Only Exam4Labs can perfect to show its high quality, however, not every website has high quality exam dumps. Than cardiac operations a rush to purchase our Palo Alto Networks XSOAR-Engineer Oh! The successful rate is 100%.

## Palo Alto Networks XSOAR Engineer Sample Questions (Q118-Q123):

### NEW QUESTION # 118

What are the three ways to add/mark entries as evidence inside the Evidence Board? (Choose three.)

- A. By running the command !MarkAsEvidence
- B. Manually directly from the War Room with the Actions drop-down
- C. Automatically from playbook tasks when the option is selected on the Advanced tab
- D. Manually from the playbook task (mark as entry icon)
- E. From the Notes section (mark as entry icon)

**Answer: B,C,E**

### NEW QUESTION # 119

A breakpoint is added to a saved playbook to ensure that it pauses before running the task "ad-delete-user." However, it is later discovered that an Active Directory account was deleted by this playbook, and the playbook did not pause at the breakpoint. What is the cause of this issue?.

- A. The task was not set to "skip."
- B. The task was not configured to override input.
- C. The playbook was not set to "quiet mode."
- D. The playbook does not stop at the breakpoint when run from an incident.

**Answer: D**

Explanation:

The XSOAR Playbook Debugger documentation states that breakpoints only apply when the playbook is run in Debug mode, not when an incident triggers the playbook normally.

Running from an incident executes the playbook without debugger controls, so breakpoints are ignored- leading to the deletion task running normally.

### NEW QUESTION # 120

What are possible war room result (entry) types?

- A. Note, indicator, error, image
- B. Video, file, error, image
- C. Context, file, error, image
- D. Note, file, error, image

**Answer: A**

### NEW QUESTION # 121

Match the operations with the appropriate context.

## Answer Area

Run a Set command manually from the CLI to save data

Save information from third party systems during fetch incidents

Run a command multiple times and save the output to a different key each time

Run the Generic Polling playbook for checking the status of a detonation process
