1/7

What's more, part of that ExamsTorrent PDII dumps now are free: <https://drive.google.com/open?id=1ZUzOAO6EejBQd1xJQe1kHdnI9ObK2i4w>

The Salesforce PDII exam questions are being updated on a regular basis. As you know the PDII exam syllabus is being updated on a regular basis. To add all these changes in the PDII exam dumps we have hired a team of exam experts. They regularly update the Salesforce PDII Practice Questions as per the latest Salesforce PDII exam syllabus. So you have the option to get free PDII exam questions update for up to 1 year from the date of Salesforce PDII PDF dumps purchase.

The PDII certification exam consists of multiple-choice questions and hands-on exercises that test a developer's ability to solve real-world problems using Salesforce. Developers must complete a programming assignment that demonstrates their ability to create a custom application on the Salesforce platform. PDII exam also covers topics such as data modeling, security, and integration.

Salesforce PDII certification program is ideal for developers who have at least two years of experience in Salesforce development and have already passed the Salesforce Certified Platform Developer I (PD1) exam. The PDII Certification Exam tests a candidate's knowledge and expertise in areas such as Apex programming, Visualforce development, and Salesforce Lightning development. PDII exam is also designed to evaluate a candidate's proficiency in designing and implementing complex Salesforce solutions using advanced programming techniques.

Salesforce Platform Developer II Sample Questions (Q53-Q58):

NEW QUESTION # 53

Choose the correct definition for <apex:actionFunction>

- A. Signifies which components should be processed by the server when an AJAX request is generated
- B. Allows for controller methods to be called directly from Javascript. Must be encapsulated in tags. Unlike actionSupport, these functions can be called directly from Javascript code
- C. Sends an AJAX request according to the time interval you specify. If this ever gets re-rendered, it resets
- D. Can be associated with an AJAX request (actionFunction/actionSupport/actionPoller) and shows content conditionally depending on the status of the request (in progress/complete). Use the "id" field to specify name; use "status" field on related components to connect them
- E. Adds AJAX support to another component (e.g. onClick, onMouseUp, onFocus, etc.)

Answer: E

NEW QUESTION # 54

The head of recruiting at Universal Containers (UC) wants to provide all internal users the ability to search for open positions by role, department, and location via a new recruiting app. In addition to search, users of the app should be able to refer a friend, apply for a position, and review the status of their current submissions.

The app will be surfaced to UC's existing iOS and Android users via the standard mobile app that Salesforce provides. It has a custom user interface design and offline access is not required.

Given these requirements, what is the recommended approach to develop the app?

- A. Lightning Experience Builder
- B. Lightning Web Components
- C. Visualforce
- D. Salesforce SDK

Answer: B

NEW QUESTION # 55

Consider the Apex class below that defines a RemoteAction used on a Visualforce search page.

□ Which code snippet will assert that the remote action returned the correct Account?

- A. □
- B. □

Answer: A

NEW QUESTION # 56

Universal Containers needs to integrate with a Heroku service that resizes product images submitted by users.

What are two alternatives to implement the integration and protect against malicious calls to Heroku app's endpoint? Choose 2 answers

- A. Create a trigger that uses an @future Apex HTTP callout passing JSON serialized data; therefore the Heroku app can automatically reply back to the callout with the resized images in Salesforce.
- B. Create a Workflow Rule with an Outbound Message and select Send Session ID so that the Heroku app can use it to send the resized images back to Salesforce.
- C. Create a trigger that uses an @future Apex HTTP callout passing JSON serialized data and some form of pre-shared secret key. so that the Heroku app can authenticate requests and store the resized images in Salesforce.
- D. Create a Workflow Rule with an Outbound Message allowing the Heroku app to automatically store the resized images in Salesforce.
