Sie können auch ein IT-Spezialist mit Microsoft MD-102 Prüfungszeugnis werden!

Microsoft Endpoint Administrator MD-102 Prüfungsfragen mit Lösungen (Q214-Q219):

214. Frage

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

Your company has an Azure AD tenant named contoso.com that contains several Windows 10 devices.

When you join new Windows 10 devices to contoso.com, users are prompted to set up a four-digit pin.

You need to ensure that the users are prompted to set up a six-digit pin when they join the Windows 10 devices to contoso.com.

Solution: From the Microsoft Entra admin center, you configure the Authentication methods.

Does this meet the goal?

- A. Yes
- B. No

Antwort: B

215. Frage

You have 100 computers that run Windows 10 and connect to an Azure Log Analytics workspace.

Which three types of data can you collect from the computers by using Log Analytics? Each correct answer a complete solution.

NOTE: Each correct selection is worth one point.

- A. error events from the System log
- B. the list of processes and their execution times
- C. failure events from the Security log
- D. the average processor utilization
- E. third-party application logs stored as text files

Antwort: A,D,E

216. Frage

Drag and Drop Question

You have five computers that runs Windows 10.

You need to create a provisioning package to configure the computers to meet the following requirements:

- Run an interactive app.
- Automatically sign in by using a local user account.
- Prevent users from accessing the desktop and running other applications.

Which four actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Actions

Apply the provisioning package.

Run the Provision desktop devices project.

Copy the provisioning package to each computer.

Run the Provision kiosk devices project.

Install the Microsoft Deployment Toolkit (MDT).

Enable Microsoft User Experience Virtualization (UE-V).

Install the Windows Configuration Designer.

Answer Area

Microsoft

^

v

Antwort:

Begründung:

Explanation:

Step 1: Install Windows Configuration Designer

On devices running Windows client, you can install the Windows Configuration Designer app from the Microsoft Store.

Step 2: Run the Provision kiosk devices project.

A single-app kiosk uses the Assigned Access feature to run a single app above the lock screen.

When the kiosk account signs in, the app is launched automatically. The person using the kiosk cannot do anything on the device outside of the kiosk app.

Step 3: Copy the provisioning package to each computer.

Provisioning packages can be applied to client devices during the first-run experience (out-of-box experience or "OOBE") and after ("runtime").

Step 4: Apply the provisioning package.

Apply the provisioning package to a device running Windows client.

217. Frage

You have a Microsoft 365 E5 subscription that contains 10 Android Enterprise devices. Each device has a corporate-owned work profile and is enrolled in Microsoft Intune.

You need to configure the devices to run a single app in kiosk mode.

Which Configuration settings should you modify in the device restrictions profile?

- A. Users and Accounts
- **B. Device experience**
- C. General
- D. System security

Antwort: B

Begründung:

Explanation

To configure the devices to run a single app in kiosk mode, you need to modify the Device experience settings in the device restrictions profile. You can specify the app package name and activity name for the app that you want to run in kiosk mode.
