## Microsoft Information Protection Administrator Sample Questions (Q28-Q33):

**NEW QUESTION # 28**

You have a Microsoft 365 E5 subscription that contains a Microsoft SharePoint Online site named Site1. Site1 contains a file named File1.

You have a retention policy named Retention1 that has the following settings:
- Retention items for a specific period
- Retention period: 5 years
- At the end of the retention period: Delete items automatically

Retention1 is applied to Site1.

You need to ensure that File1 is deleted automatically after seven years. The solution must NOT affect the retention of other files on Site1.

What should you do first?

- A. Create a new retention policy.
- B. Move File1 to a new folder and configure the access control list (ACL) entries for File1.
- C. Create and publish a new retention label.
- D. Move File1 to a new folder and list the excluded locations for Retention1.

**Answer: C**

Explanation:
Create and publish a new retention label is a solution to this since we want to create a new rule for one file named FIle1 in Site1, this file will then get retained for 7 years instead of 5 years.

**NEW QUESTION # 29**

You create a data loss prevention (DLP) policy that meets the following requirements:
Prevents guest users from accessing a sensitive document shared during a Microsoft Teams chat Prevents guest users from accessing a sensitive document stored in a Microsoft Teams channel Which location should you select for each requirement? To answer, select the appropriate options in the answer area.
NOTE: Each correct selection is worth one point.

**Answer:**

Explanation:
