

# Veeam VMCE\_v12 Exam Quiz, VMCE\_v12 Reliable Exam Vce

BTW, DOWNLOAD part of Prep4King VMCE\_v12 dumps from Cloud Storage: <https://drive.google.com/open?id=1wUrSksGrhwNXRLyWGsjM8m4ZClokD00g>

You may previously think preparing for the VMCE\_v12 practice exam will be full of agony; actually, you can abandon the time-consuming thought from now on. Our VMCE\_v12 exam question can be obtained within 5 minutes after your purchase and full of high quality points for your references, and also remedy your previous faults and wrong thinking of knowledge needed in this exam. As a result, many customers get manifest improvement and lighten their load by using our VMCE\_v12 latest dumps. You won't regret your decision of choosing us. In contrast, they will inspire your potential. Besides, when conceive and design our VMCE\_v12 Exam Questions at the first beginning, we target the aim customers like you, a group of exam candidates preparing for the exam. Up to now, more than 98 percent of buyers of our VMCE\_v12 latest dumps have passed it successfully. Up to now they can be classified into three versions: the PDF, the software and the app version. So we give emphasis on your goals, and higher quality of our VMCE\_v12 test guide.

## Veeam VMCE\_v12 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"> <li>Enacting a recovery: This section is about getting practice in recovering various recoveries with diverse data.</li> </ul>
Topic 2	<ul style="list-style-type: none"> <li>Core components: This section of the exam covers exploring the functionality of Veeam Backup &amp; Replication and system requirements.</li> </ul>
Topic 3	<ul style="list-style-type: none"> <li>Data protection strategies: This section of the exam covers an overview of data protection strategies.</li> </ul>
Topic 4	<ul style="list-style-type: none"> <li>Veeam Backup Enterprise Manager: The section describes the use cases for Veeam Backup Enterprise Manager.</li> </ul>
Topic 5	<ul style="list-style-type: none"> <li>Verifying recoverability: This section of the exam covers the creation of automated tests to ensure recoverability from backups and replicas.</li> </ul>
Topic 6	<ul style="list-style-type: none"> <li>Scale-out Backup Repository: This section of the exam covers the description of the architecture, placement policies, and data tiers.</li> </ul>
Topic 7	<ul style="list-style-type: none"> <li>Risk scenarios: This section covers exploring various risk scenarios and identifying the type of risks we may face in the environment.</li> </ul>
Topic 8	<ul style="list-style-type: none"> <li>Unstructured data backup: This section is about highlighting vital features required to protect unstructured data.</li> </ul>

Topic 9	<ul style="list-style-type: none"> <li>Virtual machine backup: This section of the exam covers protecting the VMware and Hyper V to safeguard VMware that follows SLAs.</li> </ul>
Topic 10	<ul style="list-style-type: none"> <li>Recovery scenarios and features: This section covers the impact of various recovery procedures and choosing the most viable recovery technique.</li> </ul>
Topic 11	<ul style="list-style-type: none"> <li>Backup data optimizations: This section covers the need for object storage to be backed up and the supported object storage solutions while utilizing repositories.</li> </ul>
Topic 12	<ul style="list-style-type: none"> <li>Incident Response Planning: This section of the exam covers integrating Veeam Backup and Replication into the incident response strategy.</li> </ul>

## VMCE\_v12 Reliable Exam Vce & VMCE\_v12 Latest Exam Price

We often receive news feeds and what well-known entrepreneurs have done to young people. The achievements of these entrepreneurs are the goals we strive for and we must value their opinions. And you may don't know that they were also benefited from our VMCE\_v12 study braindumps. We have engaged in this career for over ten years and helped numerous entrepreneurs achieved their VMCE\_v12 certifications toward their success. Just buy our VMCE\_v12 learning materials and you will become a big man as them.

### Veeam Certified Engineer v12 Sample Questions (Q185-Q190):

#### NEW QUESTION # 185

A company has separate networks for management traffic and data traffic. All Veeam components are communicating over the management network. How would they define the data network for backup data transfers?

- A. Use the preferred network settings to switch to data network for the backup traffic
- B. Create a global network traffic rule, set appropriate source and target IP range
- C. Re-add all Veeam components involved in data transfer through the required interfaces
- D. Update routing tables on the components involved in data transfer

**Answer: A**

Explanation:

Explanation

[https://helpcenter.veeam.com/docs/backup/vsphere/select\\_backup\\_network.html?ver=100](https://helpcenter.veeam.com/docs/backup/vsphere/select_backup_network.html?ver=100)

#### NEW QUESTION # 186

To be able to increase backup retention, the company has bought a Data Domain deduplication appliance.

After setting up the jobs to use it, the backup administrator observes an increase of resource consumption on the backup server. The proxy configuration has not been modified.

What is causing the issue?

- A. The backup server needs additional resources to use a deduplication appliance.
- B. The SSL certificate on the backup appliance needs to be updated.
- C. The backup server has to fulfill the gateway role.
- D. The backup appliance does not have enough resources to process the data.

**Answer: C**

Explanation:

When integrating a Data Domain deduplication appliance with Veeam Backup & Replication, it is typically used as a backup repository. The backup server may need to take on the gateway role, especially if the Data Domain is integrated over NFS or CIFS. This means that the backup server will be responsible for processing the data flow between the Veeam proxies and the deduplication appliance. If the gateway server (backup server) is not well-resourced, this additional workload can cause an increase in resource

consumption on the backup server. The appliance's resources and the SSL certificate are not related to increased resource consumption on the backup server, and simply needing additional resources for deduplication (D) is not specific enough without indicating the gateway role.

#### NEW QUESTION # 187

An administrator needs to configure a backup job that dynamically adds new VMware hosted SQL servers. How can this be accomplished?

- A. Create a CSV file that is scanned before the backup job starts.
- B. Create a dynamic backup job in Enterprise Manager.
- C. Create a job based on vSphere tags.
- D. Enable application aware processing.

**Answer: C**

Explanation:

Creating a backup job based on vSphere tags allows for dynamic addition of new VMware hosted SQL servers. When new VMs are tagged appropriately in vSphere, they are automatically included in the backup job, ensuring all relevant SQL servers are backed up without manual intervention.

#### NEW QUESTION # 188

An engineer needs to back up their VMware VMs running on a Nimble Array. The engineer has checked "Enable backup from storage snapshots" when creating the job. When the backup runs, snapshots are not triggered on the Nimble Array.

Which additional step must be performed?

- A. The backup repository is not configured to accept snapshots
- B. VMware Tools need to be updated
- C. The Nimble Array needs to be added to Storage Infrastructure.
- D. The Nimble Array needs to be rebooted to allow for Backup from Storage Snapshots.

**Answer: C**

Explanation:

To enable backup from storage snapshots with a Nimble Array, it is necessary to add the storage system to the Veeam Backup & Replication console's Storage Infrastructure. This allows Veeam to interact with the Nimble Array and orchestrate the creation of storage snapshots, which can then be used for backups. Simply enabling the backup from storage snapshots option in the job is not enough; the array itself must be integrated into the Veeam infrastructure. References:

#### NEW QUESTION # 189

A company needs to ensure that, during a disaster, a group of VMs starts in a certain order with time delays between starting each VM. How can this be accomplished?

- A. Create a replica chain in the Veeam Backup & Replication console.
- B. Create a failover template file for the group of VMs.
- C. Create a failover plan.
- D. Perform a planned failover.

**Answer: C**

#### NEW QUESTION # 190

.....

In the era of informational globalization, the world has witnessed climax of science and technology development, and has enjoyed the
