What is your dream? Don't you want to make a career? The answer must be ok. Then, you need to upgrade and develop yourself. You worked in the IT industry, through what methods can you realize your dream? Taking IT certification exam and getting the certificate are the way to upgrade yourself. At present, Microsoft DP-700 Exam is very popular. Do you want to get Microsoft DP-700 certificate? If it is ok, don't hesitate to sign up for the exam. And don't worry about how to pass the test, BraindumpsPass certification training will be with you.

Microsoft DP-700 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"> Implement and manage an analytics solution: This section of the exam measures the skills of Microsoft Data Analysts regarding configuring various workspace settings in Microsoft Fabric. It focuses on setting up Microsoft Fabric workspaces, including Spark and domain workspace configurations, as well as implementing lifecycle management and version control. One skill to be measured is creating deployment pipelines for analytics solutions.
Topic 2	<ul style="list-style-type: none"> Ingest and transform data: This section of the exam measures the skills of Data Engineers that cover designing and implementing data loading patterns. It emphasizes preparing data for loading into dimensional models, handling batch and streaming data ingestion, and transforming data using various methods. A skill to be measured is applying appropriate transformation techniques to ensure data quality.

Topic 3	<ul style="list-style-type: none"> • Monitor and optimize an analytics solution: This section of the exam measures the skills of Data Analysts in monitoring various components of analytics solutions in Microsoft Fabric. It focuses on tracking data ingestion, transformation processes, and semantic model refreshes while configuring alerts for error resolution. One skill to be measured is identifying performance bottlenecks in analytics workflows.

Microsoft DP-700 Pass4sure Study Materials | DP-700 Pdf Demo Download

At BraindumpsPass, we understand your needs when it comes to passing the Implementing Data Engineering Solutions Using Microsoft Fabric (DP-700) Certification exam. If you prefer studying at home for the DP-700 Exam, we have got you covered. BraindumpsPass offers DP-700 exam questions in PDF format, which can be easily downloaded and accessed on all your devices. Moreover, the Microsoft DP-700 Actual Questions PDF file will be available for immediate download right after your purchase, eliminating any waiting time.

Microsoft Implementing Data Engineering Solutions Using Microsoft Fabric Sample Questions (Q92-Q97):

NEW QUESTION # 92

You have a Fabric workspace that contains a semantic model named Modell. You need to monitor the refresh history of Model 1 and visualize the refresh history in a chart. What should you use?

- A. the refresh history from the settings of Modell.
- B. a Dataflow Gen2 dataflow
- C. a data pipeline
- D. a notebook

Answer: A

NEW QUESTION # 93

You have a Google Cloud Storage (GCS) container named storage1 that contains the files shown in the following table.

□ You have a Fabric workspace named Workspace1 that has the cache for shortcuts enabled. Workspace1 contains a lakehouse named Lakehouse1. Lakehouse1 has the shortcuts shown in the following table.

□ You need to read data from all the shortcuts.

Which shortcuts will retrieve data from the cache?

- A. Products, Stores, and Trips
- B. Products only
- C. Stores only
- D. Stores and Products only
- E. Trips only
- F. Products and Trips only

Answer: D

Explanation:

When reading data from shortcuts in Fabric (in this case, from a lakehouse like Lakehouse1), the cache for shortcuts helps by storing the data locally for quick access. The last accessed timestamp and the cache expiration rules determine whether data is fetched from the cache or from the source (Google Cloud Storage, in this case).

Products: The ProductFile.parquet was last accessed 12 hours ago. Since the cache has data available for up to 12 hours, it is likely that this data will be retrieved from the cache, as it hasn't been too long since it was last accessed.

Stores: The StoreFile.json was last accessed 4 hours ago, which is within the cache retention period. Therefore, this data will also be retrieved from the cache.

Trips: The TripsFile.csv was last accessed 48 hours ago. Given that it's outside the typical caching window (assuming the cache has a maximum retention period of around 24 hours), it would not be retrieved from the cache. Instead, it will likely require a fresh read from the source.

NEW QUESTION # 94

You have a Fabric workspace.

You are debugging a statement and discover the following issues:

You need to resolve the issues. The solution must ensure that the data types of the results are retained. The results can contain blank cells.

How should you complete the statement? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

NEW QUESTION # 95

Your company has a sales department that uses two Fabric workspaces named Workspace1 and Workspace2.

The company decides to implement a domain strategy to organize the workspaces.

You need to ensure that a user can perform the following tasks:

Create a new domain for the sales department.

Create two subdomains: one for the east region and one for the west region.

Assign Workspace1 to the east region subdomain.

Assign Workspace2 to the west region subdomain.

The solution must follow the principle of least privilege.

Which role should you assign to the user?

- A. domain contributor
- B. workspace Admin
- C. Fabric admin
- **D. domain admin**

Answer: D

Explanation:

To implement a domain strategy and manage subdomains within Fabric, the domain admin role is the appropriate role for the user. A domain admin has the permissions necessary to:

Create a new domain (for the sales department).

Create subdomains (for the east and west regions).

Assign workspaces (such as Workspace1 and Workspace2) to the appropriate subdomains.

The domain admin role allows for managing the structure and organization of workspaces in the context of domains and subdomains while maintaining the principle of least privilege by limiting the user's access to managing the domain structure specifically.

NEW QUESTION # 96

You need to ensure that the authors can see only their respective sales data.

How should you complete the statement? To answer, drag the appropriate values to the correct targets. Each value may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content NOTE: Each correct selection is worth one point.

Answer:
