Updated H35-211_V2.5 CBT - H35-211_V2.5 Exam Objectives Pdf

The majority of people encounter the issue of finding extraordinary Huawei H35-211_V2.5 exam dumps that can help them prepare for the actual Huawei H35-211_V2.5 Exam. They strive to locate authentic and up-to-date Huawei H35-211_V2.5 practice questions for the HCIP-Access V2.5 exam, which is a tough ask.

Huawei HCIP-Access V2.5 Sample Questions (Q116-Q121):

NEW QUESTION # 116

Huawei OLT supports device diagnosis based on service flows. Which of the following statements is incorrect?

- A. You need to set the information about the backup server.
- B. Service flow packet capturing is configured in the global configuration view.
- C. The number or duration for captured packets can be specified.
- D. Only packet headers are captured for data packets, and entire packets are captured for protocol packets.

Answer: A

NEW QUESTION # 117

When the Type C dual-home protection linkage uplink detection is enabled, if the OLT or the OLT uplink fails, the Type C dual-home protection can switch over to another OLT.

- A. False
- B. True

Answer: B

Explanation:

Type C GPON protection uses two different OLTs (dual-home). With uplink status linkage configured, a failure of the active OLT itself or its uplink interface triggers a protection switchover to the standby OLT to maintain service continuity for ONUs homed through the protected ODN.

References: HCIP-Access V2.5 Study Guide (Type C Dual-Home Protection and Uplink Linkage); Huawei OLT Protection Feature Description (Type C Protection Behavior and Switchover Conditions).

NEW QUESTION # 118

On Network Cloud Engine (NCE), both manual dump and automatic dump allow you to dump the performance data that meets the criteria to a file on the local disk.

- A. TRUE
- B. FALSE

Answer: A

Explanation:

NCE supports on-demand (manual) and policy-driven (automatic) performance data dumps. In both modes, data filtered by configured criteria is exported to files stored locally on the NCE server for subsequent analysis or archiving.

NEW QUESTION # 119

If a rogue ONU exists on a PON port of the OLT and has gone online, another ONT or all ONTs connected to the same PON port may go offline or go online and offline frequently.

- A. TRUE
- B. FALSE

Answer: A

NEW QUESTION # 120

Deploying an Ethernet port protection group in the upstream direction of the OLT can improve the reliability and the bandwidth of the uplink.

- A. TRUE
- B. FALSE

Answer: B

Explanation:

An Ethernet port protection group is a 1:1 protection mechanism that improves reliability through active /standby switching. It does not aggregate bandwidth-the standby port does not forward traffic unless a switchover occurs. If increased bandwidth is required, technologies such as LACP are used instead.

References: HCIP-Access V2.5 - Uplink Protection vs. Link Aggregation; OLT Ethernet Port Protection Group Feature Description.

NEW QUESTION # 121

.....

Have you imagined that you can use a kind of study method which can support offline condition besides of supporting online condition? The Software version of our H35-211_V2.5 training materials can work in an offline state. If you buy the Software version of our H35-211_V2.5 Study Guide, you have the chance to use our H35-211_V2.5 learning engine for preparing your exam when you are in an offline state. We believe that you will like the Software version of our H35-211_V2.5 exam questions.
