Experience The Real Juniper JN0-105 Exam With Web-Based Practice Exam Software

In today's competitive industry, only the brightest and most qualified candidates are hired for high-paying positions. Obtaining Juniper Junos, Associate (JNCIA-Junos) is a wonderful approach to be successful because it can draw in prospects and convince companies that you are the finest in your field. Pass the Junos, Associate (JNCIA-Junos) exam to establish your expertise in your field and receive certification. However, passing the Junos, Associate (JNCIA-Junos) JN0-105 Exam is challenging.

Juniper JN0-105 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">• Networking Fundamentals: The topic networking fundamentals covers identifying the concepts and functionality of different fundamental elements of networking.
Topic 2	<ul style="list-style-type: none">• Routing Fundamentals: This topic discusses pointing out basic routing concepts or functionality for Junos devices. Moreover, the topic also describes configuring or monitoring basic routing elements for a Junos device.
Topic 3	<ul style="list-style-type: none">• Routing Policy and Firewall Filters: The topic of Routing Policy and Firewall Filters covers routing policy and firewall filters on Junos devices. Furthermore, the topic also deals with routing policies and firewall filters on a Junos device.
Topic 4	<ul style="list-style-type: none">• User Interfaces: This topic delves into identifying the concepts, operation, or functionality of the Junos user interface.

Juniper Junos, Associate (JNCIA-Junos) Sample Questions (Q48-Q53):

NEW QUESTION # 48

Exhibit

```
[edit system archival] user@router# show configuration {
transfer-on-commit; archive-sites {
"scp://user@172.15.100.2 :/archive" password## SECRET-DATA
"ftp://user@10.210.9.178:/archive" password "$9..."; ## SECRET-DATA
.
```

Referring to the exhibit, where are the configuration backup files stored?

- A. Files are stored to the SCP site but if the transfer fails, then to the FTP site.
- **B. Files are stored to the SCP site and the FTP site simultaneously.**
- C. Files are stored to any site as selected by Junos internally.
- D. Files are stored to the SCP site and the FTP site in a round-robin manner.

Answer: B

Explanation:

In Junos OS, the `archive-sites` configuration under `[edit system]` allows for the automatic backup of configuration files to designated locations upon commit. When multiple `archive-sites` are specified, as shown in the exhibit with both SCP and FTP sites listed, the device does not choose between them or use them in a round-robin manner. Instead, it attempts to transfer the configuration backup files to all specified sites simultaneously upon each commit. This ensures redundancy and increases the likelihood that a backup will be successfully stored even if one of the transfer methods or destinations fails.

NEW QUESTION # 49

Which two actions happen when multiple users issue the `configure exclusive` command to enter configuration mode on a Junos device? (Choose two.)

- A. Other users can enter configuration mode.
- B. The candidate configuration is unlocked.
- **C. The candidate configuration is locked.**
- **D. Other users cannot enter configuration mode.**

Answer: C,D

Explanation:

In Junos OS, when a user issues the `configure exclusive` command, it locks the candidate configuration for that user, preventing other users from making concurrent configuration changes. This exclusive lock ensures that configuration changes are managed in a controlled manner, reducing the risk of conflicting changes. As a result, while one user is in exclusive configuration mode, other users are prevented from entering configuration mode until the lock is released, either by the user committing the changes or exiting configuration mode.

NEW QUESTION # 50

What will the `request system configuration rescue save` command do?

- A. It activates the rescue configuration.
- **B. It saves the most recently committed configuration as the rescue configuration.**
- C. It saves the candidate configuration as the rescue configuration.
- D. It saves a configuration version prior to the configuration most recently committed as the rescue configuration.

Answer: B

Explanation:

The `"request system configuration rescue save"` command in Junos OS saves the most recently committed configuration as the rescue configuration, making B the correct answer. This feature allows administrators to set a known good configuration that can be quickly reverted to in case of configuration errors or issues.

NEW QUESTION # 51

After the factory default configuration is loaded, which configuration object must be created prior to the first commit?

- A. root authentication
- B. out-of-band connectivity
- C. host name
- D. loopback IP address

Answer: A

Explanation:

In Juniper Networks devices, when the factory default configuration is loaded, the first step before committing any configuration is to set up root authentication. This is crucial because it secures the device by ensuring that only authorized users have administrative access. Without setting up a root password, the device will not allow any commit operations, which is a safety measure to prevent unauthorized access. This requirement emphasizes the importance Juniper places on security right from the initial setup of the device.

NEW QUESTION # 52

Which layer of the OSI model contains the IP address information?

- A. Layer 4
- B. Layer 2
- C. Layer 3
- D. Layer 1

Answer: C

Explanation:

The OSI (Open Systems Interconnection) model is a conceptual framework used to understand network interactions in seven distinct layers. IP (Internet Protocol) addresses are part of Layer 3, known as the Network Layer. This layer is responsible for packet forwarding, including routing through intermediate routers, and it handles the logical addressing scheme of the network to ensure that packets can be routed across multiple networks and reach their destination. IP addresses provide unique identifiers for network interfaces, allowing for communication between devices on a network or across different networks.

NEW QUESTION # 53

.....

It is common in modern society that many people who are more knowledgeable and capable than others finally lost some good opportunities for development because they didn't obtain the JN0-105 certification. The prerequisite for obtaining the JN0-105 Certification is to pass the exam, but not everyone has the ability to pass it at one time. But our JN0-105 exam questions will help you pass the exam by just one go for we have the pass rate high as 98% to 100%.
