

New MB-335 Reliable Dumps Questions 100% Pass | Professional Valid MB-335 Exam Review: Microsoft Dynamics 365 Supply Chain Management Functional Consultant Expert

P.S. Free & New MB-335 dumps are available on Google Drive shared by Prep4SureReview: <https://drive.google.com/open?id=1nq2NWSP8zoLkuYDR5Z7EXn99JWNSnG34>

The Microsoft Dynamics 365 Supply Chain Management Functional Consultant Expert (MB-335) practice questions are designed by experienced and qualified MB-335 exam trainers. They have the expertise, knowledge, and experience to design and maintain the top standard of Microsoft MB-335 exam dumps. So rest assured that with the Microsoft Dynamics 365 Supply Chain Management Functional Consultant Expert (MB-335) exam real questions you can not only ace your Microsoft Dynamics 365 Supply Chain Management Functional Consultant Expert (MB-335) exam dumps preparation but also get deep insight knowledge about Microsoft Dynamics 365 Supply Chain Management Functional Consultant Expert (MB-335) exam topics. So download Microsoft Dynamics 365 Supply Chain Management Functional Consultant Expert (MB-335) exam questions now and start this journey.

Microsoft MB-335 certification exam is ideal for individuals who have experience in supply chain management processes and want to improve their skills and knowledge with Microsoft Dynamics 365. Microsoft Dynamics 365 Supply Chain Management Functional Consultant Expert certification exam is also suitable for those who want to validate their expertise in the supply chain management domain and enhance their career prospects. By passing this certification exam, candidates demonstrate their ability to design and implement solutions that streamline supply chain management processes and enhance operational efficiency. With the increasing demand for professionals who can work with Dynamics 365, this certification exam can help individuals stand out in the job market and advance their careers.

Microsoft MB-335 Certification Exam is a valuable credential for supply chain management professionals. MB-335 exam covers a range of topics that are essential for functional consultant experts in supply chain management. Passing the exam demonstrates the candidate's understanding of the software and its features, as well as their ability to configure and implement solutions. Microsoft Dynamics 365 Supply Chain Management Functional Consultant Expert certification is highly respected in the industry and is recognized globally, making it a valuable asset for professionals looking to advance their career in the field.

Valid MB-335 Exam Review & MB-335 Vce Files

Are you still worried that you haven't found MB-335 test dumps and review information? People around the world are likely to choose MB-335 certification exam. Prep4SureReview is the only learning website that can provide better MB-335 Certification Training materials. If you are still worried, you can download MB-335 free demo before purchasing our Prep4SureReview MB-335 certification training materials.

Earning the Microsoft MB-335 certification is an excellent way to demonstrate one's expertise in Dynamics 365 Supply Chain Management. Microsoft Dynamics 365 Supply Chain Management Functional Consultant Expert certification validates the candidate's ability to provide effective supply chain solutions using Dynamics 365. Moreover, holding the MB-335 Certification distinguishes an individual in the industry and increases their marketability. Microsoft Dynamics 365 Supply Chain Management Functional Consultant Expert certification also opens doors to advanced roles such as Dynamics 365 Supply Chain Management Functional Consultant Expert.

Microsoft Dynamics 365 Supply Chain Management Functional Consultant Expert Sample Questions (Q78-Q83):

NEW QUESTION # 78

A manufacturer is implementing Dynamics 365 Supply Chain Management with warehouse management processes (WMS). Warehouse workers use hand-held devices to pick and stage batch-tracked products for production. The warehouse manager requires that products are removed from on-hand inventory and consumed when they are picked and staged for production. You need to remove the products from on-hand inventory. What should you configure?

- A. flushing principle, available at location
- B. flushing principle, start
- C. manufacturing execution, job card device
- D. mobile device menu item, start production order

Answer: A

Explanation:

* The flushing principle is a setting that determines how and when the raw materials are consumed from inventory and registered as work in progress (WIP) for production orders and batch orders. The flushing principle can be configured at the product level, the bill of materials (BOM) or formula line level, or the production order or batch order line level.

* The Start flushing principle indicates that the material will be automatically consumed when the production order is started. The amount of material that is consumed is proportional to the quantity that is started. This principle is relevant if, for example, the variance in the consumption is low, the materials are low-value materials, there are no tracking requirements, or there's a short run time on operations.

* In this scenario, the warehouse manager requires that products are removed from on-hand inventory and consumed when they are picked and staged for production. Therefore, the Start flushing principle should be configured for the batch-tracked products. This way, the products will be deducted from inventory and set to WIP as soon as the production order is started on the hand-held device.

NEW QUESTION # 79

You need to configure the system to meet the requirements.

What should you use? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

Explanation:

Topic 7, Adventure Works Cycles background

Adventure Works Cycles is a high-end bicycle manufacturer in North America. Their standard model bicycles are available year-round. Limited-edition bicycle models are released several times a year to boutique retailers domestically.

Adventure Works has had the most success with their limited-edition bicycles. These bicycles have high margins, are in high demand, and have a strong following with the younger generation biking community.

Bicycle manufacturing

* Bicycle models are measured and reported against how well a single model performs as a sum of all the variations of that model. For example, the Street Kid YOLO model sold 25,000 units in 2019 across all variations of the product, but the Purple Female frame made up 30 percent of that model's sales.

* The Street Kid YOLO models sell in different volumes depending on the market.

* The creation of production orders for bicycles occurs monthly and is based on historical sales.

* Each part of a bicycle's assembly occurs at a different station in the Adventure Works production facility.

* A piece of paper that has eight sections accompanies a bicycle throughout the manufacturing process. As each step is completed, the respective section is completed and signed off by a production worker.

* The completed paper is used in the put-away process by the warehouse workers.

Financials

* The standard model and limited-edition bicycle teams are separate operating units within the manufacturing division. Financials are tracked and reported separately even though they are produced and sold in the same sales channels.

* Updates to the standard model bicycle models are created when a part for a bicycle becomes unavailable.

This can change the cost of the product.

* An updated model of a bicycle with new parts will be maintained as a new item and have a new price.

However, it will look like the exact same product to retailers and distributors.

Manufacturing process

Limited-edition bicycle process

The limited-edition bicycles are made up of an Adventure Works custom frame with all other parts created by local artists and manufacturers.

* Each bicycle has a unique set of new items that make up the bill of materials (BOM) because all parts are created to specification.

* A single pilot limited-edition bicycle is created as a proof of concept.

* Adventure Works occasionally reuses components from existing bicycles, but most limited-edition bicycles are made of handcrafted components designed to specifications.

* Each limited-edition bicycle is built, and hand signed by a single Adventure Works artisan.

* Sales price must be auto calculated after the cost price is derived.

* Before creating the proof of concept limited-edition bicycle, the approximate sales price needs to be determined through a cost-plus 20 percent calculation.

* All items except for the frame in the prototype process are considered finished items and can be sold individually.

* The frame items require modifications in accordance with the manufacturing process as well as painting.

* Each Adventure Works limited-edition bicycle artisan is scheduled to create a specific number of bicycles in a production run that must be completed by a certain date.

* Limited-edition bicycle artisans work exclusively on a given run of limited-edition bicycles and are not able to work on other tasks.

Limited-edition bicycle BOM assembly process

The prototype process for the limited-edition bicycles is shown in the following graphic:

New limited-edition k bicycle process

Adventure Works is creating a new, limited-edition bicycle to commemorate the company's tenth anniversary. The limited-edition bicycle will be designed for charity events and be produced for the summer season.

* The bicycle must be available in men's, women's, and unisex frame styles. It will be painted in one of 50 hand-painted designs representing the charity of the customer's choosing.

* A limited run of 100 bicycles must be created.

* The limited-edition bicycles must use the same production process as the standard model bicycles.

* The limited-edition bicycles must use the same parts used for previous limited-edition bicycles, except for the unique paint colors.

* Frames must be painted in-house.

* Five painting options are available only in the unisex frame style.

New limited-edition bicycle orders

* Customers must be able to place sales orders for the item in the chosen frame configuration, including style and color.

* When an order for the new limited-edition bicycle is created, payment must be provided.

* An approval for an order must exist for the order to be processed.

* Upon approval of an order, production must start immediately and not require re-entry of data.

NEW QUESTION # 80

You need to configure scheduling for each production area.

Which scheduling options should you use? To answer, select the appropriate option in the answer area.

NOTE: Each correct selection is worth one point.
