

Customizable Microsoft AZ-104 Practice Test Software

The screenshot shows the avanset AZ-104 exam interface. At the top, it says 'AZ-104.examcollection.premium.exam.234q - Custom Exam - VCE Player'. Below that, it says 'Question 4 of 234 (Monitor and back ... Q14)'. The main content area is titled 'HOTSPOT' and contains a table of users. The table has three columns: 'Name', 'Member of', and 'Role assigned'. The rows are: User1 (Group1, None), User2 (Group2, None), and User3 (Group1, Group2, User administrator). Below the table is an 'Answer Area' with three statements and two radio buttons for 'Yes' and 'No'.

Name	Member of	Role assigned
User1	Group1	None
User2	Group2	None
User3	Group1, Group2	User administrator

Answer Area

Statements

After User2 answers three security questions, he can reset his password immediately. ☐ Yes ☐ No

If User1 forgets her password, she can reset the password by using the mobile phone app. ☐ Yes ☐ No

User3 can add security questions to the password reset process. ☐ Yes ☐ No

Navigation buttons: Previous, Next, Show Answer, Show List, Save Session, End Exam.

100% Pass Quiz AZ-104 - Microsoft Azure Administrator Useful New Test Cram

Our goal is to help you save both time and money by providing you with the AZ-104 updated exam questions. Keep up the good work on preparing for the Microsoft AZ-104 test with our actual Microsoft AZ-104 Dumps. We are so confident that you will succeed on the first try that we will return your money according to the terms and conditions if you do not.

Microsoft Azure Administrator Sample Questions (Q384-Q389):

NEW QUESTION # 384

You have an Azure subscription that contains an Azure Storage account.

You plan to copy an on-premises virtual machine image to a container named vmimages.

You need to create the container for the planned image.

Which command should you run? To answer, select the appropriate options in the answer area.

NOTE Each correct selection is worth one point.

Microsoft

azcopy

'https://mystorageaccount.'

.core.windows.net/vmimages'

Answer:

Explanation:

Answer Area

Microsoft

azcopy

'https://mystorageaccount.'

.core.windows.net/vmimages'

Explanation:

Answer Area

azcopy

'https://mystorageaccount.'

.core.windows.net/vmimages'

NEW QUESTION # 385

You have an Azure virtual machine named VM1 that you use for testing. VM1 is protected by Azure Backup.

You delete VM1.

You need to remove the backup data stored for VM1.

What should you do first?

- A. Stop the backup.
- B. Modify the backup policy.
- C. Delete the Recovery Services vault.
- D. Delete the storage account.

Answer: A

Explanation:

Azure Backup provides backup for virtual machines - created through both the classic deployment model and the Azure Resource Manager deployment model - by using custom-defined backup policies in a Recovery Services vault.

With the release of backup policy management, customers can manage backup policies and model them to meet their changing requirements from a single window. Customers can edit a policy, associate more virtual machines to a policy, and delete unnecessary policies to meet their compliance requirements.

Incorrect Answers:

You can't delete a Recovery Services vault if it is registered to a server and holds backup data. If you try to delete a vault, but can't, the vault is still configured to receive backup data.

<https://azure.microsoft.com/en-in/updates/azure-vm-backup-policy-management/>

NEW QUESTION # 386

You have an Azure Active Directory tenant named Contoso.com that includes following users:

Name	Role
User1	Cloud device administrator
User2	User administrator

Contoso.com includes following Windows 10 devices:

Name	Join type
Device1	Azure AD registered
Device2	Azure AD joined

You create following security groups in Contoso.com:

Name	Join type	Owner
Group1	Assigned	User1
Group2	Dynamic Device	User2

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Statements	Yes	No
User1 can add Device2 to Group1	<input type="radio"/>	<input type="radio"/>
User2 can add Device1 to Group1	<input type="radio"/>	<input type="radio"/>
User2 can add Device2 to Group2	<input type="radio"/>	<input type="radio"/>

Answer:

Explanation:

Statements	Yes	No
User1 can add Device2 to Group1	<input checked="" type="radio"/>	<input type="radio"/>
User2 can add Device1 to Group1	<input type="radio"/>	<input checked="" type="radio"/>
User2 can add Device2 to Group2	<input checked="" type="radio"/>	<input type="radio"/>

Explanation:

Box 1: Yes

User1 is a Cloud Device Administrator.

Device2 is Azure AD joined.

Group1 has the assigned to join type. User1 is the owner of Group1.

Note: Assigned groups - Manually add users or devices into a static group.

Azure AD joined or hybrid Azure AD joined devices utilize an organizational account in Azure AD

Box 2: No

User2 is a User Administrator.

Device1 is Azure AD registered.

Group1 has the assigned join type, and the owner is User1.

Note: Azure AD registered devices utilize an account managed by the end user, this account is either a Microsoft account or another locally managed credential.

Box 3: Yes

User2 is a User Administrator.

Device2 is Azure AD joined.

Group2 has the Dynamic Device join type, and the owner is User2.

NEW QUESTION # 387

You implement the planned changes for NSG1 and NSG2.

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Answer Area

Statements	Yes	No
From VM1, you can establish a Remote Desktop session to VM2.	<input type="radio"/>	<input type="radio"/>
From VM2, you can ping VM3.	<input type="radio"/>	<input type="radio"/>
From VM2, you can establish a Remote Desktop session to VM3.	<input type="radio"/>	<input type="radio"/>

Answer:

Explanation:

Answer Area

Statements	Yes	No
From VM1, you can establish a Remote Desktop session to VM2.	<input checked="" type="radio"/>	<input type="radio"/>
From VM2, you can ping VM3.	<input checked="" type="radio"/>	<input type="radio"/>
From VM2, you can establish a Remote Desktop session to VM3.	<input type="radio"/>	<input checked="" type="radio"/>

NEW QUESTION # 388

You have a general purpose v1 storage account named storageaccount1 that has a private container named container1. You need to allow read access to the data inside container1, but only within a 14 day window. How do you accomplish this?

- A. Create a service SAS
- B. Create a shared access signatures
- C. Upgrade the storage account to general purpose v2
- D. Create a stored access policy

Answer: B,D

Explanation:

A Stored Access Policy allows granular control over a single storage container using a Shared Access Signature (SAS).

A Shared Access Signature (SAS) allows you to have granular control over your storage account, including access to only certain services (i.e. Azure Blobs) and permitting only read, write, delete, list, add, or create access.
