You can use this format of the The Open Group OGBA-101 Exam product for quick study and revision. Laptops, tablets, and smartphones support the OGBA-101 dumps PDF files.

The Open Group TOGAF Business Architecture Foundation Exam Sample Questions (Q30-Q35):

NEW QUESTION # 30
Which of the following supports the need to govern Enterprise Architecture?

- A. The TOGAF standard cannot be used without executive governance.
- B. The Architecture Project mandates the governance of the target architecture.
- C. Best practice governance enables the organization to control value realization.
- D. The stakeholder preferences may go beyond the architecture project scope and needs control.

Answer: C

Explanation:
The need to govern Enterprise Architecture is supported by the fact that best practice governance enables the organization to control value realization. Here's a detailed explanation:
* Enterprise Architecture Governance:
* Definition: Governance in the context of Enterprise Architecture (EA) involves establishing processes, roles, and responsibilities to ensure that the architecture is developed and maintained in alignment with the business strategy and objectives.
* Importance of Governance:
* Control and Accountability: Effective governance ensures that architecture activities are controlled and aligned with business priorities. It establishes accountability for architectural decisions and outcomes.
* Value Realization: Governance mechanisms ensure that the architecture delivers value to the organization by aligning with strategic goals, optimizing resource usage, and ensuring that architecture initiatives are completed successfully.
* TOGAF References:
* Architecture Governance Framework: TOGAF provides a framework for architecture governance, including guidelines for establishing governance structures, processes, and tools to manage architecture activities effectively.
* ADM Phases: Governance is integrated into all phases of the ADM to ensure that architecture development is controlled and aligned with business needs. This includes monitoring progress, managing risks, and ensuring compliance with architecture principles and standards.
* Best Practices:
* Continuous Improvement: Best practice governance involves continuous monitoring and improvement of the architecture processes to ensure they remain effective and deliver the desired outcomes.
* Stakeholder Engagement: Effective governance ensures ongoing engagement with stakeholders, ensuring their needs and concerns are addressed, and maintaining alignment with business objectives.
In summary, the need to govern Enterprise Architecture is supported by the fact that best practice governance enables the organization to control value realization, ensuring that architecture initiatives are aligned with strategic goals and deliver tangible benefits.

NEW QUESTION # 31
Consider the following extract of a model showing relationships between Business Architecture concepts:

- A. Receives
- B. Consists of
- C. Enables
- D. Creates

Answer: B

Explanation:
In the context of TOGAF and Business Architecture, the diagram depicts the relationship between a Value Stream, Value Stage, and Value.
Value Stream: Represents the end-to-end set of activities that create and deliver value to a stakeholder.
Value Stage: A distinct step or phase within the Value Stream.
Value: The benefit delivered to the stakeholder.
The relationship "X" indicates that a Value Stream is composed of multiple Value Stages.
Think of it like a journey (Value Stream) with multiple stops along the way (Value Stages). Each stage contributes to the overall value delivered at the end of the journey.

NEW QUESTION # 32
Refer to the table below:

Phase	Output & Outcome	Essential Knowledge
?	A set of domain architectures approved by the stakeholders for the problem being addressed, with a set of gaps, and work to clear the gaps understood by the stakeholders	How does the current Enterprise fail to meet the preferences of the stakeholders? What must change to enable the Enterprise to meet the preferences of the stakeholders? (Gaps) What work is necessary to realize the changes, that is consistent with the additional value being created? (Work Package) How stakeholder priority and preference adjust in response to value, effort, and risk of change. (Stakeholder Requirements)

Which ADM Phase(s) does this describe?

- A. Phase E
- B. Phase B
- C. Phase B. C and D
- D. Preliminary Phase

Answer: C

Explanation:
The table describes the steps involved in Phase B (Business Architecture), Phase C (Information Systems Architectures), and Phase D (Technology Architecture) of the TOGAF ADM5. These phases are responsible for developing the target architectures for each domain and identifying the gaps between the baseline and target architectures. The table shows the outputs and outcomes of each phase, as well as the essential knowledge required for each phase.
The table describes the iterative cycle of defining requirements, identifying gaps, and creating solutions that occurs throughout the architecture development phases of the TOGAF ADM. This cycle is most prominent in:
* Phase B (Business Architecture):
* Develop the Business Architecture, identifying gaps between the baseline and desired business capabilities, processes, and information flows.
* Define work packages to address these gaps and realize the target business architecture.
* Phase C (Information Systems Architectures):
* Develop the Data and Application Architectures to support the Business Architecture.
* Identify gaps between the baseline and target information systems architectures.
* Define work packages to address these gaps and realize the target data and application architectures.
* Phase D (Technology Architecture):
* Develop the Technology Architecture to support the Data and Application Architectures.
* Identify gaps between the baseline and target technology architectures.
* Define work packages to address these gaps and realize the target technology architecture.

NEW QUESTION # 33

When considering the scope of an architecture, the architect considers the level of detail for the architecting effort. What is this dimension of the scope called?

- A. The project
- B. The breadth
- C. The depth
- D. The extent

Answer: C

NEW QUESTION # 34

Consider the following business capability map. where cells of a model are given different colors to represent desired maturity levels (Green (G) = level achieved, yellow (Y) = one level away, red (R) =two or more levels away, purple (P) = missing capability):

Which of the following best describes what this shows?

- A. The Strategic capabilities need more attention in two areas. Policy Management, and Government Relations Management. Agent Management is missing as a Core capability Information Management needs attention as a Supporting Capability.
- B. Policy Management. Government Relations Management, and HR Management need immediate attention. Partner Management. Account Management, and Training Management have issues but are of lower priority Agent Management Is a new business capability that does not exist
- C. Agent Management needs immediate attention. Market Planning. Government Relations Management, and HR Management have Issues but are of lower priority Partner Management. Customer Management, and Training Management are new business capabilities that do not exist.
- D. Agent Management needs immediate attention. Market Planning. HR Management and Government Relations Management need attention. Customer Management. Training Management and Partner Management need attention but are of lower priority.

Answer: B

Explanation:
The business capability map provided uses color coding to represent the maturity levels of various business capabilities in strategic, core, and supporting functions. The colors indicate the current state or priority for development, with red indicating capabilities that are significantly below desired maturity levels and thus require immediate attention. In this case, Policy Management, Government Relations Management, and HR Management are marked as red, signaling the need for urgent improvement. Yellow indicates capabilities that are closer to the desired state but still need attention, while green shows capabilities that have achieved the desired maturity level. Purple indicates a missing capability that does not currently exist in the enterprise, which is the case for Agent Management.

NEW QUESTION # 35

......

We have three versions packages of the OGBA-101 exam questions to help you comprehensively. Also, all contents are carefully

prepared by our researchers. So you needn't to read and memorize the boring reference books of the OGBA-101 Exam. Most people have successfully passed the exam under the assistance of our study materials. So try to trust us. Our OGBA-101 study materials will help you generate a wonderful life.
