

# Technical CNX-001 Training - CNX-001 Examcollection

P.S. Free 2026 CompTIA CNX-001 dumps are available on Google Drive shared by BootcampPDF:  
<https://drive.google.com/open?id=1JDGXdfU94Mz91wToT5vylEkE5J3vnCi>

cracking the CompTIA CNX-001 examination needs preparation from an updated CompTIA CNX-001 exam questions. To pave your way towards exam success, BootcampPDF has hired a team of professionals. They have compiled real CNX-001 Exam Dumps after thorough analysis of past exams and examination content. These CNX-001 Exam Dumps are actual, authentic, realistic, and will eliminate your chance of failure in the CompTIA CloudNetX Certification Exam CNX-001 examination.

CNX-001 Guide Quiz helped over 98 percent of exam candidates get the certificate. Before you really attend the CompTIA CNX-001 exam and choose your materials, we want to remind you of the importance of holding a certificate like this one. Obtaining a CompTIA CNX-001 certificate likes this one can help you master a lot of agreeable outcomes in the future, like higher salary, the opportunities to promotion and being trusted by the superiors and colleagues.

## Reliable CNX-001 - Technical CompTIA CloudNetX Certification Exam Training

Our CompTIA CNX-001 exam dumps give help to give you an idea about the actual CompTIA CloudNetX Certification Exam (CNX-001) exam. You can attempt multiple CompTIA CloudNetX Certification Exam (CNX-001) exam questions on the software to improve your performance. BootcampPDF has many CompTIA CloudNetX Certification Exam (CNX-001) practice questions that reflect the pattern of the real CompTIA CloudNetX Certification Exam (CNX-001) exam. BootcampPDF allows you to create a CompTIA CloudNetX Certification Exam (CNX-001) exam dumps according to your preparation. It is easy to create the CompTIA CNX-001 practice questions by following just a few simple steps. Our CNX-001 exam dumps are customizable based on the time and type of questions.

## CompTIA CloudNetX Certification Exam Sample Questions (Q29-Q34):

### NEW QUESTION # 29

You are designing a campus network with a three-tier hierarchy and need to ensure secure connectivity between locations and traveling employees.

#### INSTRUCTIONS

Review the command output by clicking on the server, laptops, and workstations on the network.

Use the drop-down menus to determine the appropriate technology and label for each layer on the diagram.

Options may only be used once.

Click on the magnifying glass to make additional configuration changes.

If at any time you would like to bring back the initial state of the simulation, please click the Reset All button.

#### Answer:

Explanation:

□

### NEW QUESTION # 30

Server A (10.2.3.9) needs to access Server B (10.2.2.7) within the cloud environment since they are segmented into different network sections. All external inbound traffic must be blocked to those servers.

Which of the following need to be configured to appropriately secure the cloud network? (Choose two.)

- A. Network security group rule:  
deny 10.2.0.0/16 to 0.0.0.0/0
- **B. Network security group rule:  
allow 10.2.3.9 to 10.2.2.7**
- C. Network security group rule:  
allow 10.2.0.0/16 to 0.0.0.0/0
- D. Firewall rule:  
deny 10.2.0.0/16 to 0.0.0.0/0
- **E. Network security group rule:  
deny 0.0.0.0/0 to 10.2.0.0/16**
- F. Firewall rule:  
allow 10.2.0.0/16 to 0.0.0.0/0

**Answer: B,E**

Explanation:

Network security group rule: allow 10.2.3.9 to 10.2.2.7

Explicitly permits Server A's IP to reach Server B.

Network security group rule: deny 0.0.0.0/0 to 10.2.0.0/16

Blocks all inbound traffic from any external source into the 10.2.0.0/16 address space, ensuring no external access.

### NEW QUESTION # 31

A developer reports errors when trying to access a web application. The developer uses Postman to troubleshoot and receives the following error:

□

Which of the following is the cause of the issue?

- A. Incorrect HTTP redirection
- B. Too restrictive NGFW rule
- C. Requested element not found
- **D. Lack of user authentication**

**Answer: D**

Explanation:

The 403 Forbidden HTML response indicates the API is rejecting the call due to missing or invalid credentials (no valid access key/signature), not because of a missing resource (404), a network#level block (you'd see a timeout or TCP reject), or an HTTP redirect. Proper authentication headers with a valid signature are required to avoid the 403 error.

### NEW QUESTION # 32

A company is transitioning from on-premises to a hybrid environment. Due to regulatory standards, the company needs to achieve a high level of reliability and high availability for the connection between its data center and the cloud provider. Which of the following solutions best meets the requirements?

- A. Establish a VPN with two tunnels to a transit gateway at the cloud provider.
- B. Establish a Direct Connect with the cloud provider and a redundant connection with a VPN over the internet.
- C. Establish a Direct Connect with the cloud provider and peer to two different VPCs in the cloud network.
- **D. Establish two Direct Connect connections to the cloud provider using two different suppliers.**

**Answer: D**

Explanation:

Comprehensive and Detailed Explanation From Exact Extract:

Establishing two Direct Connect (or equivalent private connectivity services such as Azure ExpressRoute) connections with two different providers ensures maximum redundancy and reliability. This setup complies with high availability (HA) and fault-tolerance design best practices for regulated industries, where minimal downtime and service continuity are critical.

Relevant Extract from CompTIA CloudNetX CNX-001 Study Guide - under "Hybrid Connectivity and High Availability":

"Redundant connections to cloud providers should use physically separate paths and providers to ensure fault tolerance and meet reliability requirements in hybrid cloud environments."

"Direct connections provide higher availability and consistent performance than VPNs." Other options:

- \* A. Peering to two VPCs does not ensure link redundancy.
- \* B. Combining Direct Connect with VPN offers backup but less reliability than dual Direct Connects.
- \* D. VPNs over the internet are lower in reliability and do not meet high availability standards required for regulated industries.

### NEW QUESTION # 33

A network administrator receives a ticket from one of the company's offices about video calls that work normally for one minute and then get very choppy. The network administrator pings the video server from that site to ensure that it is reachable:

Which of the following is most likely the cause of the video call issue?

- A. Loss
- **B. Jitter**
- C. Latency
- D. Throughput

**Answer: B**

Explanation:

The wildly varying ping response times (from 11 ms up to 849 ms) indicate high packet-delay variation, which causes the video stream to become choppy after a short period. That fluctuation in latency is known as jitter.

### NEW QUESTION # 34

.....

Our CNX-001 actual exam can also broaden your horizon; activate your potential to deal with difficulties. You will not only get desirable goal with our CNX-001 exam practice but with superior outcomes that others who dare not imagine. The scarcity of efficient resource impaired many customers' chance of winning. So choosing materials blindly is dangerous to your exam and you must choose reliable and qualities like our CNX-001 simulating questions.
