2026 C-S4CPB-2508 Authorized Test Dumps & Unparalleled New SAP Certified Associate - Implementation Consultant - SAP S/4HANA Cloud Public Edition Test Answers

Once you use our C-S4CPB-2508 exam materials, you don't have to worry about consuming too much time, because high efficiency is our great advantage. You only need to spend 20 to 30 hours on practicing and consolidating of our C-S4CPB-2508 learning material, you will have a good result. After years of development practice, our C-S4CPB-2508 test torrent is absolutely the best. You will embrace a better future if you choose our C-S4CPB-2508 exam materials.

SAP Certified Associate - Implementation Consultant - SAP S/4HANA Cloud Public Edition Sample Questions (Q29-Q34):

NEW QUESTION # 29

You are recording actions for a custom process step in a test automate

When do you press the "Read" button on the recording panel? Note: There are 2 correct answers to this question.

- A. To capture an error message on the screen that can be used later.
- **B. To capture text in a message screen that can be used for data binding later.**
- **C. To capture a value in a text field that should be stored as a variable.**
- D. To capture a static label on the screen that should be checked during test execution.

Answer: B,C

Explanation:

When you are recording actions for a custom process step in a test automate, you press the "Read" button on the recording panel in the following situations:

* To capture a value in a text field that should be stored as a variable. This allows you to reuse the value in other steps or test cases, or to compare it with an expected value¹.

* To capture text in a message screen that can be used for data binding later. This allows you to extract data from the message screen and use it as an input for another step or test case².

You do not press the "Read" button to capture an error message or a static label on the screen, as these are not values that need to be stored or used later. Instead, you can use the "Check" button to verify that the error message or the label is displayed as expected³. References = Using the Test Automation Tool for Automated Testing - SAP Learning, How to get started with the Test Automation Tool for SAP S/4HANA Cloud Public Edition, SAP S/4HANA Cloud Test Automation Tool- FAQs Blog Series #1.

NEW QUESTION # 30

Which of the following would prevent SAP from running a Post-Upgrade Test (PUT) on a customer's behalf?

Note: There are 2 correct answers to this question.

- **A. An execution variant has not been maintained.**
- B. Data marked for deletion is picked for execution.
- C. The process steps have been reordered.
- **D. The test process failed the execution pre-check.**

Answer: A,D

Explanation:

The following would prevent SAP from running a Post-Upgrade Test (PUT) on a customer's behalf:

* An execution variant has not been maintained: An execution variant is a set of test data that is used to execute a test process. It contains the input values and expected results for each test step. If an execution variant is not maintained for a test process, the system cannot run the test automatically and will skip it¹.

* The test process failed the execution pre-check: The execution pre-check is a validation that is performed before the test execution to ensure that the test process and the execution variant are consistent and complete. If the execution pre-check fails, it means that there are some issues or gaps in the test process or the execution variant that need to be resolved before the test can be run².

The following would not prevent SAP from running a Post-Upgrade Test (PUT) on a customer's behalf:

* Data marked for deletion is picked for execution: Data marked for deletion is data that is no longer relevant or valid for the test process. It can be marked for deletion by the customer or by SAP. However, this does not affect the test execution, as the system will ignore the data marked for deletion and use the available data for the test process³.

* The process steps have been reordered: The process steps are the individual actions that are performed as part of the test process. They can be reordered by the customer or by SAP to reflect the changes in the business process or the user interface. However, this does not affect the test execution, as the system will follow the order of the process steps as defined in the test process⁴.

References = [SAP S/4HANA Cloud Public Edition - Execution Variants], [SAP S/4HANA Cloud Public Edition - Execution Pre-Check], [SAP S/4HANA Cloud Public Edition - Data Marked for Deletion], [SAP S/4HANA Cloud Public Edition - Process Steps].

NEW QUESTION # 31

Who should be identified and assigned the role of the IT Contact immediately when the implementation begins?

- A. Customer project manager
- **B. Customer system admin**
- C. Partner project manager
- D. Partner lead configuration expert

Answer: B

Explanation:

The IT Contact is the person who is responsible for setting up the initial system access, provisioning users, and managing authentication for the SAP S/4HANA Cloud Public Edition project. The IT Contact should be identified and assigned immediately when the implementation begins, as they will receive all the SAP communications and notifications related to the system setup and configuration. The IT Contact should also be available and accessible throughout the project, and collaborate with the project team and the business stakeholders1.

The IT Contact should be someone who is a hands-on system administrator, not an executive. They should have the skills and experience to perform the system administration tasks, such as creating users, assigning roles, configuring identity providers, and troubleshooting issues. They should also be committed and engaged with the project, and provide feedback and participate in testing and training activities1.

Therefore, the correct answer is C, as the customer system admin is the most suitable person to be the IT Contact for the SAP S/4HANA Cloud Public Edition project. References = 1 How to Choose the Right IT Contact for Your SAP S/4HANA Cloud Public Edition Project - SAP Community

NEW QUESTION # 32

What do you use to collect the values that are entered into the configuration activities in SAP Central Business Configuration?

- A. Availability and Dependencies of Solution Processes Excel
- B. SAP Cloud ALM Processes app
- **C. Business Driven Configuration Questionnaire**
- D. SAP Cloud ALM Requirements app

Answer: C

Explanation:

The Business Driven Configuration Questionnaire is a tool that helps you collect the values that are entered into the configuration activities in SAP Central Business Configuration. It is a web-based questionnaire that guides you through the configuration settings for each solution process. You can use the questionnaire to enter the values for the configuration activities, review the values, and export them to an Excel file. You can then import the Excel file to SAP Central Business Configuration and apply the values to the configuration activities. References = Business Driven Configuration Questionnaire, Importing Configuration Values from Business Driven Configuration Questionnaire, Using SAP Central Business Configuration to Activate Content in the SAP S/4HANA Cloud Starter System

NEW QUESTION # 33

How does an implementation consultant support customer experts during Fit-to-Standard workshops? Note: There are 2 correct answers to this question

- A. Conduct end-user training on active scope items.
- **B. Highlight areas that require configuration or customization decisions.**
- **C. Demonstrate SAP Best Practice business processes in the starter system.**
- D. Determine set up instructions for customer-driven integrations.

Answer: B,C

Explanation:

During the Fit-to-Standard workshops, an implementation consultant supports customer experts by doing the following:

* Demonstrate SAP Best Practice business processes in the starter system. The consultant shows the customer experts how the standard processes work in SAP S/4HANA Cloud Public Edition and how they fit their business needs1.

* Highlight areas that require configuration or customization decisions. The consultant identifies and documents the gaps between the standard processes and the customer requirements, and proposes solutions that are aligned with the cloud mindset1.

The other options are not the correct ways to support customer experts during the Fit-to-Standard workshops. Determining set up instructions for customer-driven integrations is done in the integration phase, after the Fit-to-Standard workshops are completed². Conducting end-user training on active scope items is done in the deploy phase, before the go-live of the system³. References = Conducting Fit-to-Standard Workshops - SAP Learning, SAP S/4HANA Cloud Public Edition - Integration, Deploying SAP S/4HANA Cloud Public Edition.

NEW QUESTION # 34

.....

Our BraindumpsPass will provide you with the most satisfying after sales service. We provide one-year free update service to you one year after you have purchased C-S4CPB-2508 exam software., which can make you have a full understanding of the latest and complete C-S4CPB-2508 Questions so that you can be confident to pass the exam. If you are unlucky to fail C-S4CPB-2508 exam for the first time, we will give you a full refund of the cost you purchased our dump to make up your loss.
