Talend Talend-Core-Developer Exam Brain Dumps - Reliable Talend-Core-Developer Test Online

In the current market, there are too many products of the same type. It is actually very difficult to select the Talend-Core-Developer practice prep that you love the most with only product introduction. Our trial version of our Talend-Core-Developer Study Materials can be a good solution to this problem. For the trial versions are the free demos which are a small of the Talend-Core-Developer exam questions, they are totally free for our customers to download.

Talend Core Certified Developer Exam Sample Questions (Q36-Q41):

NEW QUESTION # 36

In Talend Studio, you have access to a references project named project_ref. You need to reuse a Job named testJob from the project_ref in your main Job.

- A. Right-click Job Designs, click Create Standard Job, and enter testJob as the Job name.
- **B. Navigate to @ Referenced project, @ project_ref, Job Designs, Standard, then select testJob.**
- C. Navigate to Metadata, @ project ref, Job Designs, Standard, then select testJob.
- D. Right-click Job Designs and click import items.

Answer: B

Explanation:

To reuse a job named testJob from a referenced project named project_ref in your main job, you need to navigate to @Referenced project, @project_ref, Job Designs, Standard, then select testJob. A referenced project is a project that can be accessed from another project in read-only mode. You can add a referenced project to your main project by using the Project Settings window in Talend Studio. You can then browse the items (such as jobs, metadata, routines, etc.) of the referenced project in the Repository tree view under the

@Referenced project node. You can drag and drop any item from the referenced project to your main job design workspace.

You do not need to use import items, create standard job, or navigate to Metadata options. These options are not used to reuse jobs from referenced projects. The import items option is used to import items (such as jobs, metadata, routines, etc.) from an archive file that can be exported from another project or workspace. The create standard job option is used to create a new job with a name and a description. The Metadata node in the Repository tree view is used to store and manage metadata definitions for various data sources (such as databases, files, web services, etc.). References: Talend Open Studio: Open-source ETL and Free Data Integration | Talend, [Referenced projects - 7.3]

NEW QUESTION # 37

Which statements are true about the execution logs of a task running on a Remote Engine? Choose 2 answers.

- A. Logs are stored in an H2 database hosted on the server where the Remote Engine is running.
- **B. Logs can be downloaded from Talend Management Console.**
- C. Logs are stored in Parquet format on the server where the Remote Engine is running.
- **D. Logs are stored in the file system of the server where the Remote Engine is running.**

Answer: B,D

Explanation:

Comprehensive and Detailed Explanation:

When a task executes on a Talend Remote Engine, the execution logs are handled as follows:

* Logs are stored in the file system of the server where the Remote Engine is running (Option A):

* The Remote Engine writes execution logs to its local file system, typically in plain text or log formats. These logs provide detailed information about the task's execution and are essential for troubleshooting and monitoring.

* Logs can be downloaded from Talend Management Console (Option C):

* Talend Management Console (TMC) aggregates execution logs from Remote Engines, allowing users to access and download them directly through the TMC interface. This centralized access simplifies monitoring and debugging across multiple environments.

Why not other options?

* Option B: While some components of Talend may use H2 databases for internal purposes, execution logs are not typically stored in an H2 database on the Remote Engine server.

* Option D: Execution logs are generally stored in plain text or standard log formats, not in Parquet format. Parquet is a columnar storage file format commonly used for efficient data processing, not for logging purposes.

NEW QUESTION # 38

Which concepts are a part of Pipeline Designer? Choose 3 answers.

- **A. Dataset**
- B. Preparations
- **C. Connection**
- D. Context variables
- **E. Processor**

Answer: A,C,E

Explanation:

Comprehensive and Detailed Explanation:

Talend's Pipeline Designer is a tool that enables users to design and execute data integration workflows. Key components of Pipeline Designer include:

* Connection (Option C):

* Defines the link between Pipeline Designer and various data sources or destinations, specifying how to access and interact with external systems.

* Dataset (Option D):

* Represents the structured data that flows through the pipeline, serving as the input or output of various processing steps.

* Processor (Option E):

* Performs specific operations on the data within the pipeline, such as transformations, aggregations, or filtering, to achieve the desired data processing outcomes.

Why not other options?

* Option A: While context variables are used in Talend Studio for parameterizing jobs, they are not a primary concept in Pipeline Designer.

* Option B: "Preparations" refer to data transformation sequences in Talend Data Preparation, not directly in Pipeline Designer.

NEW QUESTION # 39

What is the generic Input component used for in a Joblet design?

- A. Triggering a subJob
- **B. Carrying data into a Joblet**
- C. Carrying data into a subJob
- D. Triggering a Joblet

Answer: B

Explanation:

The generic Input component used for in a Joblet design is the tJobletInput component. This component is used to carry data into a Joblet from another component in the job that contains the Joblet. A Joblet is a reusable piece of a job that can be used in multiple jobs as a single component. A Joblet can have one or more input and output flows that connect it with other components in a job. To create these flows, you need to use generic input and output components, such as tJobletInput, tJobletOutput, tJobletTriggerInput, and tJobletTriggerOutput. These components allow you to define schemas and triggers for your Joblet without depending on specific components.

The tJobletInput component is not used for triggering a Joblet, triggering a subjob, or carrying data into a subjob. These are different concepts and functionalities in Talend Studio. A trigger is a link that activates a subjob or a component based on a condition or an event. A subjob is a part of a job that consists of one or more components connected by data flows or triggers. A subjob can be triggered by another subjob using triggers such as OnSubjobOk, OnSubjobError, Run if, etc. A subjob can also carry data into another subjob using data flows such as main, lookup, reject, etc. References: Talend Open Studio: Open-source ETL and Free Data Integration | Talend, [tJobletInput properties - 7.3], [Joblets - 7.3], [Triggers - 7.3]

NEW QUESTION # 40

Which file should you edit to enable SSL for a JobServer?

- A. Conf/server.xml
- **B. Conf/TalendJobServer.properties**
- C. Conf/TalendServer.properties
- D. Jsl_stat64.ini

Answer: B

Explanation:

To enable SSL for a JobServer, you need to edit the conf/TalendJobServer.properties file. A JobServer is a server application that allows you to execute jobs remotely from Talend Studio or Talend Administration Center. The conf/TalendJobServer.properties file contains various configuration parameters for your JobServer, such as port number, log level, security options, etc. To enable SSL for your JobServer, you need to set the sslparameter to true and provide the path and password of your keystore file that contains your SSL certificate.

You do not need to edit conf/TalendServer.properties, conf/server.xml, or jsl_static64.ini files. These files are not related to JobServer configuration or SSL settings. The conf/TalendServer.properties file is used to configure Talend Administration Center

settings, such as database connection, LDAP authentication, email notification, etc. The conf/server.xml file is used to configure Tomcat server settings, such as connectors, realms, valves, etc. The jsr_static64.ini file is used to configure Java Service Launcher settings, such as service name, description, startup type, etc. References: Talend Open Studio: Open-source ETL and Free Data Integration | Talend, [Configuring Talend JobServer - 7.3], [Configuring Talend Administration Center - 7.3], [Configuring Tomcat - 7.3], [Installing Java Service Launcher - 7.3]

NEW QUESTION # 41

.....

As long as you buy our Talend-Core-Developer practice materials and take it seriously consideration, we can promise that you will pass your Talend-Core-Developer exam and get your certification in a short time. We can claim that if you study with our Talend-Core-Developer Guide quiz for 20 to 30 hours, you will be confident to pass the exam for sure. So choose our exam braindumps to help you review, you will benefit a lot from our Talend-Core-Developer study guide.

Talend-Core-Developer Exam Brain Dumps: <https://www.exams-boost.com/Talend-Core-Developer-valid-materials.html>

Talend Reliable Talend-Core-Developer Exam Question I successfully passed the test with no issue, Talend Reliable Talend-Core-Developer Exam Question With so many methods to boost individual competitiveness, people may be confused, which can bring you a successful career and brighter future efficiently, Talend Reliable Talend-Core-Developer Exam Question And after you finish the exam, we also wish you can continue to learn the newest knowledge, Please trust us; we will give you a satisfactory score if you pay attention on our Talend-Core-Developer VCE Dumps.

Why We're Addicted to Bill Gates, By default, you can set the Talend-Core-Developer Exam Brain Dumps Passcode feature to be any four-digit number by accessing the Settings app, I successfully passed the test with no issue.

With so many methods to boost individual competitiveness, Talend-Core-Developer people may be confused, which can bring you a successful career and brighter future efficiently, And after Talend-Core-Developer Exam Brain Dumps you finish the exam, we also wish you can continue to learn the newest knowledge.

Free PDF Quiz Efficient Talend - Talend-Core-Developer - Reliable Talend Core Certified Developer Exam Exam Question

Please trust us; we will give you a satisfactory score if you pay attention on our Talend-Core-Developer VCE Dumps, And after all, it's foolish to avoid the chance to be a more capable person.
