

Free PDF Quiz International Code Council - Accurate Valid Fire-Inspector-II Test Book

BTW, DOWNLOAD part of Exam4Tests Fire-Inspector-II dumps from Cloud Storage: https://drive.google.com/open?id=1PnGl_5c7u0sLVg5pxaFhV04YcEJ1Po2d

The Exam4Tests 67 - Fire Inspector II Exam (Fire-Inspector-II) PDF dumps file work with all devices and operating system. You can easily install 67 - Fire Inspector II Exam (Fire-Inspector-II) exam questions file on your desktop computer, laptop, tabs, and smartphone devices and start 67 - Fire Inspector II Exam (Fire-Inspector-II) exam dumps preparation without wasting further time. Whereas the other two Exam4Tests International Code Council Fire-Inspector-II Practice Test software is concerned, both are the mock 67 - Fire Inspector II Exam (Fire-Inspector-II) exam that will give you a real-time Fire-Inspector-II practice exam environment for preparation.

The 67 - Fire Inspector II Exam (Fire-Inspector-II) certification exam is one of the hottest and most industrial-recognized credentials that has been inspiring beginners and experienced professionals since its beginning. With the Fire-Inspector-II certification exam successful candidates can gain a range of benefits which include career advancement, higher earning potential, industrial recognition of skills and job security, and more career personal and professional growth.

Fire-Inspector-II exam dumps & Fire-Inspector-II torrent pdf & Fire-Inspector-II training guide

In modern society, you cannot support yourself if you stop learning. That means you must work hard to learn useful knowledge in order to survive especially in your daily work. Our Fire-Inspector-II study materials are filled with useful knowledge, which will

broaden your horizons and update your skills. Lack of the knowledge cannot help you accomplish the tasks efficiently. If you are still in colleges, it is a good chance to learn the knowledge of the Fire-Inspector-II Study Materials because you have much time.

International Code Council 67 - Fire Inspector II Exam Sample Questions (Q30-Q35):

NEW QUESTION # 30

Foamed plastics or materials containing foamed plastics used for stage scenery must be approved when tested in accordance with

- A. UL 1975
- B. CPSC 16CFR
- C. ASTM D 1784
- D. NFPA 11A

Answer: A

Explanation:

Foamed plastics or materials containing foamed plastics used for stage scenery must meet strict fire performance requirements to prevent rapid flame spread and fire hazards in assembly occupancies.

The correct fire test standard for these materials is UL 1975 - Standard for Fire Tests for Foamed Plastics Used for Decorative Purposes.

Reference to Fire Inspector Documentation:

1. 2021 International Fire Code (IFC) - Section 807.4.2 (Foamed Plastics for Stage Scenery) IFC 807.4.2 states that foamed plastics used in scenery must be tested and approved per UL 1975 to ensure fire safety.

2. UL 1975 - Standard for Fire Tests for Foamed Plastics Used for Decorative Purposes This standard evaluates the flammability and smoke production of foamed plastics used in decorative applications, including stage scenery.

Detailed Explanation of Answer Choices:

Option A (Correct): UL 1975 is the required test standard for foamed plastics used in stage scenery, ensuring compliance with IFC 807.4.2.

Option B (Incorrect): NFPA 11A deals with foam-water fire suppression systems, not foamed plastics for decorative use.

Option C (Incorrect): CPSC 16CFR relates to consumer product safety regulations but does not address fire safety for foamed plastics on stage scenery.

Option D (Incorrect): ASTM D 1784 is a test for rigid PVC plastics and does not apply to foamed plastics used for stage scenery. Thus, the correct and verified answer is: A. UL 1975.

NEW QUESTION # 31

The maximum travel distance permitted in a one-story, Group F-2 building equipped with automatic sprinklers and automatic smoke and heat roof vents is ___ ft.

- A. 0
- B. 1
- C. 2
- D. 3

Answer: C

Explanation:

The maximum travel distance allowed in a one-story Group F-2 (Factory Industrial - Low Hazard) occupancy with automatic sprinklers and automatic smoke and heat vents is regulated by 2021 International Fire Code (IFC) Table 1017.2 - Exit Access Travel Distance.

IFC Table 1017.2 - Maximum Travel Distance:

For a Group F-2 occupancy equipped with an automatic sprinkler system, the maximum allowable exit access travel distance is 400 feet.

However, when automatic smoke and heat vents are installed, the travel distance is limited to 350 feet.

This is because while the sprinklers control fire spread, smoke and heat vents help with smoke control, allowing for extended egress distances but not as much as without them.

Why Other Options Are Incorrect?

A: 250 ft. - Too restrictive; the IFC allows a longer travel distance in this scenario.

B: 300 ft. - Less than the allowed 350 ft.

D: 400 ft. - Only applicable without smoke and heat vents.

NEW QUESTION # 32

A building under construction which has two stairways shall have a minimum of how many fire extinguishers per floor?

- A. 0
- B. 1
- C. 2
- **D. 3**

Answer: D

Explanation:

Reference to Fire Extinguisher Requirements in Buildings Under Construction:

NFPA 241 (Standard for Safeguarding Construction, Alteration, and Demolition Operations) Section 13.6.1 and IFC 3309.1 require that:

A minimum of one fire extinguisher per floor is required.

Additional extinguishers are required based on stairwells and floor area.

If a building under construction has two stairways, a minimum of two fire extinguishers must be provided per floor to ensure adequate fire protection coverage.

Fire Safety Considerations for Construction Sites:

Construction sites pose a high fire risk due to temporary electrical systems, combustible materials, and lack of finished fire suppression systems.

Fire extinguishers must be readily available and evenly distributed near exit stairways and pathways for rapid access in case of an emergency.

Clarification of Incorrect Answer Choices:

A: 1 # Incorrect

One extinguisher is the minimum required for floors with only one exit/stairway, but a building with two stairways requires at least two extinguishers.

C: 3 # Incorrect

While more extinguishers can be added for larger areas or high-risk work zones, the minimum requirement remains two for two stairwells.

D: 4 # Incorrect

There is no general requirement for four extinguishers per floor unless dictated by floor size and hazard level.

Conclusion:

The correct and verified answer is B (2 fire extinguishers per floor) based on NFPA 241 and IFC 3309.1, ensuring compliance with fire safety standards for buildings under construction.

NEW QUESTION # 33

What fire-resistance rating is required for interior nonbearing walls and partitions in Type IV construction?

- **A. 0 hours**
- B. 1 hour
- C. 2 hours
- D. 1-1/2 hours

Answer: A

Explanation:

Fire-Resistance Rating for Nonbearing Walls in Type IV Construction

Type IV (Heavy Timber) construction, as defined by the International Building Code (IBC) 2021, Section 602.4, consists of large, solid or laminated wood members.

Interior nonbearing walls and partitions in Type IV construction are not required to have a fire-resistance rating (0 hours) unless they separate different occupancies or are specifically mandated by another code provision.

2. Why Type IV Does Not Require a Rating for Nonbearing Walls

The heavy timber components inherently provide fire resistance due to their large cross-section, which chars on the surface and slows fire penetration.

IBC Table 601 confirms that interior nonbearing walls in Type IV construction do not have a required fire-resistance rating.

3. Verification of Other Options

Option B (1 hour) - Incorrect, as Type IV does not require a 1-hour rating for interior nonbearing walls unless specific conditions apply.

Option C (1-1/2 hours) - Incorrect, as there is no code requirement for this level of rating in Type IV nonbearing walls.

Option D (2 hours) - Incorrect, as Type IV walls are not rated unless separating occupancies.

International Building Code (IBC) 2021 - Section 602.4 (Type IV Construction Requirements) IBC Table 601 (Fire-Resistance Ratings for Building Elements) ICC Fire Inspector II Study Guide (2021)

NEW QUESTION # 34

Horizontal exits shall not comprise more than ____ of the required exits from any floor area in a Group I-2 occupancy.

- A. 3/4
- **B. 1/2**
- C. 1/3
- D. 2/3

Answer: B

Explanation:

For Group I-2 occupancies (such as hospitals, nursing homes, and similar healthcare facilities), horizontal exits are used to improve fire safety by allowing occupants to move to a safer area without using stairs or elevators.

IFC 2021, Section 1026.1 (Horizontal Exits - General Requirements) states that:

Horizontal exits shall not comprise more than one-half (1/2) of the required exits from any floor area in a Group I-2 occupancy.

This ensures that at least 50% of the required exits remain traditional vertical or exterior exits, maintaining a balance between horizontal and traditional egress routes.

NEW QUESTION # 35

.....

After the client pay successfully they could receive the mails about Fire-Inspector-II guide questions our system sends by which you can download our test bank and use our Fire-Inspector-II study materials in 5-10 minutes. The mail provides the links and after the client click on them the client can log in and gain the Fire-Inspector-II Study Materials to learn. The procedures are simple and save clients' time. For the client the time is limited and very important and our Fire-Inspector-II learning guide satisfies the client's needs to download and use our Fire-Inspector-II practice engine immediately.

Fire-Inspector-II Reliable Test Sims: <https://www.exam4tests.com/Fire-Inspector-II-valid-braindumps.html>

If you select any Specific area of International Code Council Fire-Inspector-II test that you need special knowledge on, you can direct the Fire-Inspector-II to only serve those questions, First of all, we have brought in the most excellent staff to develop the Fire-Inspector-II practice test, In a word, Fire-Inspector-II exam pdf torrent is the best reference for you preparation, So our high quality and high efficiency Fire-Inspector-II practice materials conciliate wide acceptance around the world.

Logging to the Switch Console, Many properties of a Fire-Inspector-II view can be animated, including its `frame`, `bounds`, `backgroundColor`, `alpha` level, and more, If you select any Specific area of International Code Council Fire-Inspector-II test that you need special knowledge on, you can direct the Fire-Inspector-II to only serve those questions.

Unparalleled Valid Fire-Inspector-II Test Book, Fire-Inspector-II Reliable Test Sims

First of all, we have brought in the most excellent staff to develop the Fire-Inspector-II practice test, In a word, Fire-Inspector-II exam pdf torrent is the best reference for you preparation.

So our high quality and high efficiency Fire-Inspector-II practice materials conciliate wide acceptance around the world, The user must complete the test within the time specified by the simulation system, and there is a timer on the right side of the screen, as long as the user begins the practice of Fire-Inspector-II quiz guide, the timer will run automatic and start counting.
