New DCA Test Preparation - DCA Exam Topics

Our BraindumpsIT provides the latest and the most complete DCA exam questions and answers aimed at becoming the most reliable dumps provider in IT exam software. With the help of our BraindumpsIT, nearly all those who have purchased our dumps have successfully passed the difficult DCA Exam, which gives us great confidence to recommend our reliable products to you. We

can assure you that we will fully refund the cost you purchased our dump, if you fail DCA exam with our dumps. So, just rest assured to prepare for your exam.

Introduction to Docker Certified Associate Exam

Docker Certified Associate (DCA) certification serves as a foundational benchmark for real-world container technology expertise with Docker Enterprise Edition. Candidates for **DCA Exam** are seeking to prove fundamental Docker containerization technology knowledge and skills. Before taking this exam, exam aspirants ought to have a solid fundamental information of the concepts shared in the preparation guide as well as on containerization.

It is suggested that professionals accustomed to the ideas and also the technologies represented here by taking relevant training courses. Candidates are expected to have a strong understanding of core docker services, docker images, docker container, and their cmdlets. After passing this exam, candidates get a certificate from Docker that helps them to demonstrate their proficiency in Docker containerization technology to their clients and employers.

Docker Certified Associate (DCA) Exam Sample Questions (Q143-Q148):

NEW QUESTION # 143

Is this statement correct?

Solution: A Dockerfile provides instructions for building a Docker image

- **A. Yes**
- B. No

Answer: A

Explanation:

A Dockerfile is a text file that contains all the commands a user could run on the command line to create an image¹. A Dockerfile is composed of instructions that specify the parent image, the packages to install, the files to copy, the ports to expose, and the commands to run². A Dockerfile can be used to build a Docker image with the docker build command³. Reference:

Dockerfile reference | Docker Docs

What is a Dockerfile? A Step-by-Step Guide [2023 Updated] - Simplilearn How to Build Docker Images with Dockerfile | Linuxize

NEW QUESTION # 144

Will this command ensure that overlay traffic between service tasks is encrypted?

Solution. `docker network create -d overlay --secure <network-name>`

- **A. No**
- B. Yes

Answer: A

Explanation:

Explanation

= The command `docker network create -d overlay --secure <network-name>` will not ensure that overlay traffic between service tasks is encrypted. The `--secure` option is not a valid flag for the docker network create command¹. To enable encryption for an overlay network, you need to use the `--opt encrypted` flag instead²³. This will create IPSEC tunnels between the nodes where the service tasks are scheduled, using the AES algorithm in GCM mode². You can verify if an overlay network is encrypted by checking if the IPSEC tunnels were created using tools like `netstat`⁴. References:

* 1: `docker network create` | Docker Docs

* 2: Encrypt traffic on an overlay network | Docker Docs

* 3: Overlay network driver | Docker Docs

* 4: Docker: How to verify if an overlay network is encrypted - Stack Overflow

NEW QUESTION # 145

Will this command display a list of volumes for a specific container?

Solution. `'docker container logs nginx -volumes'`

- **A. No**

- B. Yes

Answer: A

Explanation:

The command `docker container logs nginx -volumes` will not display a list of volumes for a specific container. The `docker container logs` command shows the logs of a container, which are usually the standard output and standard error of the main process running in the container¹. The `-volumes` flag is not a valid option for this command, and will result in an error message². To display a list of volumes for a specific container, you can use the `docker inspect` command with a filter option, such as `docker inspect -f '{{ .Mounts }}`' `nginx`³. This will show the source, destination, mode, type, and propagation of each volume mounted in the container⁴.

Reference: [docker container logs](#), [docker container logs nginx -volumes](#), [docker inspect](#), [docker inspect -f '{{ .Mounts }}' `nginx`](#)

NEW QUESTION # 146

Will this command ensure that overlay traffic between service tasks is encrypted?

Solution: `docker network create -d overlay --secure <network-name>`

- A. No
- B. Yes

Answer: A

Explanation:

= The command `docker network create -d overlay --secure <network-name>` will not ensure that overlay traffic between service tasks is encrypted. The `--secure` option is not a valid flag for the `docker network create` command¹. To enable encryption for an overlay network, you need to use the `--opt encrypted` flag instead^{2,3}. This will create IPSEC tunnels between the nodes where the service tasks are scheduled, using the AES algorithm in GCM mode². You can verify if an overlay network is encrypted by checking if the IPSEC tunnels were created using tools like `netstat`⁴. Reference:

1: `docker network create` | Docker Docs

2: Encrypt traffic on an overlay network | Docker Docs

3: Overlay network driver | Docker Docs

4: Docker: How to verify if an overlay network is encrypted - Stack Overflow

NEW QUESTION # 147

Does this describe the role of Control Groups (cgroups) when used with a Docker container?

Solution: isolation between resources used by containers

- A. Yes
- B. No

Answer: A

Explanation:

Control Groups (cgroups) are a Linux kernel feature that allow you to limit, modify, or allocate resources as needed¹. Docker uses cgroups to isolate the resources used by containers, such as CPU, memory, disk I/O, network, etc². This means that each container can have its own set of resource limits and constraints, and that the containers cannot interfere with each other or with the host system². This improves the security, performance, and reliability of the containers and the system as a whole. Reference:

Lab: Control Groups (cgroups) | dockerlabs

Docker run reference | Docker Docs
