen.

However, the Apple TV cannot be discovered by the employees' devices.

Which two settings are causing the problem? (Choose two.)

- A. MDNS
- B. Ignore Broadcast SSID Probe Requests
- C. ARP
- D. Broadcast/Multicast

Answer: A,D

Explanation:

If a customer added an Apple TV in their conference room so that employees can easily share their screen but the Apple TV cannot be discovered by the employees' devices, two settings that could be causing this problem are MDNS and Broadcast/Multicast. So the correct answers are A. MDNS and B. Broadcast /Multicast.

NEW QUESTION # 57

You want to verify that DHCP is working as expected on a WLAN that currently has no clients. In this scenario, which Marvis feature would you use to accomplish this task?

- A. Marvis Query Language
- B. Marvis Minis
- C. Marvis Virtual Network Assistant
- D. Marvis Actions

Answer: B

Explanation:

In a traditional wireless environment, verifying the functionality of network services like DHCP, DNS, or captive portals requires a physical presence at the site or an active client to report telemetry. However, the Marvis Minis feature within the Juniper Mist AI ecosystem is specifically designed to solve the problem of "empty site" verification. Marvis Minis act as Digital Twins-virtualized client agents that reside directly on the Mist Access Points (APs).

Because they are integrated into the AP firmware, Marvis Minis can simulate client behavior without requiring any actual user devices to be connected to the WLAN. When an administrator wants to verify that DHCP is working on a specific SSID, Marvis Minis perform automated "synthetic testing." The virtual client will attempt to associate with the WLAN, complete the 802.11 authentication/association process, and then request an IP address via DHCP. If the DHCP server is unreachable, the pool is exhausted, or the response is too slow, Marvis Minis will detect this failure and report it to the Mist Cloud.

This proactive validation is part of Mist's "Always-On" network testing strategy. While Marvis Actions (D) would eventually report a

DHCP failure once real clients started failing, and Marvis Query Language (C) could be used to search for historical failures, only Marvis Minis (B) can actively test and verify the service in a scenario where there are currently no clients. This allows engineers to identify and fix "sleeping" issues- such as a misconfigured VLAN on a switch port or a downed DHCP server-before the first user even walks into the building, ensuring a "validated" network state at all times.

NEW QUESTION # 58

What are basic data rates?

- A. optional data rates
- **B. required data rates**
- C. fastest data rates
- D. disabled data rates

Answer: B

NEW QUESTION # 59

An administrator is configuring a WPA3-Personal WLAN and wants to ensure the highest level of security against password guessing attacks.

Which underlying authentication mechanism is mandatory for WPA3-Personal and provides this protection?

- **A. Simultaneous Authentication of Equals (SAE)**
- B. Extensible Authentication Protocol (EAP)
- C. Opportunistic Key Caching (OKC)
- D. Temporal Key Integrity Protocol (TKIP)

Answer: A

NEW QUESTION # 60

.....

In the present market you are hard to buy the valid JN0-452 study materials which are used to prepare the JN0-452 exam like our JN0-452 latest question. Both for the popularity in the domestic and the international market and for the quality itself, other kinds of study materials are incomparable with our JN0-452 Test Guide and far inferior to them. Our JN0-452 certification tool has their own fixed clients base in the domestic market and have an important share in the international market to attract more and more foreign clients.

JN0-452 Valid Test Experience: https://www.getcertkey.com/JN0-452_braindumps.html

Why not let our Getcertkey JN0-452 Valid Test Experience to help you, How long is my JN0-452 product valid, Juniper Exam Questions JN0-452 Vce Everyday attention from experts, We treat it as our blame if you accidentally fail the JN0-452 Valid Test Experience - Mist AI Wireless, Specialist (JNCIS-MistAI-Wireless) exam and as a blot to our responsibility, Our website offers the most reliable and accurate JN0-452 exam dumps for you, Therefore, with the help of these experts, the contents of JN0-452 exam questions must be the most advanced and close to the real exam.

Be sure you are familiar with each of the topics JN0-452 in the exam objectives listed below, In this circumstance, as long as your propose and demand on JN0-452 guide quiz are rational, we have the duty to guarantee that you can enjoy the one-year updating system for free.

High-quality Exam Questions JN0-452 Vce & Passing JN0-452 Exam is No More a Challenging Task

Why not let our Getcertkey to help you, How long is my JN0-452 product valid, Everyday attention from experts, We treat it as our blame if you accidentally fail the Mist AI Wireless, Specialist (JNCIS-MistAI-Wireless) exam and as a blot to our responsibility.

Our website offers the most reliable and accurate JN0-452 exam dumps for you.
