Sample Questions (Q22-Q27):

NEW QUESTION # 22

Universal Containers (UC) has a flow which performs some custom logic in order to determine a least-cost shipping location. Some of the variables should be reset at the beginning of each loop iteration. Which design element in Flow allows the Admin to do this?

- A. Preset
- B. Reset
- C. Reassignment
- **D. Assignment**

Answer: D

Explanation:

The design element in Flow that allows the admin to reset some variables at the beginning of each loop iteration is Assignment. An Assignment element lets the admin assign new values to one or more variables or sObject fields in a flow. The admin can use an Assignment element before a Loop element to initialize the variables that are used in the loop, and then use another Assignment element inside the loop to reset the variables for each iteration. Verified Reference: https://help.salesforce.com/s/articleView?id=sf.flow_ref_elements_assignment.htm&type=5

NEW QUESTION # 23

An administrator is encountering errors when reusing a composite API call to load test orders via the Workbench. What are three possible causes of this issue?

- A. The Administrator has logged into the wrong environment in Workbench
- **B. Record IDs used within the request are incorrect**
- C. The administrator is creating multiple objects in a single JSON query
- **D. The number of subrequests in the JSON query exceeds the 20 subrequest limit**
- **E. The administrator has duplicate Product SKUs in the JSON query**

Answer: B,D,E

Explanation:

Three possible causes of this issue are:

The administrator has duplicate Product SKUs in the JSON query. A Product SKU is a unique identifier for a product that is used to track inventory and sales. A Product SKU must be unique within an org, and it cannot be duplicated in a composite API call. If the administrator has duplicate Product SKUs in the JSON query, it will cause an error when loading test orders via the Workbench.

The number of subrequests in the JSON query exceeds the 20 subrequest limit. A subrequest is a single HTTP request that is part of a composite API call. A composite API call can contain up to 20 subrequests in a single JSON body. If the administrator has more than 20 subrequests in the JSON query, it will cause an error when loading test orders via the Workbench.

Record IDs used within the request are incorrect. A record ID is a unique identifier for a record that is used to reference and manipulate data in Salesforce. A record ID must be valid and exist in the org, and it must match the data type and format of the corresponding field. If the administrator has incorrect record IDs in the JSON query, such as using 15-character IDs instead of 18-character IDs, or using IDs from a different org, it will cause an error when loading test orders via the Workbench.

NEW QUESTION # 24

Once the administrator has activated the integration between B2C Commerce and Order Management, orders being placed by customers will be sent to Order Management if the order status is set to which two values?

- A. Drafted
- **B. Active**
- **C. New**
- D. Open
- E. Created

Answer: B,C

Explanation:

Once the administrator has activated the integration between B2C Commerce and Order Management, orders being placed by customers will be sent to Order Management if the order status is set to Active or New. These are the two order statuses that indicate that an order has been created or confirmed by a customer, and that it needs to be processed by Order Management. Verified Reference: https://help.salesforce.com/s/articleView?id=sf.order_management_order_api.htm&type=5

NEW QUESTION # 25

The order object represents which two statements? (Choose 2)

- A. The initial exchange of funds for goods or services
- B. The customer's intent at the time of purchase
- C. The invoice data for accounting purposes
- D. An overall summary of the order being processed

Answer: A,B

NEW QUESTION # 26

What type of relationship exists between FulfillmentOrder and Order Delivery Method?

- A. One-to-One Lookup (Location) FulfillmentFrom LocationId
- B. Master-Detail (Order Delivery Method)
- C. Lookup (Order Delivery Method)
- D. Junction (Many to Many)

Answer: C

Explanation:

The type of relationship that exists between FulfillmentOrder and Order Delivery Method is Lookup (Order Delivery Method). A Lookup field is a type of custom field that creates a relationship between two objects, but does not support rollup summary fields. In this case, a FulfillmentOrder has a Lookup field named Order Delivery Method that references an Order Delivery Method record. An Order Delivery Method is a record that represents a delivery option for fulfilling orders, such as standard shipping, express shipping, in-store pickup, etc. An Order Delivery Method can have many FulfillmentOrders associated with it, but a FulfillmentOrder can only have one Order Delivery Method. Verified Reference: https://help.salesforce.com/s/articleView?id=sf.custom_field_types.htm&type=5
https://help.salesforce.com/s/articleView?id=sf.order_management_order_delivery_method.htm&type=5

NEW QUESTION # 27

.....

Our research materials will provide three different versions, the PDF version, the software version and the online version. Software version of the features are very practical, in order to meet the needs of some potential customers, we provide users with free experience, if you also choose the characteristics of practical, I think you can try to use our AP-219 test prep software version. I believe you have a different sensory experience for this version of the product. Because the software version of the product can simulate the real test environment, users can realize the effect of the atmosphere of the AP-219 Exam at home through the software version. Although this version can only run on the Windows operating system, our software version of the learning material is not limited to the number of computers installed and the number of users, the user can implement the software version on several computers. You will like the software version. Of course, you can also choose other learning mode of the AP-219 valid practice questions.
