

# F5CAB3 Valid Test Cost | F5CAB3 Testking

**SPOTO**

Our F5CAB3 exam questions have the merits of intelligent application and high-effectiveness to help our clients study more leisurely. If you prepare with our F5CAB3 actual exam for 20 to 30 hours, the F5CAB3 exam will become a piece of cake in front of you. Not only you will find that to study for the exam is easy, but also the most important is that you will get the most accurate information that you need to pass the F5CAB3 Exam.

The PDF version of our F5 F5CAB3 exam materials has the advantage that it can be printable. After printing, you not only can bring the F5CAB3 study guide with you wherever you go since it does not take a place, but also can make notes on the paper at your liberty, which may help you to understand the contents of our BIG-IP Administration Data Plane Configuration F5CAB3 learning prep better.

## 2026 F5 F5CAB3: BIG-IP Administration Data Plane Configuration – Trustable Valid Test Cost

The F5 F5CAB3 Certification Exam is one of the top-rated career advancement certifications in the market. With the BIG-IP Administration Data Plane Configuration F5CAB3 certification exam everyone can validate their skills and knowledge after passing the F5CAB3 text. The F5 BIG-IP Administration Data Plane Configuration certification exam will recognize your expertise and knowledge in the market. You will get solid proof of your proven skill set. There are other countless benefits that you can gain after passing the F5 BIG-IP Administration Data Plane Configuration certification exam.

### F5 BIG-IP Administration Data Plane Configuration Sample Questions (Q33-Q38):

#### NEW QUESTION # 33

A BIG-IP Administrator configures an SSH pool with five members. Which health monitor should be applied?

- A. HTTPS
- B. HTTP
- **C. TCP**
- D. UDP

**Answer: C**

Explanation:

SSH is a TCP-based service. A TCP monitor validates service availability without requiring application-layer inspection.

## NEW QUESTION # 34

Refer to the exhibit.

The image shows a screenshot of a BIG-IP Virtual Server configuration interface. The top navigation bar says 'Visit Us: Brave-Dumps.com'. The main area is titled 'General Properties'.

Name	VS-DNS
Partition / Path	Common
Description	[Empty]
Type	Standard
Source Address	192.168.100.0/23
Destination Address/Mask	192.168.21.50
Service Port	53, Other
Notify Status to Virtual Address	<input checked="" type="checkbox"/>
Link	None
Availability	<input checked="" type="checkbox"/> Unknown (Enabled) - The children pool member(s) are
Syncookie Status	Off
State	Enabled

Below this is a 'Configuration' section with a dropdown set to 'Advanced'.

Protocol	TCP
Protocol Profile (Client)	tcp
Protocol Profile (Server)	(Use Client Profile)

DNS queries from two internal DNS servers are being load-balanced to external DNS servers via a virtual server on a BIG-IP device. The DNS queries originate from:

192.168.10.100

192.168.10.200

and target:

192.168.2.150

All DNS queries destined for the external DNS servers fail.

Which property change should the BIG-IP Administrator make in the Virtual Server to resolve this issue? (Choose one answer)

- A. Protocol to UDP
- B. Source Address to 192.168.10.0/24
- C. Type to Performance (HTTP)
- D. Protocol profile (Client) to DNS\_OPTIMIZED

**Answer: A**

Explanation:

DNS traffic is primarily transported using UDP port 53. In the exhibit, the Virtual Server is configured with the Protocol set to TCP, which prevents standard DNS queries from being processed correctly. BIG-IP Virtual Servers must be configured with the correct Layer 4 protocol to match the application traffic they are handling.

According to the BIG-IP Administration: Data Plane Configuration documentation:

The Protocol setting on a Virtual Server defines whether traffic is processed as TCP, UDP, or another supported transport protocol. Standard DNS queries and responses use UDP, while TCP is only required for DNS zone transfers (AXFR) or exceptionally large responses.

When a DNS Virtual Server is incorrectly configured with TCP, UDP-based DNS queries are dropped, causing all requests to fail.

Why the other options are incorrect:

A . Protocol profile (Client) to DNS\_OPTIMIZED

A DNS profile enhances DNS functionality but does not correct an incorrect transport protocol configuration.

B . Type to Performance (HTTP)

Performance (HTTP) Virtual Servers are designed for HTTP traffic and are not suitable for DNS services.

C . Source Address to 192.168.10.0/24

The existing source IPs already fall within the allowed range, so this setting does not address the failure.

Correct Resolution:

Changing the Protocol to UDP aligns the Virtual Server with standard DNS transport requirements, allowing DNS queries to be successfully processed and load-balanced.

### NEW QUESTION # 35

A BIG-IP Administrator uses backend servers to host multiple services per server. There are multiple virtual servers and pools defined, referencing the same backend servers.

Which load balancing algorithm is most appropriate to have an equal number of connections on each backend server? (Choose one answer)

- A. Predictive (member)
- B. Predictive (node)
- C. Least Connections (node)
- D. Least Connections (member)

**Answer: C**

Explanation:

In this scenario, each backend node (server) hosts multiple services and is referenced by multiple pools and virtual servers. The goal is to ensure an equal number of total connections per backend server, regardless of how many pool members (services/ports) exist on that server.

According to the BIG-IP Administration: Data Plane Configuration documentation:

Least Connections (node) tracks the total number of active connections to a node across all pool members and services.

This algorithm ensures load distribution is balanced at the server level, not just at the individual service (member) level.

It is specifically recommended when:

Multiple pool members exist on the same backend server

Multiple virtual servers reference the same backend servers

Why the other options are incorrect:

B . Predictive (member)

Predictive algorithms are advanced and traffic-pattern based, but they operate at the member level and do not guarantee equal connections per server.

C . Least Connections (member)

This balances connections per pool member, which can overload a server hosting multiple members while still appearing "balanced" per member.

D . Predictive (node)

Although node-aware, predictive algorithms are less deterministic and not the best choice when strict equality of connections is required.

Correct Resolution:

Using Least Connections (node) ensures that each backend server carries an equal connection load across all services and pools.

### NEW QUESTION # 36

An organization reports slow performance accessing an Intranet website. All employees use a single proxy IP.

What should the BIG-IP Administrator do?

- A. Change Source Address to proxy IP
- B. Change Fallback Persistence to source\_addr
- C. Change Load Balancing to Least Connections
- D. Change Default Persistence to cookie

**Answer: D**

Explanation:

When many users share one source IP, source-address persistence fails. Cookie persistence uniquely identifies clients at Layer 7.

## NEW QUESTION # 37

A Standard Virtual Server for a web application is configured with SNAT Automap. The original client IP must be known by backend servers.

What should the BIG-IP Administrator configure?

- A. HTTP Transparent profile
- B. SNAT pool using client IP
- **C. HTTP profile with X-Forwarded-For**
- D. Performance (HTTP) Virtual Server

**Answer: C**

Explanation:

X-Forwarded-For inserts the original client IP into HTTP headers while SNAT is enabled.

## NEW QUESTION # 38

.....

To make sure you have all the practice you need, our F5CAB3 practice test also includes numerous opportunities for you to put your skills to the F5CAB3 test. Our F5 F5CAB3 practice exams simulate the real thing, so you can experience the pressure and environment of the actual BIG-IP Administration Data Plane Configuration (F5CAB3) test before the day arrives. You'll receive detailed feedback on your performance, so you know what areas to focus on and improve. At the ITCertMagic, we're committed to your success and believe in the effectiveness of our F5CAB3 exam dumps.
