## SC-400유효한 덤프자료 & SC-400최신 덤프샘플문제 다운

Pass4Test에서는 소프트웨어버전과 PDF버전 두 가지 버전으로 덤프를 제공해드립니다. PDF버전은 구매사이트에서 무료샘플을 다운받아 체험 가능합니다. 소프트웨어버전은 실력테스트용으로 PDF버전 공부 후 보조용으로 사용 가능합니다. Microsoft 인증SC-400덤프 무료샘플을 다운받아 체험해보세요.

SC-400 시험은 Microsoft 365 기술을 다루는 경험이 있으며 정보 보호 개념과 관행에 대한 튼튼한 이해를 가진 개인을 대상으로 합니다. 이 시험은 사이버 보안 및 컴플라이언스 역할을 수행하는 개인뿐만 아니라 조직 내 민감한 데이터를 관리하고 보호하는 책임이 있는 개인에게 특히 적합합니다. 이 시험은 Microsoft Azure Information Protection, Microsoft Cloud App Security 및 Microsoft 365 컴플라이언스 솔루션을 비롯한 Microsoft 도구와 기술을 사용하여 정보 보호 솔루션을 설계, 구현 및 관리할 수 있는 능력을 평가합니다. Microsoft SC-400 시험을 통과함으로써 후보자는 정보 보호 분야에서의 전문성을 입증하고 컴플라이언스 및 사이버 보안 분야에서의 경력 전망을 향상 시킬 수 있습니다.

## 최신 Microsoft Certified: Information Protection Administrator Associate SC-400 무료샘플문제 (Q195-Q200):

질문 # 195

You have a Microsoft 365 subscription.

You create and run a content search from the Microsoft Purview compliance portal.

You need to download the results of the content search.

What should you obtain first?

- A. a password
- B. a certificate
- C. an export key
- D. a pin

정답: C

설명:

<https://learn.microsoft.com/en-us/purview/ediscovery-export-search-results#step-2-download-the-search-results>

## 질문 # 196

Case Study 1 - Fabrikam, Inc

Overview

Fabrikam, Inc. is a consulting company that has a main office in Montreal and six branch offices in New York, Seattle, Miami, Houston, Los Angeles, and Vancouver.

Existing Environment

Cloud Environment

Fabrikam has a Microsoft 365 tenant that contains the following resources:

An Azure Active Directory (Azure AD) tenant that syncs to an on-premises Active Directory domain named corp.fabrikam.com  
Microsoft Cloud App Security connectors configured for all supported cloud applications used by the company  
Some users have company Dropbox accounts.

Compliance Configuration

Fabrikam has the following in the Microsoft 365 compliance center:

A data loss prevention (DLP) policy is configured. The policy displays a tooltip to users. Users can provide a business justification to override a DLP policy violation.

The Azure Information Protection unified labeling scanner is installed and configured.

A sensitivity label named Fabrikam Confidential is configured.

An existing third-party records management system is managed by the compliance department.

Human Resources (HR) Management System

The HR department has an Azure SQL database that contains employee information. Each employee has a unique 12-character alphanumeric ID. The database contains confidential employee attributes including payroll information, date of birth, and personal contact details.

On-Premises Environment

You have an on-premises file server that runs Windows Server 2019 and stores Microsoft Office documents in a shared folder named Data.

All end-user computers are joined to the corp.fabrikam.com domain and run a third-party antimalware application.

Business Processes

Sales Contracts

Users in the sales department receive draft sales contracts from customers by email. The sales contracts are written by the customers and are not in a standard format.

Employment Applications

Employment applications and resumes are received by HR department managers and stored in either mailboxes, Microsoft SharePoint Online sites, OneDrive for Business folders, or Microsoft Teams channels.

The employment application form is downloaded from SharePoint Online and a serial number is assigned to each application.

The resumes are written by the applicants and are in any format.

Requirements

HR Requirements

You need to create a DLP policy that will notify the HR department of a DLP policy violation if a document that contains confidential employee attributes is shared externally. The DLP policy must use an Exact Data Match (EDM) classification derived from a CSV export of the HR department database.

The HR department identifies the following requirements for handling employment applications:

Resumes must be identified automatically based on similarities to other resumes received in the past.

Employment applications and resumes must be deleted automatically two years after the applications are received.

Documents and emails that contain an application serial number must be identified automatically and marked as an employment application.

Sales Requirements

A sensitivity label named Sales Contract must be applied automatically to all draft and finalized sales contracts.

#### Compliance Requirements

Fabrikam identifies the following compliance requirements:

All DLP policies must be applied to computers that run Windows 10, with the least possible changes to the computers.

Users in the compliance department must view the justification provided when a user receives a tooltip notification for a DLP violation.

If a document that has the Fabrikam Confidential sensitivity label applied is uploaded to Dropbox, the file must be deleted automatically.

The Fabrikam Confidential sensitivity label must be applied to existing Microsoft Word documents in the Data shared folder that have a document footer containing the following string: Company use only.

Users must be able to manually select that email messages are sent encrypted. The encryption will use Office 365 Message Encryption (OME) v2. Any email containing an attachment that has the Fabrikam Confidential sensitivity label applied must be encrypted automatically by using OME.

Existing policies configured in the third-party records management system must be replaced by using Records management in the Microsoft 365 compliance center. The compliance department plans to export the existing policies, and then produce a CSV file that contains matching labels and policies that are compatible with records management in Microsoft 365.

The CSV file must be used to configure records management in Microsoft 365.

#### Executive Requirements

You must be able to restore all email received by Fabrikam executives for up to three years after an email is received, even if the email was deleted permanently.

You need to recommend a solution that meets the Data Loss Prevention requirements for the HR department.

Which three actions should you perform? Each correct answer presents part of the solution.

(Choose three.)

NOTE: Each correct selection is worth one point.

- A. Create a sensitive info type rule package that contains regular expressions.
- B. **Create a sensitive info type rule package that contains the EDM classification.**
- C. Define the sensitive information database schema in the CSV format.
- D. **Schedule EdmUploadAgent.exe to hash and upload a data file that contains employee information.**
- E. Define the sensitive information database schema in the XML format.

**정답: B,D,E**

### 질문 # 197

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You recently discovered that the developers at your company emailed Azure Storage keys in plain text to third parties.

You need to ensure that when Azure Storage keys are emailed, the emails are encrypted.

Solution: You create a data loss prevention (DLP) policy that has only the Exchange email location selected.

Does this meet the goal?

- A. Yes
- **B. No**

**정답: B**

#### 설명:

Topic 1, Fabrikam, Case Study

#### Overview

This is a case study. Case studies are not timed separately. You can use as much exam time as you would like to complete each. There may be additional case studies and sections on this exam. You must manage your time to ensure that you are able to complete all included on this exam in the time provided.

To answer the questions included in a case study, you will need reference information that is provided in the case study. Case

studies might contain exhibits and other resources that provide more information about the scenario that is described in the case study. Each question is independent of the other questions in this case study.

At the end of this case study, a review screen will appear. This screen allows you to review your answers and to make changes before you move to the next section of the exam. After you begin a new section, you cannot return to this section.

#### To start the case study

To display the first question in this case study, click the Next button. Use the buttons in the left pane to explore the content of the case study before you answer the questions. Clicking these buttons displays information such as business requirements, existing environment, and problem statements. If the case study has an All Information tab, note that the information displayed is identical to the information displayed on the subsequent tabs. When you are ready to answer a question, click the Question button to return to the question.

#### Cloud Environment

Fabrikam has a Microsoft 365 tenant that contains the following resources:

- \* An Azure Active Directory (Azure AD) tenant that syncs to an on-premises Active Directory domain named corp.fabrikam.com
- \* Microsoft Cloud App Security connectors configured for all supported cloud applications used by the company. Some users have company Dropbox accounts.

#### Compliance Configuration

Fabrikam has the following in the Microsoft 365 compliance center:

- \* A data loss prevention (DLP) policy is configured. The policy displays a tooltip to users. Users can provide a business justification to override a DLP policy violation.
- \* The Azure information Protection unified labeling scanner is installed and configured.
- \* A sensitivity label named Fabrikam Confidential is configured.

An existing third-party records management system is managed by the compliance department.

#### Human Resources (HR) Management System

The HR department has an Azure SQL database that contains employee information. Each employee has a unique 12-character alphanumeric ID. The database contains confidential employee attributes including payroll information, date of birth, and personal contact details.

#### On-premises Environment

You have an on-premises file server that runs Windows Server 2019 and stores Microsoft Office documents in a shared folder named Data.

All end-user computers are joined to the corp.fabrikam.com domain and run a third-party antimalware application.

#### Sales Contracts

Users in the sales department receive draft sales contracts from customers by email. The sales contracts are written by the customers and are not in a standard format.

#### Employment Applications

Employment applications and resumes are received by HR department managers and stored in either mailboxes, Microsoft SharePoint Online sites, OneDrive for Business folders, or Microsoft Teams channels.

The employment application form is downloaded from SharePoint Online and a serial number is assigned to each application. The resumes are written by the applications and in any format.

#### HR Requirements

You need to create a DLP policy that will notify the HR department of a DLP policy violation if a document that contains confidential employee attributes is shared externally. The DLP policy must use an Exact Data Match (EDM) classification derived from a CSV export of the HR department database.

The HR department identifies the following requirements for handling employment applications:

- \* Resumes must be identified automatically based on similarities to other resumes received in the past.
- \* Employment applications and resumes must be deleted automatically two years after the applications are received.
- \* Documents and emails that contain an application serial number must be identified automatically and marked as an employment application.

#### Sales Requirements

A sensitivity label named Sales Contract must be applied automatically to all draft and finalized sales contracts.

#### Compliance Requirements

Fabrikam identifies the following compliance requirements:

- \* All DLP policies must be applied to computers that run Windows 10, with the least possible changes to the computers.
- \* Users in the compliance department must view the justification provided when a user receives a tooltip notification for a DLP violation.
- \* If a document that has the Fabrikam Confidential sensitivity label applied is uploaded to Dropbox, the file must be deleted automatically. - The Fabrikam Confidential sensitivity label must be applied to existing Microsoft Word documents in the Data shared folder that have a document footer containing the following string: Company use only.
- \* Users must be able to manually select that email messages are sent encrypted. The encryption will use Office 365 Message Encryption (OME) v2. Any email containing an attachment that has the Fabrikam Confidential sensitivity label applied must be encrypted automatically by using OME.

Microsoft 365 compliance center. The compliance department plans to export the existing policies, and then produce a CSV file that contains matching labels and policies that are compatible with records management in Microsoft 365. The CSV file must be used to configure records management in Microsoft 365.

#### Executive Requirements

You must be able to restore all email received by Fabrikam executives for up to three years after an email is received, even if the email was deleted permanently.

#### 질문 # 198

You need to recommend a solution that meets the compliance requirements for Dropbox.

What should you recommend?

- A. Edit an existing retention label that enforces the item deletion settings.
- B. **Create a file policy in Microsoft Defender for Cloud Apps that uses the built-in DLP inspection method.**
- C. Create a retention label that enforces the item deletion settings.
- D. Create a DLP policy that applies to devices.

정답: B

#### 질문 # 199

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.
