With our OGBA-101 Practice Engine for 20 to 30 hours, we can claim that you will be quite confident to attend you exam and pass it for sure for we have high pass rate as 98% to 100% which is unmatched in the market.

The Open Group TOGAF Business Architecture Foundation Exam Sample Questions (Q95-Q100):

NEW QUESTION # 95

Consider the diagram.

What are the items labelled A, B and C?

- A. A-Enterprise Continuum, B-Architecture Continuum, C-Solutions Continuum
- B. A-Enterprise Architecture, B-Architecture Building Blocks, C-Solutions Building Blocks
- C. A-Architecture Vision, B-Business Architecture, C-Information Systems Architecture
- D. A-Enterprise Strategic Architecture, B-Segment Architecture, C-Solutions Architecture

Answer: A

Explanation:

The diagram shows the Enterprise Continuum, which is a view of the Architecture Repository that provides methods for classifying architecture and solution artifacts as they evolve from generic Foundation Architectures to Organization-Specific Architectures⁴. The Enterprise Continuum comprises two complementary concepts: the Architecture Continuum and the Solutions Continuum. The Architecture Continuum shows the relationships among foundational frameworks, common system architectures, industry architectures, and enterprise architectures⁴. The Solutions Continuum shows the relationships among foundational solutions, common system solutions, industry solutions, and enterprise solutions⁴.

NEW QUESTION # 96

Which of the following can be used to help define information concepts in an information map?

- **A. Value streams**
- B. Organization Map
- C. Statement of business goals and drivers
- D. Stakeholder Map

Answer: A

Explanation:

Value streams can be used to help define information concepts in an information map⁵. A value stream is a representation of a sequence of activities that create an overall result for a customer, stakeholder, or end user⁵. A value stream can help to identify the information that is required, produced, consumed, or exchanged by each activity in the value stream. An information map can then document and visualize the information concepts and their relationships.

NEW QUESTION # 97

What can architects present to stakeholders to extract hidden agendas, principles, and requirements that could impact the final Target Architecture?

- **A. Business Scenarios and Business Models**
- B. Alternatives and Trade-offs
- C. Solutions and Applications
- D. Architecture Views and Architecture Viewpoints

Answer: A

Explanation:

Business Scenarios and Business Models are tools that architects can present to stakeholders to facilitate discussions that reveal underlying assumptions, agendas, principles, and requirements. They help in understanding the context, extracting and validating requirements, and identifying potential impacts on the target architecture. By discussing scenarios and models, stakeholders can express their vision and concerns, which may include unspoken or implicit needs that are crucial for the architecture's success.

NEW QUESTION # 98

In what TOGAF ADM phase is the information map linked to other business blueprints?

- A. Phase A
- B. Preliminary Phase
- **C. Phase B**
- D. Phase E

Answer: C

Explanation:

In the TOGAF ADM (Architecture Development Method), Phase B is the Business Architecture phase.

During this phase, the information map, which represents the relationships and flow of information within the business, is linked to other business blueprints. This linkage is crucial to ensure that the business architecture is aligned with the data and information needs of the organization, providing a foundation for the development of subsequent architecture domains (Data, Application, and

Technology Architectures).

NEW QUESTION # 99

Which of the following best describes "value" in the context of Business Architecture?

- A. The market price of something.
- B. A numerical quantity assigned to something.
- C. The monetary worth of something.
- **D. The benefit of something.**

Answer: D

Explanation:

In Business Architecture, "value" refers to the benefit provided to stakeholders, aligning with TOGAF's goal to capture and deliver value in business processes and capabilities. Business value is viewed as outcomes or improvements that meet stakeholder needs, rather than purely financial or numerical metrics.

References: TOGAF Business Architecture Value Definition.

In the context of Business Architecture, "value" is broadly defined as the benefit that something provides to stakeholders. This benefit can take many forms, including:

- * Financial value: Increased revenue, reduced costs, improved profitability.
- * Customer value: Enhanced customer satisfaction, improved customer experience, increased customer loyalty.
- * Operational value: Increased efficiency, improved productivity, reduced risk.
- * Social value: Positive impact on society, environmental sustainability, ethical practices.

The key point is that value is subjective and depends on the perspective of the stakeholder. What is valuable to one stakeholder may not be as valuable to another. Therefore, understanding stakeholder values is crucial for effective business architecture.

NEW QUESTION # 100

.....

With the high pass rate as 98% to 100%, we can proudly claim that we are unmatched in the market for our accurate and latest OGBA-101 exam dumps.
