

# SAP C-ACDET-2506 Updated CBT - C-ACDET-2506 Exam Exercise

Most SAP C-ACDET-2506 exam dumps in the market are expensive, and candidates cannot afford them. However, SAP C-ACDET-2506 exam questions have fewer prices, and you can try the demo versions before purchasing. ActualVCE offers free updates for 365 days. SAP Certified Associate - Configuring SAP Ariba Strategic Sourcing Suite C-ACDET-2506 have latest exam book and latest exam questions and answers. You will get a handful of knowledge about topics that will benefit your professional career.

## SAP C-ACDET-2506 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"><li>• Project Overview, Roles and Responsibilities: This section of the exam measures the skills of an SAP Cloud Consultant and covers the fundamental understanding of SAP Activate methodology within the context of a cloud implementation project. Candidates are expected to be familiar with the project lifecycle, including phases such as Prepare, Explore, Realize, Deploy, and Run. This part also focuses on identifying key roles and responsibilities within a cloud project team, ensuring clarity in collaboration between consultants, clients, and SAP. It checks whether the consultant understands governance, stakeholder management, and the high-level structure of cloud deployment using SAP best practices.</li></ul>
Topic 2	<ul style="list-style-type: none"><li>• Deploy and Migration: This part of the exam assesses the expertise of an SAP Deployment Specialist and focuses on the final deployment of the configured solution and the data migration process. Candidates should demonstrate a solid grasp of how to move configurations from a testing environment into production while minimizing disruption. It also includes knowledge of tools and strategies used for data extraction.</li></ul>

Topic 3	<ul style="list-style-type: none"> <li>• <b>Field Configuration:</b> This domain evaluates the knowledge of an SAP Deployment Specialist and focuses on customizing and configuring business fields in the SAP system according to client-specific needs. This includes adjusting system settings for master data, transaction data, and other essential field-level controls to support business processes effectively. The section tests the candidate's ability to use configuration tools, apply SAP standard templates, and ensure that the field configurations align with the desired operational workflows of the business. It also touches upon validation, testing, and documenting the configuration changes made during the implementation.</li> </ul>

## 100% Pass Quiz Valid SAP - C-ACDET-2506 Updated CBT

Our C-ACDET-2506 exam guide question is recognized as the standard and authorized study materials and is widely commended at home and abroad. Our C-ACDET-2506 study materials boost superior advantages and the service of our products is perfect. We choose the most useful and typical questions and answers which contain the key points of the test and we try our best to use the least amount of questions and answers to showcase the most significant information. Our C-ACDET-2506 learning guide provides a variety of functions to help the clients improve their learning. For example, the function to stimulate the exam helps the clients test their learning results of the C-ACDET-2506 learning dump in an environment which is highly similar to the real exam.

### SAP Certified Associate - Configuring SAP Ariba Strategic Sourcing Suite Sample Questions (Q17-Q22):

#### NEW QUESTION # 17

How can you define default values on fields?

- **A. Set as Constants or Expressions based on other field values**
- B. Default values are not permitted
- C. Default values must be manually entered by the user
- D. Set only for Constant values

**Answer: A**

Explanation:

SAP Ariba allows you to define default values for fields either as static Constants or as dynamic Expressions based on other field values. Expressions use the Ariba expression language, supporting logical comparisons and operators to calculate defaults dynamically during data entry. This enables tailored defaulting logic that adapts to form context or user input. Default values are applied automatically by the system; users do not have to enter them manually unless they override the defaults. This flexibility improves data accuracy and user experience.

#### NEW QUESTION # 18

While working on editing a field for a customer, you notice that "Editable in full Contract Amendment" is not an option available in the advanced tab of field configuration. What is likely the cause for this behavior?  
(Select 2 correct answers)

- **A. The field you are customizing is not in the contract workspace or request classes.**
- B. A customization is in flight and needs to be cleared and reset prior to making this change.
- **C. The contract must be in an amendment state for this option to be visible in customizing.**
- D. The field you are customizing is standard and therefore cannot be changed.

**Answer: A,C**

Explanation:

The "Editable in full Contract Amendment" option in SAP Ariba is available only when the contract is in an amendment status, meaning this option appears contextually when the contract supports amendment workflows. If the contract is not in amendment state, the option remains hidden (A).

Additionally, this option is only relevant for fields that belong to the Contract Workspace or Request field classes; fields outside these

classes will not show amendment-specific editability options (C).

The presence or absence of this option is not related to ongoing customizations needing reset (B), nor is it restricted solely to custom or standard fields (D), as standard fields can also have this option if class- applicable.

#### NEW QUESTION # 19

When performing migration to production for a greenfield customer, which item needs to be made available in production prior to creating the migration in ICM?

- A. Approval Rules
- **B. Users**
- C. Locations
- D. Translations

**Answer: B**

#### NEW QUESTION # 20

The customer wants to have a field to hold Contract Storage Locations and the address. Those locations are loaded from an external system, and the user should be able to search for storage locations. What should be used to hold the valid storage locations?

- A. You should load a new Enumeration Type and call it Storage Location and load the location addresses. Create a new field of type Enumeration with a custom filter to only Enumerations of type show Storage Locations.
- B. Create a new field of type Date, where each date entry is tied to a unique Storage Location and its corresponding address, allowing users to select locations based on historical data entries.
- **C. You should create a new Flex Master Data (FMD) Template with appropriate attributes and call it Storage Location. Once the template is published and sample data loaded, you can create a custom field and select the type Storage Location.**
- D. Create a new field of type Text, with a custom Validation where the available Storage Locations are listed.

**Answer: C**

Explanation:

For managing searchable lists of storage locations with associated attributes like addresses, the best SAP Ariba practice is to use a Flex Master Data (FMD) Template. This allows you to model the storage locations and related information dynamically. After creating the FMD template and loading the data (e.g., from CSV imports), you can create a custom field referencing the FMD type. This approach enables users to search, filter, and select valid locations efficiently, while also allowing the underlying data to be maintained separately and updated independently of the configuration.

Using text fields with validation or enumerations is insufficient for large or dynamic datasets and doesn't scale well. Date fields are unrelated to this scenario.

FMD provides a scalable and flexible solution for complex master data requirements like storage locations.

#### NEW QUESTION # 21

In a Greenfield deployment scenario, how should translation migrations be performed for header field labels, help tips, and validity condition error messages?

- A. User with Partner Administrator can configure translation.
- B. Create a package to migrate translations by ICM.
- C. Contact an SAP Deployment lead for customization help.
- **D. Translations are included in migrations and are listed as AMLStringResource in the migration**

**Answer: D**

#### NEW QUESTION # 22

.....

Nothing venture, nothing have. Many people know SAP certification will be a big effect for their career, but IT exams are difficult to pass as everyone knows. I want to introduce you our best products C-ACDET-2506 latest exam cram file which is famous for its

100% pass-rate. Candidates from all over the world choose us and clear their exams certainly with only little cost fee and 15-30 hours preparation before the exam. C-ACDET-2506 Latest Exam Cram file is useful and valid.
