# Use Lead2Passed Palo Alto Networks PSE-Cortex-Pro-24 Desktop Practice Exam Software Without Internet

What's more, part of that Lead2Passed PSE-Cortex-Pro-24 dumps now are free: https://drive.google.com/open?id=1RKcNT9FWzRfu0cVRuBmw0T3DEAV375MK

If you are finding a study material to prepare your exam, our material will end your search. Our PSE-Cortex-Pro-24 exam torrent has a high quality that you can't expect. I think our Palo Alto Networks Systems Engineer Professional - Cortex prep torrent will help you save much time, and you will have more free time to do what you like to do. I can guarantee that you will have no regrets about using our PSE-Cortex-Pro-24 Test Braindumps When the time for action arrives, stop thinking and go in, try our PSE-Cortex-Pro-24 exam torrent, you will find our products will be a very good choice for you to pass your exam and get you certificate in a short time.

To keep up with the newest regulations of the PSE-Cortex-Pro-24 exam, our experts keep their eyes focusing on it. Our PSE-Cortex-Pro-24 exam torrent are updating according to the precise of the real exam. Our PSE-Cortex-Pro-24 test prep to help you to conquer all difficulties you may encounter. Once you choose our PSE-Cortex-Pro-24 Quiz torrent, we will send the new updates for one year long, which is new enough to deal with the exam for you and guide you through difficulties in your exam preparation.

PSE-Cortex-Pro-24 Valid Vce | PSE-Cortex-Pro-24 Valid Torrent

The top personal and professional Palo Alto Networks PSE-Cortex-Pro-24 certification exam benefits are recognition of skills, updated knowledge, more career opportunities, instant promotion, and increase in salary, etc. If your answer is yes first of all you have to enroll in the Palo Alto Networks Systems Engineer Professional - Cortex (PSE-Cortex-Pro-24) certification exam and put all your efforts to pass this career advancement certification exam. Are you looking for the right and recommended way to pass the Palo Alto Networks PSE-Cortex-Pro-24 exam?

Palo Alto Networks Systems Engineer Professional - Cortex Sample Questions (Q116-Q121):

NEW QUESTION # 116
What must a customer deploy prior to collecting endpoint data in Cortex XSIAM?

- A. XDR agent
- B. External dynamic list
- C. Broker VM
- D. Playbook

Answer: A

Explanation:
25 web pages
As a Palo Alto Cortex Professional, I'll provide a detailed explanation for Question 118: What must a customer deploy prior to collecting endpoint data in Cortex XSIAM? along with the reasoning and references based on Palo Alto Networks' official documentation and product knowledge.
C: XDR Agent
Cortex XSIAM (Extended Security Intelligence and Automation Management) is an AI-driven security operations platform designed to centralize and automate security operations across an enterprise, including endpoint, network, cloud, and identity data. To collect endpoint data specifically, Cortex XSIAM relies on the Cortex XDR Agent, which is a lightweight software component installed on endpoints (such as laptops, desktops, or servers). This agent is responsible for gathering telemetry data, monitoring endpoint activity, and enforcing security policies, which are then sent to the Cortex XSIAM cloud for analysis, detection, and response.
Here's why the XDR Agent is the correct choice and why the other options do not apply:
Option A: Playbook
* Explanation: A playbook in Cortex XSIAM (or its predecessor, Cortex XSOAR) is a predefined workflow that automates incident response tasks, such as investigating alerts or remediating threats.
While playbooks are critical for automation and orchestration, they are not involved in the initial collection of endpoint data. Playbooks operate on data that has already been collected and ingested into the system. Therefore, deploying a playbook is not a prerequisite for collecting endpoint data.
* Conclusion: Incorrect.
Option B: Broker VM
* Explanation: The Broker VM is an optional component in the Cortex ecosystem that can be deployed to enhance connectivity and functionality, such as acting as a proxy for endpoints to communicate with the Cortex cloud, collecting logs, or running additional services. While it can facilitate data forwarding or log collection in certain scenarios (e.g., from third-party sources), it is not a mandatory requirement for collecting endpoint data directly from devices managed by Cortex XSIAM. The XDR Agent can communicate with the Cortex cloud independently without a Broker VM.
* Conclusion: Incorrect.
Option C: XDR Agent
* Explanation: The Cortex XDR Agent is the core component required to collect endpoint data in Cortex XSIAM. It is installed on supported endpoints (e.g., Windows, macOS, Linux, or Android devices) and performs several key functions:
* Data Collection: Gathers detailed telemetry, including process execution, file activity, network connections, and system events.
* Prevention: Blocks exploits, malware, and fileless attacks using AI-driven techniques.
* Detection and Response: Provides real-time data to the Cortex cloud for advanced analytics and incident investigation. Without the XDR Agent deployed on endpoints, Cortex XSIAM cannot collect the necessary data to monitor, detect, or respond to endpoint-based threats. This makes it the essential prerequisite for endpoint data collection.
* Conclusion: Correct.
Option D: External Dynamic List (EDL)
* Explanation: An External Dynamic List (EDL) is a feature in Palo Alto Networks' ecosystem used to import and manage dynamic lists of indicators (e.g., IP addresses, URLs, or domains) for use in security policies or threat intelligence. While EDLs can enhance threat detection by providing additional context, they are not involved in the process of collecting endpoint data. They are a supplementary tool rather than a requirement for data collection.
* Conclusion: Incorrect.
References from Palo Alto Networks:
* Cortex XSIAM Datasheet (Palo Alto Networks):
* "Cortex XSIAM unifies best-in-class security operations functions, including Endpoint Detection and Response (EDR)... The platform leverages the Cortex XDR Agent to prevent endpoint attacks and collect full telemetry for detection and response."
* This highlights the XDR Agent's role as the mechanism for endpoint data collection.
* Cortex XSIAM Solution Brief (Palo Alto Networks):
* "XSIAM requires the deployment of the XSIAM Endpoint Agent to appropriate and compatible endpoints to collect telemetry and enforce security."
* This directly ties the agent to the data collection process.
* Cortex XDR Agent Documentation (Palo Alto Networks Cortex Documentation Portal):
* The agent is described as "a lightweight agent that stops threats with Behavioral Threat Protection, AI, and cloud-based analysis while collecting endpoint telemetry for extended detection and response."
* Available at: docs-cortex.paloaltonetworks.com.
* What is Cortex XSIAM? (Palo Alto Networks Website):
* "Endpoint Protection Platform (EPP): Prevents endpoint attacks with a proven endpoint agent that blocks exploits, malware, and fileless attacks and collects full telemetry for detection and response."
* This reinforces the agent's foundational role in endpoint data collection.

NEW QUESTION # 117
Which task setting allows context output to a specific key?

- A. stop on errors
- B. extend context
- C. lags
- D. task output

Answer: B

Explanation:
Reference: https://xsoar.pan.dev/docs/integrations/context-and-outputs

NEW QUESTION # 118
Which process in the causality chain does the Cortex XDR agent identify as triggering an event sequence?

- A. The causality group owner
- B. the relevant shell
- C. the chain's alert initiator
- D. the adversary's remote process

Answer: A

NEW QUESTION # 119
What is a benefit of user entity behavior analytics (UEBA) over security information and event management (SIEM)?

- A. UEBA can add trusted signers of Windows or Mac processes to a whitelist in the Endpoint Security Manager (ESM) Console.
- B. SIEMs supports only agentless scanning, not agent-based workload protection across VMs, containers /Kubernetes.
- C. SIEMs have difficulty detecting unknown or advanced security threats that do not involve malware, such as credential theft.
- D. UEBA establishes a secure connection in which endpoints can be routed, and it collects and forwards logs and files for analysis.

Answer: C

NEW QUESTION # 120
A customer is hesitant to directly connect their network to the Cortex platform due to compliance restrictions.
Which deployment method should the customer use to ensure secure connectivity between their network and the Cortex platform?

- A. Syslog collector
- B. Windows Event Collector
- C. Elasticsearch
- D. Broker VM

Answer: D

Explanation:
To ensure secure connectivity between the customer's network and the Cortex platform while adhering to compliance restrictions, the customer should use the Broker VM. The Broker VM acts as a secure intermediary between the local network and the Cortex platform, allowing for controlled and encrypted communication without directly exposing the network to the platform.

NEW QUESTION # 121
......

Our PSE-Cortex-Pro-24 study guide provides free trial services, so that you can learn about some of our topics and how to open the software before purchasing. During the trial period of our PSE-Cortex-Pro-24 study materials, the PDF versions of the sample questions are available for free download, and both the pc version and the online version can be illustrated clearly. You can contact us at any time if you have any difficulties in the purchase or trial process of our PSE-Cortex-Pro-24 Exam Dumps.

PSE-Cortex-Pro-24 Valid Vce: https://www.lead2passed.com/Palo-Alto-Networks/PSE-Cortex-Pro-24-practice-exam-dumps.html

Palo Alto Networks Latest Test PSE-Cortex-Pro-24 Discount As you know, the first-classs quality always come with the first service, We do not store credit card or personal identification information on our servers beyond your email address and Lead2Passed PSE-Cortex-Pro-24 Valid Vce account information, Test-oriented PSE-Cortex-Pro-24 Valid Vce - Palo Alto Networks Systems Engineer Professional - Cortex valid exam torrent, Contrast with other exam questions, PSE-Cortex-Pro-24 dumps PDF: Palo Alto Networks Systems Engineer Professional - Cortex provides various different versions to meet your different demands.

So, I can have the following:`, They are a professional who PSE-Cortex-Pro-24 assist designs, recognizes, manages, the organization's security system, to maintain the best business environment.

As you know, the first-classs quality always come with the first service, PSE-Cortex-Pro-24 Free Braindumps We do not store credit card or personal identification information on our servers beyond your email address and Lead2Passed account information.

Palo Alto Networks PSE-Cortex-Pro-24 Questions: [2026] To Pass Exam On the 1st Attempt

Test-oriented Palo Alto Networks Systems Engineer Professional - Cortex valid exam torrent, Contrast with other exam questions, PSE-Cortex-Pro-24 Dumps PDF: Palo Alto Networks Systems Engineer Professional - Cortex provides various different versions to meet your different demands.

Hope you can have a great experience each time.
