Cloud Security Alliance CCSK exam include all the important concepts leaving behind the stories to tell for some other time. For the complete and quick Cloud Security Alliance CCSK preparation the Cloud Security Alliance CCSK Exam Questions are the best study material. With Cloud Security Alliance CCSK Exam Practice test questions you can ace your Cloud Security Alliance CCSK exam preparation simply and quickly to pass the final CCSK exam easily.

Achieving the CCSK Certification can be a significant career milestone for individuals working in the cloud computing industry. It demonstrates a high level of expertise and knowledge in cloud security, which is increasingly important as more organizations adopt cloud technologies. Certificate of Cloud Security Knowledge v5 (CCSKv5.0) certification is recognized globally and can help individuals stand out in a competitive job market.

If you have bought our CCSK exam braindumps, you will find that we have added new functions to add your exercises. The system of our CCSK guide materials will also be updated. In short, the new version of our CCSK training engine will change a lot. What is more, we will offer you free new version if you have purchased our CCSK training engine before. Since that we promise that you can enjoy free updates for one year after your purchase.

Cloud Security Alliance Certificate of Cloud Security Knowledge v5 (CCSKv5.0) Sample Questions (Q134-Q139):

NEW QUESTION # 134

Identifying the specific threats against servers and determine the effectiveness of existing security controls in counteracting the threats. is known as:

- A. Risk Assessment
- B. Risk Mitigation
- **C. Risk Management**
- D. Risk Determination

Answer: C

Explanation:

like this, which has similar-looking answers should be carefully answered Risk Management is overall process which covers from identifying threats to ultimately review the effectiveness of the controls.

NEW QUESTION # 135

What are the primary security responsibilities of the cloud provider in compute virtualizations?

- A. Enforce isolation and monitor and log workloads
- B. Enforce isolation and configure the security settings
- C. Monitor and log workloads and configure the security settings
- D. Maintain a secure virtualization infrastructure and configure the security settings
- **E. Enforce isolation and maintain a secure virtualization infrastructure**

Answer: E

NEW QUESTION # 136

What is the primary purpose of Identity and Access Management (IAM) systems in a cloud environment?

- A. To encrypt data to ensure its confidentiality
- **B. To govern identities' access to resources in the cloud**
- C. To provide a backup solution for cloud data
- D. To monitor network traffic for suspicious activity

Answer: B

Explanation:

The primary purpose of Identity and Access Management (IAM) systems in a cloud environment is to govern and control which identities (users, groups, or services) have access to which resources within the cloud. IAM systems ensure that only authorized users and services can access specific cloud resources, and they help enforce security policies such as least privilege access, role-based access control (RBAC), and multi-factor authentication (MFA).

NEW QUESTION # 137

What is the primary function of a Load Balancer Service in a Software Defined Network (SDN) environment?

- A. To encrypt data for secure transmission
- B. To create isolated virtual networks
- C. To monitor network performance and activity
- **D. To distribute incoming network traffic across multiple destinations**

Answer: D

Explanation:

The correct answer is C. To distribute incoming network traffic across multiple destinations.

A Load Balancer Service in an SDN environment is responsible for efficiently distributing network traffic across multiple servers or instances. This ensures high availability, reliability, and optimized resource usage.

Key Functions:

* Traffic Distribution: Balances incoming requests to various servers based on predefined algorithms (round-robin, least connections,

etc.).

* High Availability: Prevents server overload and reduces downtime by distributing workload.

* Scalability: Automatically adjusts as the number of requests or available resources changes.

* Health Monitoring: Continually checks server availability and responsiveness to avoid directing traffic to non-responsive instances.

Why Other Options Are Incorrect:

* A. Isolated virtual networks: Creating isolated networks is a function of network virtualization, not load balancing.

* B. Monitor network performance: Monitoring is done by network monitoring tools, not load balancers.

* D. Encrypt data for secure transmission: Encryption is handled by security protocols like TLS/SSL, not load balancers.

Real-World Example:

Services like AWS Elastic Load Balancer (ELB) and Azure Load Balancer ensure that traffic is distributed efficiently across instances, maintaining performance and uptime.

NEW QUESTION # 138

In securing virtual machines (VMs), what is the primary role of using an "image factory" in VM deployment?

- A. To ensure consistency, security, and efficiency in VM image creation
- B. To encrypt data within VMs for secure storage
- C. To enable rapid scaling of virtual machines on demand
- D. To facilitate direct manual intervention in VM deployments

Answer: A

Explanation:

An image factory is used in VM deployment to create standardized and secure virtual machine images. The primary role of the image factory is to automate the creation of these images, ensuring that all VMs deployed from the image are consistent in terms of configuration, security settings, and performance. By using an image factory, organizations can ensure that their VMs are secure (with the necessary security patches and settings), efficient (optimized for performance), and consistent (following the same configuration).

This process minimizes the risk of configuration drift and reduces manual intervention in VM deployment, leading to more efficient and secure operations.

NEW QUESTION # 139

.....

We can understand your apprehension before you buy it, but we want to tell you that you don't worry about it anymore, because we have provided a free trial, you can download a free trial version of the CCSK latest dumps from our website, there are many free services and training for you. In this way, you can consider that whether our CCSK latest dumps are suitable for you. Before you decide to get the CCSK Exam Certification, you may be attracted by many exam materials, but we believe not every material is suitable for you. Therefore, you can try to download the demo of CCSK latest dumps that you can know if it is what you want. What's more, we provide it free of charge. How rare a chance is. If you want to pass CCSK exam at first attempt, CCSK exam dumps is your best choice.
