FCSS - FortiSASE 25 Administrator Latest Exam File & FCSS_SASE_AD-25 free download pdf & FCSS - FortiSASE 25 Administrator Valid Test Simulator

DumpExam have the obligation to ensure your comfortable learning if you have spent money on our FCSS_SASE_AD-25 study materials. We do not have hot lines. The pass rate of our FCSS_SASE_AD-25 is as high as more then 98%. And you can enjoy our considerable service on FCSS_SASE_AD-25 exam questions. So you are advised to send your emails to our email address. In case you send it to others' email inbox, please check the address carefully before. The after-sales service of website can stand the test of practice. Once you trust our FCSS_SASE_AD-25 Exam Torrent, you also can enjoy such good service.

Fortinet FCSS_SASE_AD-25 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"> Analytics and Monitoring: This section of the exam measures the skills of Security Analysts and emphasizes the monitoring and reporting aspects of FortiSASE. Candidates are expected to configure dashboards, logging settings, and analyze reports for user traffic and security issues. Additionally, they must use FortiSASE logs to identify potential threats and provide insights into incidents or abnormal behavior. The focus is on leveraging analytics for operational visibility and strengthening the organization's security posture.

Topic 2	<ul style="list-style-type: none"> • SASE Architecture and Components: This section of the exam measures the skills of Network Engineers and introduces the fundamentals of SASE within enterprise environments. Candidates are expected to understand the SASE architecture, identify FortiSASE components, and build deployment cases for real-world scenarios. The content emphasizes how SASE can be integrated into a hybrid network, showcasing secure design principles and the use of FortiSASE capabilities to support business and security objectives.
Topic 3	<ul style="list-style-type: none"> • SASE Deployment: This section of the exam measures the knowledge of Implementation Consultants and focuses on the practical aspects of deploying FortiSASE. Candidates will explore user onboarding methods, configuration of administration settings, and the application of security posture checks with compliance rules. The exam also includes key functions such as SIA, SSA, and SPA, alongside the design of security profiles that perform effective content inspection. By combining these tasks, learners demonstrate readiness to roll out secure and scalable deployments.
Topic 4	<ul style="list-style-type: none"> • Advanced FortiSASE Solutions: This section of the exam measures the expertise of Solution Architects and validates the ability to work with advanced FortiSASE features. It covers deployment of SD-WAN using FortiSASE, implementation of Zero Trust Network Access (ZTNA), and the overall role of FortiSASE in optimizing enterprise connectivity. The section highlights how these advanced solutions improve flexibility, enforce zero-trust principles, and extend security controls across distributed networks and cloud systems.

Fortinet FCSS - FortiSASE 25 Administrator Sample Questions (Q28-Q33):

NEW QUESTION # 28

Refer to the exhibit.

Daily report for application usage

FORTINET

User Productivity Application Usage

The FortiGuard research team categorizes applications into different categories based on the application behavioral characteristics, underlying technology, and the related traffic transaction characteristics. The categories allow for better application control. FortiGuard maintains thousands of application sensors and can even perform deep application inspection. For example, IT managers can get unprecedented visibility into filenames sent to the cloud or the titles of videos being streamed.

App Categories

Unknown	41.81%
Web.Client	22.86%
Network.Service	15.14%
General.Interest	12.00%
Collaboration	6.23%
Update	1.50%
Video/Audio	0.21%
Social.Media	0.18%
Email	0.07%

For application category details, see:

<http://www.fortinet.com/encyclopedia/application>

With the proliferation of cloud-based computing, enterprises are increasingly reliant on third parties for infrastructure plumbing. Unfortunately for enterprises, this means that their information is only as secure as the cloud provider's security. In addition, it can often introduce redundancy (if services are already available internally) and increase costs (if not monitored properly).

Cloud Usage (SaaS)

43.42% LinkedIn (22.85 KB)
26.67% Microsoft.O. (114.02 KB)
18.87% YouTube (9.93 KB)
11.04% Facebook (5.82 KB)

IT managers are often unaware of how many cloud-based services are in use within their organization. Sometimes, these applications can be used to circumvent or even replace corporate infrastructure already available to users in lieu of ease of use. Unfortunately, a potential side effect of this is that your sensitive corporate information could be transferred to the cloud. Accordingly, your data could be exposed if the cloud provider's security infrastructure is breached.

Cloud Usage (IaaS)

No matching log data for this report

The adoption of 'infrastructure as a service' (IaaS) platforms is popular and can be very useful when compute resources are limited or have specialized requirements. That said, the effective outsourcing of your infrastructure must be well regulated to prevent misuse. The occasional auditing of IaaS applications can be a useful exercise not only for security purposes, but also to minimize organizational costs associated with pay per use models or recurring subscription fees.

The daily report for application usage for internet traffic shows an unusually high number of unknown applications by category. What are two possible explanations for this? (Choose two.)

- A. Certificate inspection is not being used to scan application traffic.
- B. Deep inspection is not being used to scan traffic.
- C. The inline-CASB application control profile does not have application categories set to Monitor.
- D. The private access policy must be set to Security Events.

Answer: A,B

NEW QUESTION # 29

Your organization is currently using FortiSASE for its cybersecurity. They have recently hired a contractor who will work from the HQ office and who needs temporary internet access in order to set up a web-based point of sale (POS) system. What is the recommended way to provide internet access to the contractor?

- A. Use a tunnel policy with a contractor's user group as the source on FortiSASE to provide internet access.
- B. Use a proxy auto-configuration (PAC) file and provide secure web gateway (SWG) service as an explicit web proxy.
- C. Use the self-registration portal on FortiSASE to grant internet access.
- D. Use zero trust network access (ZTNA) and tag the client as an unmanaged endpoint.

Answer: C

Explanation:

The self-registration portal is the recommended method for granting temporary internet access to contractors or guests. It provides a simple and secure way for the contractor to authenticate and access the internet without requiring full endpoint management or policy configuration.

NEW QUESTION # 30

When accessing the FortiSASE portal for the first time, an administrator must select data center locations for which three FortiSASE components? (Choose three.)

- A. Endpoint management
- B. Logging
- C. Points of presence
- D. Identity & access management (IAM)
- E. Sandbox

Answer: A,B,E

Explanation:

When first accessing the FortiSASE portal, the administrator must select data center locations for endpoint management, logging, and sandbox services to ensure optimized performance and compliance with data residency requirements.

NEW QUESTION # 31

An organization must block user attempts to log in to non-company resources while using Microsoft Office 365 to prevent users from accessing unapproved cloud resources.

Which FortiSASE feature can you implement to meet this requirement?

- A. DNS filter with domain filter
- B. application control with inline-CASB
- C. web filter with inline-CASB
- D. data loss prevention (DLP) with Microsoft Purview Information Protection (MPIP)

Answer: B

Explanation:

Application control with inline-CASB allows FortiSASE to inspect and control application behavior at a granular level. This enables the organization to block login attempts to personal or non-corporate Microsoft Office 365 accounts, ensuring that only approved cloud resources are accessed.

NEW QUESTION # 32

What are the advantages of using automated scripts for bulk user registration in FortiSASE?

(Select all that apply)

- A. Streamlined user onboarding
- B. Consistent user credential management
- C. Increased risk of security breaches
- D. Reduced administrative overhead

Answer: A,B,D

NEW QUESTION # 33

.....

Quality of FCSS_SASE_AD-25 practice materials you purchased is of prior importance for consumers. Our FCSS_SASE_AD-25 practice materials make it easier to prepare exam with a variety of high quality functions. Their quality function is observably clear once you download them. We have three kinds of FCSS_SASE_AD-25 practice materials moderately priced for your reference. All these three types of FCSS_SASE_AD-25 practice materials win great support around the world and all popular according to

their availability of goods, prices and other term you can think of.
