As a market leader, our company is able to attract quality staff; it actively seeks out those who are energetic, persistent, and professional to various PSE-Cortex-Pro-24 certificate and good communicator. Over 50% of the account executives and directors have been with the Group for more than ten years. The successful selection, development and PSE-Cortex-Pro-24 training of personnel are critical to our company's ability to provide a high standard of service to our customers and to respond their needs. That's the reason why we can produce the best PSE-Cortex-Pro-24 exam prep and can get so much praise in the international market..

Don't let the PSE-Cortex-Pro-24 exam stress you out! Prepare with Palo Alto Networks PSE-Cortex-Pro-24 exam dumps and boost your confidence in the real Palo Alto Networks PSE-Cortex-Pro-24 exam. We ensure your road towards success without any mark of failure. Time is of the essence - don't wait to ace your Palo Alto Networks PSE-Cortex-Pro-24 Certification Exam!

>> PSE-Cortex-Pro-24 Latest Learning Materials <<

PSE-Cortex-Pro-24 Dumps Collection - Valid PSE-Cortex-Pro-24 Test Pattern

Do some fresh things each day that moves you out of your comfort zone. If you stay cozy every day, you will gradually become lazy. Now, you have the opportunity to change your current conditions. Our PSE-Cortex-Pro-24 real exam dumps are specially prepared for you. Try our PSE-Cortex-Pro-24 study tool and absorb new knowledge. After a period of learning, you will find that you are making progress. The knowledge you have studied on our PSE-Cortex-Pro-24 Exam Question will enrich your life and make you wise. Our PSE-Cortex-Pro-24 real exam dumps are manufactured carefully, which could endure the test of practice. Stable and healthy development is our long lasting pursuit. In order to avoid fake products, we strongly advise you to purchase our PSE-Cortex-Pro-24 exam question on our official website.

Palo Alto Networks Systems Engineer Professional - Cortex Sample

Questions (Q59-Q64):

NEW QUESTION # 59

Which Cortex XDR license is required for a customer that requests endpoint detection and response (EDR) data collection capabilities?

- A. Cortex XDR Endpoint
- B. Cortex XDR Prevent
- C. Cortex XDR Pro per TB
- **D. Cortex XDR Pro Per Endpoint**

Answer: D

Explanation:

Reference: <https://live.paloaltonetworks.com/t5/cortex-xdr-discussions/cortex-xdr-what-is-the-difference-between-cortex-xdr-pro-and/td-p/571111>

NEW QUESTION # 60

What is the function of reputation scoring in the Threat Intelligence Module of Cortex XSIAM?

- A. It helps identify threat feed vendors with invalid content.
- B. It provides a statistical model for combining scores from multiple vendors
- **C. It resolves conflicting scores from different vendors with the same indicator.**
- D. It allows for comparison between open-source intelligence and paid services.

Answer: C

Explanation:

The function of reputation scoring in the Threat Intelligence Module of Cortex XSIAM is to resolve conflicting scores from different vendors for the same indicator. This helps standardize threat intelligence, allowing the platform to provide a more accurate and reliable assessment of the risk associated with a given indicator, even when different sources may provide conflicting information.

NEW QUESTION # 61

Which two Cortex XSOAR incident type features can be customized under Settings > Advanced > Incident Types? (Choose two.)

- A. dropping new incidents of the same type that contain similar information
- **B. adding new fields to an incident type**
- C. setting reminders for an incident service level agreement
- **D. defining whether a playbook runs automatically when an incident type is encountered**

Answer: B,D

Explanation:

Reference: <https://xsoar.pan.dev/docs/incidents/incident-types>

NEW QUESTION # 62

What must a customer deploy prior to collecting endpoint data in Cortex XSIAM?

- A. Broker VM
- B. External dynamic list
- C. Playbook
- **D. XDR agent**

Answer: D

Explanation:

25 web pages

As a Palo Alto Cortex Professional, I'll provide a detailed explanation for Question 118: What must a customer deploy prior to

collecting endpoint data in Cortex XSIAM? along with the reasoning and references based on Palo Alto Networks' official documentation and product knowledge.

C: XDR Agent

Cortex XSIAM (Extended Security Intelligence and Automation Management) is an AI-driven security operations platform designed to centralize and automate security operations across an enterprise, including endpoint, network, cloud, and identity data. To collect endpoint data specifically, Cortex XSIAM relies on the Cortex XDR Agent, which is a lightweight software component installed on endpoints (such as laptops, desktops, or servers). This agent is responsible for gathering telemetry data, monitoring endpoint activity, and enforcing security policies, which are then sent to the Cortex XSIAM cloud for analysis, detection, and response.

Here's why the XDR Agent is the correct choice and why the other options do not apply:

Option A: Playbook

* Explanation: A playbook in Cortex XSIAM (or its predecessor, Cortex XSOAR) is a predefined workflow that automates incident response tasks, such as investigating alerts or remediating threats.

While playbooks are critical for automation and orchestration, they are not involved in the initial collection of endpoint data.

Playbooks operate on data that has already been collected and ingested into the system. Therefore, deploying a playbook is not a prerequisite for collecting endpoint data.

* Conclusion: Incorrect.

Option B: Broker VM

* Explanation: The Broker VM is an optional component in the Cortex ecosystem that can be deployed to enhance connectivity and functionality, such as acting as a proxy for endpoints to communicate with the Cortex cloud, collecting logs, or running additional services. While it can facilitate data forwarding or log collection in certain scenarios (e.g., from third-party sources), it is not a mandatory requirement for collecting endpoint data directly from devices managed by Cortex XSIAM. The XDR Agent can communicate with the Cortex cloud independently without a Broker VM.

* Conclusion: Incorrect.

Option C: XDR Agent

* Explanation: The Cortex XDR Agent is the core component required to collect endpoint data in Cortex XSIAM. It is installed on supported endpoints (e.g., Windows, macOS, Linux, or Android devices) and performs several key functions:

* Data Collection: Gathers detailed telemetry, including process execution, file activity, network connections, and system events.

* Prevention: Blocks exploits, malware, and fileless attacks using AI-driven techniques.

* Detection and Response: Provides real-time data to the Cortex cloud for advanced analytics and incident investigation. Without the XDR Agent deployed on endpoints, Cortex XSIAM cannot collect the necessary data to monitor, detect, or respond to endpoint-based threats. This makes it the essential prerequisite for endpoint data collection.

* Conclusion: Correct.

Option D: External Dynamic List (EDL)

* Explanation: An External Dynamic List (EDL) is a feature in Palo Alto Networks' ecosystem used to import and manage dynamic lists of indicators (e.g., IP addresses, URLs, or domains) for use in security policies or threat intelligence. While EDLs can enhance threat detection by providing additional context, they are not involved in the process of collecting endpoint data. They are a supplementary tool rather than a requirement for data collection.

* Conclusion: Incorrect.

References from Palo Alto Networks:

* Cortex XSIAM Datasheet (Palo Alto Networks):

* "Cortex XSIAM unifies best-in-class security operations functions, including Endpoint Detection and Response (EDR)... The platform leverages the Cortex XDR Agent to prevent endpoint attacks and collect full telemetry for detection and response."

* This highlights the XDR Agent's role as the mechanism for endpoint data collection.

* Cortex XSIAM Solution Brief (Palo Alto Networks):

* "XSIAM requires the deployment of the XSIAM Endpoint Agent to appropriate and compatible endpoints to collect telemetry and enforce security."

* This directly ties the agent to the data collection process.

* Cortex XDR Agent Documentation (Palo Alto Networks Cortex Documentation Portal):

* The agent is described as "a lightweight agent that stops threats with Behavioral Threat Protection, AI, and cloud-based analysis while collecting endpoint telemetry for extended detection and response."

* Available at: docs-cortex.paloaltonetworks.com

* What is Cortex XSIAM? (Palo Alto Networks Website):

* "Endpoint Protection Platform (EPP): Prevents endpoint attacks with a proven endpoint agent that blocks exploits, malware, and fileless attacks and collects full telemetry for detection and response."

* This reinforces the agent's foundational role in endpoint data collection.

NEW QUESTION # 63

Which two entities can be created as a BIOC? (Choose two.)

- A. file
- B. alert log
- C. event log
- D. registry

Answer: A,D

Explanation:

<https://docs.paloaltonetworks.com/cortex/cortex-xdr/cortex-xdr-pro-admin/investigation-and-response/cortex-xdr-indicators/working-with-biocs/create-a-bioc-rule.html>

NEW QUESTION # 64

.....

Whether for a student or an office worker, obtaining PSE-Cortex-Pro-24 certificate can greatly enhance the individual's competitiveness in the future career. Try our PSE-Cortex-Pro-24 study materials, which are revised by hundreds of experts according to the changes in the syllabus and the latest developments in theory and practice. Once you choose PSE-Cortex-Pro-24 training dumps, passing the exam one time is no longer a dream.

PSE-Cortex-Pro-24 Dumps Collection: <https://www.passexamdumps.com/PSE-Cortex-Pro-24-valid-exam-dumps.html>

Our PSE-Cortex-Pro-24 training quiz might offer you some good guidance, If you want to clear Palo Alto Networks PSE-Cortex-Pro-24 Dumps Collection AZ 400 exam on the first attempt, then you should go through our PSE-Cortex-Pro-24 Dumps Collection - Palo Alto Networks Systems Engineer Professional - Cortex practice exam questions multiple times so you can easily clear your exam on the first attempt, Palo Alto Networks PSE-Cortex-Pro-24 Latest Learning Materials In addition, our study materials will boost your confidence.

As I said at the start of this section, don't spend too long Valid PSE-Cortex-Pro-24 Test Pattern on studying virtualization for the exam, but be aware of its involvement within an Exchange infrastructure.

Initial Sell Signal Not Reinforced by Any Negative Divergence, Our PSE-Cortex-Pro-24 training quiz might offer you some good guidance, If you want to clear Palo Alto Networks AZ 400 exam on the first attempt, then you should go through PSE-Cortex-Pro-24 our Palo Alto Networks Systems Engineer Professional - Cortex practice exam questions multiple times so you can easily clear your exam on the first attempt.

Updated PSE-Cortex-Pro-24 Latest Learning Materials & Trustable PSE-Cortex-Pro-24 Dumps Collection & Hot Palo Alto Networks Palo Alto Networks Systems Engineer Professional - Cortex

In addition, our study materials will boost your confidence, So it is a best way for you to hold more knowledge of the PSE-Cortex-Pro-24 real dumps materials, Our company employs well-paid experts team from the PSE-Cortex-Pro-24 Exam Registration largest companies respectively which were engaged in editing the real test in previous companies.
