The latest PK0-005 quiz torrent can directly lead you to the success of your career. Our materials can simulate real operation exam atmosphere and simulate exams. The download and install set no limits for the amount of the computers and the persons who use PK0-005 Test Prep. The PK0-005 test prep mainly help our clients pass the PK0-005 exam and gain the certification. The certification can bring great benefits to the clients. The clients can enter in the big companies and earn the high salary. You may double the salary after you pass the PK0-005 exam.

CompTIA Project+ Certification Exam Sample Questions (Q372-Q377):

NEW QUESTION # 372

A company is starting a new implementation project The stakeholders are reviewing RFP responses to help make a decision about which project management consulting firm to hire. Given the following information:

Which of the following is the best consulting firm for the company to hire?

- A. Consulting firm 2
- B. Consulting firm 4
- C. Consulting firm 1
- D. Consulting firm 3

Answer: C

NEW QUESTION # 373

A team member identifies a critical issue in production. Which of the following should the project manager apply?

- A. Release plan
- B. Rollback plan
- C. Compliance check
- D. Validation check

Answer: B

Explanation:

A rollback plan, also known as a backout plan, is a strategy designed to reverse changes made during a project in case of failure or undesired results. A rollback plan is a form of risk response that allows the project to restore the previous state and minimize the impact of the issue. A rollback plan is usually created during the planning phase and implemented during the execution or closing phase of the project. The other options are not correct because:

A compliance check is a process that ensures that the project meets the relevant standards, regulations, and requirements. A compliance check is not a risk response, but rather a quality control or assurance activity.

A release plan is a document that outlines the scope, schedule, and resources for delivering a product or service to the customer. A release plan is not a risk response, but rather a communication or scope management tool.

A validation check is a process that verifies that the project deliverables meet the customer's needs and expectations. A validation check is not a risk response, but rather a quality control or assurance activity. NEW QUESTION # 374

As a part of a project, structured cabling activities have been outsourced to another company. The agreement is that work will take six weeks to complete and will be performed at different locations. Which of the following should the project manager do? (Select two).

- A. Approve the deliverables.
- B. Monitor the performance.
- C. Assign the resources.
- D. Purchase the materials.
- E. Accept delays in the work.
- F. Negotiate with the vendors.

Answer: A,B

Explanation:

The project manager should approve the deliverables and monitor the performance of the outsourced structured cabling activities. These are the responsibilities of the project manager when dealing with external vendors or contractors, as they ensure that the quality standards, scope, schedule, and budget are met according to the contract terms and the project plan. The project manager should also communicate regularly with the vendor and provide feedback and guidance as needed. The other options are not correct because: Purchasing the materials is not the responsibility of the project manager, but the vendor who is performing the structured cabling activities. The project manager should only verify that the materials are suitable and available for the project.

Assigning the resources is not the responsibility of the project manager, but the vendor who is performing the structured cabling activities. The project manager should only ensure that the vendor has the adequate and qualified resources to complete the work.

Accepting delays in the work is not a good practice for the project manager, as it can negatively affect the project schedule, scope, and quality. The project manager should proactively identify and manage the risks and issues that may cause delays, and implement contingency plans or corrective actions if necessary.

Negotiating with the vendors is not a task that the project manager should do during the execution of the structured cabling activities, as it should have been done during the planning and procurement phases of the project. The project manager should only adhere to the contract terms and conditions that have been agreed upon with the vendor, and only renegotiate if there are significant changes or disputes that require it. References = CompTIA Project+ Study Guide: Exam PK0-005, 3rd Edition, Chapter 8: Planning Projects, Part 4 (Procurement and Communication), pages 243-260; CompTIA Project+ Certification Exam Objectives, Domain 2: Project Planning, Objective 2.5: Given a scenario, plan procurement for a project; Domain 3: Project Execution, Objective 3.2: Given a scenario, execute and monitor project tasks using traditional methodologies.

NEW QUESTION # 375

A stakeholder called a project manager on the telephone to ask for a status report. Which of the following describe this type of communication? (Select two).

- A. External
- B. Formal
- C. Informal
- D. Internal
- E. Verbal
- F. Indirect

Answer: C,E

NEW QUESTION # 376

A project manager has been scheduling and facilitating project meetings, scribing the minutes, distributing the minutes, and sending agendas prior to upcoming meetings. However, the project manager is frustrated because action items are not being completed. Which of the following should the project manager do to alleviate these concerns?

- **A. Delegate the roles and responsibilities to improve meeting management.**
- B. Reprimand project team members for not completing assigned action items.
- C. Use a software tool during the meeting that can create a transcript of what is discussed.
- D. Have a standing agenda that is vague enough so that it can be used again.

Answer: A

Explanation:

According to 6 Techniques for Running Project Management Meetings, one of the best practices for effective project meetings is to assign meeting roles to stay focused. By delegating the roles and responsibilities of facilitator, timekeeper, scribe, and presenter, the project manager can ensure that the meeting agenda is followed, the action items are recorded, and the outcomes are communicated. This can also increase the engagement and accountability of the project team members, and reduce the frustration of the project manager.

NEW QUESTION # 377

.....

If you want to pass the exam quickly, PK0-005 prep guide is your best choice. We know that many users do not have a large amount of time to learn. In response to this, we have scientifically set the content of the data. You can use your piecemeal time to learn, and every minute will have a good effect. In order for you to really absorb the content of PK0-005 Exam Questions, we will tailor a learning plan for you. This study plan may also have a great impact on your work and life. As long as you carefully study the PK0-005 study guide for twenty to thirty hours, you can go to the PK0-005 exam.
