

Cloud-Deployment-and-Operations Mit Hilfe von uns können Sie bedeutendes Zertifikat der Cloud-Deployment-and-Operations einfach erhalten!

Laden Sie die neuesten ZertSoft Cloud-Deployment-and-Operations PDF- Versionen von Prüfungsfragen kostenlos von Google Drive herunter: <https://drive.google.com/open?id=1VSaI93CjUgBEXTmgNttDaFtmTc1PI5gl>

Machen Sie Sorge um die Cloud-Deployment-and-Operations von WGU Prüfung, weil Sie nur noch ein Anfänger sind? Von jetzt an wird ZertSoft alle Probleme für Sie lösen. Die Lernhilfe von WGU Cloud-Deployment-and-Operations Zertifizierung sind umfassend und enthalten unterschiedliche Ziele, daher können sogar die Anfänger sie leicht erfassen. Sie würden den Schlüssel für den Durchlauf der Cloud-Deployment-and-Operations Prüfung haben und Selbstsicherheit gewinnen, wenn Sie solche Lernhilfe haben. Dann warum warten Sie noch?

WGU Cloud-Deployment-and-Operations Prüfungsplan:

Thema	Einzelheiten
Thema 1	Cloud Service Deployment and Management: This section of the exam measures skills of Cloud Engineers and covers the technical knowledge required to deploy, manage, and operate cloud services. It focuses on understanding stability, scalability, backup processes, recovery methods, and general deployment practices. Candidates are expected to show they can handle provisioning, monitoring, and connectivity tasks needed to support cloud environments.
Thema 2	Monitoring, Logging, and Issue Remediation: This section of the exam measures skills of Cloud Engineers and covers responding to issues identified through AWS monitoring and logging tools. Candidates must show they can interpret system outputs, identify problems, and take corrective actions to maintain smooth cloud operations.
Thema 3	Optimizing Cost and Performance Baselines: This section of the exam measures skills of Cloud Operations engineers and covers determining the best balance between cost and performance using AWS services. It involves selecting suitable configurations and resource types to maintain efficient operations while avoiding unnecessary spending.

Cloud-Deployment-and-Operations German, Cloud-Deployment-and-Operations Probesfragen

ZertSoft ist eine Website, mit deren Hilfe Sie die WGU Cloud-Deployment-and-Operations Zertifizierungsprüfung schnell bestehen können. Die Fragenkataloge zur WGU Cloud-Deployment-and-Operations Zertifizierungsprüfung von ZertSoft werden von den Experten zusammengestellt. Wenn Sie sich noch anstrengend um die WGU Cloud-Deployment-and-Operations (WGU Cloud Deployment and Operations) Zertifizierungsprüfung bemühen, sollen Sie die Prüfungsunterlagen zur WGU Cloud-Deployment-and-Operations Zertifizierungsprüfung von ZertSoft wählen, die Ihnen große Hilfe bei der Prüfungsvorbereitung leisten.

WGU Cloud Deployment and Operations Cloud-Deployment-and-Operations Prüfungsfragen mit Lösungen (Q56-Q61):

56. Frage

(Which type of support plan provides a technical account manager and full use of Trusted Advisor?)

- A. Developer
- B. Business
- C. Standard
- **D. Enterprise**

Antwort: D

Begründung:

The Enterprise support plan provides a technical account manager (TAM) and full use of Trusted Advisor, offering proactive guidance and comprehensive access to all checks. This plan is designed for large-scale, mission-critical workloads. The WGU Cloud Deployment and Operations Study Guide (Section 6.4, AWS Support Plans) states, "The Enterprise support plan includes a dedicated Technical Account Manager and full Trusted Advisor access, providing 24/7 support and proactive optimization recommendations." Developer, Standard, and Business plans offer limited or no TAM support and partial Trusted Advisor access.

57. Frage

(Which service enables a company to enforce and manage governance rules across multiple AWS accounts?)

- A. GuardDuty
- B. Security Hub
- **C. Control Tower**
- D. Systems Manager

Antwort: C

Begründung:

AWS Control Tower enables a company to enforce and manage governance rules across multiple AWS accounts by setting up a landing zone with preconfigured policies for security, compliance, and operations. It simplifies multi-account management. The WGU Cloud Deployment and Operations Study Guide (Section 6.5, Control Tower) states, "Control Tower provides a centralized solution to establish and enforce governance rules across multiple accounts, using guardrails and a landing zone to ensure compliance with organizational policies." Security Hub, GuardDuty, and Systems Manager do not offer this multi-account governance capability.

58. Frage

(An administrator needs to create Systems Manager Automation documents to take action based on AWS Config rules. Which two file formats should be used? Choose 2 answers.)

- **A. YAML**
- B. CSV
- C. XML
- **D. JSON**

Antwort: A,D

Begründung:

Systems Manager Automation documents can be created using JSON or YAML file formats to define workflows and actions based on AWS Config rules. These formats allow administrators to specify the steps and parameters for automation tasks, such as remediation actions triggered by Config rule evaluations. The WGU Cloud Deployment and Operations Study Guide (Section 5.1, Systems Manager Automation) states that both JSON and YAML are supported formats for writing Automation documents, providing flexibility in scripting automation logic. XML and CSV are not supported formats for this purpose.

59. Frage

(A company that uses five Elastic IP addresses does not want to request more from AWS. Which solution should be used to route requests to a healthy endpoint?)

- A. Use Systems Manager to update endpoints
- B. Edit the route table for the VPC
- **C. Register a DNS name to an auto-assigned public IP address**
- D. Adjust the TTL of the IP packets

Antwort: C

Begründung:

To route requests to a healthy endpoint without requesting additional Elastic IP addresses, the company should register a DNS name to an auto-assigned public IP address using a service like Route 53. This leverages dynamic DNS to distribute traffic, reducing reliance on fixed EIPs. The WGU Cloud Deployment and Operations Study Guide (Section 3.1, Route 53) states, "Registering a DNS name with an auto-assigned public IP in Route 53 allows traffic routing to healthy instances, avoiding the need for additional Elastic IP addresses." TTL adjustment, route table edits, and Systems Manager are not relevant solutions.

60. Frage

(Which component should be used to configure email notifications for a trigger by Amazon Made?)

- A. Simple Queue Service
- B. Elastic Kubernetes Service
- **C. EventBridge**
- D. CodeDeploy

Antwort: C

Begründung:

Amazon EventBridge should be used to configure email notifications for a trigger by Amazon Made, as it can route events to targets like Amazon SNS (Simple Notification Service) for email delivery. EventBridge integrates with AWS services to handle event-driven notifications. The WGU Cloud Deployment and Operations Study Guide (Section 4.3, EventBridge) states, "EventBridge can be configured to send events from Amazon Made to SNS, enabling email notifications by subscribing an email endpoint to the SNS topic." SQS, EKS, and CodeDeploy do not support this notification configuration.

61. Frage

.....

Jedem, der die Prüfungsunterlagen und Software zu WGU Cloud-Deployment-and-Operations (WGU Cloud Deployment and Operations) von ZertSoft nutzt und die WGU Zertifizierungsprüfungen nicht beim ersten Mal erfolgreich besteht, versprechen wir, die Kosten für das Prüfungsmaterial 100% zu erstatten.
