Exam Nutanix NCP-MCI-6.10 Questions Answers | Original NCP-MCI-6.10 Questions

P.S. Free 2025 Nutanix NCP-MCI-6.10 dumps are available on Google Drive shared by Pass4sures: https://drive.google.com/open?id=1_t64QMEASmA-z3-IzzRp0BnEbjrdlY6U

No doubt the Nutanix Certified Professional - Multicloud Infrastructure (NCP-MCI v6.10) certification exam is one of the most difficult Pass4sures Nutanix certification exams in the modern Pass4sures world. This NCP-MCI-6.10 exam always gives a tough time to their candidates. It is hard to pass without in-depth NCP-MCI-6.10 exam preparation. The Pass4sures understands this challenge and offers real, valid, and top-notch NCP-MCI-6.10 Exam Dumps in three different formats. These formats are NCP-MCI-6.10 PDF dumps files, desktop practice test software, and web-based practice test software.

If you want to advance in this fast-growing technological world, Nutanix NCP-MCI-6.10 certification is a must. Yet, the common problem the aspiring candidates undergo is seeking updated, authentic, and trustworthy Nutanix NCP-MCI-6.10 Dumps for the most cherished NCP-MCI-6.10 certification exam.

Free PDF Updated NCP-MCI-6.10 - Exam Nutanix Certified Professional - Multicloud Infrastructure (NCP-MCI v6.10) Questions Answers

Our Pass4sures team always provide the best quality service in the perspective of customers. There are many reasons why we are

be trusted: 24-hour online customer service, the free experienced demo for NCP-MCI-6.10 exam materials, diversity versions, one-year free update service after purchase, and the guarantee of no help full refund. If you can successfully pass the NCP-MCI-6.10 Exam with the help of our Pass4sures, we hope you can remember our common efforts.

Nutanix NCP-MCI-6.10 Exam Syllabus Topics:

Topic	Details
Topic 1	• Conduct Custom Monitoring within a Nutanix Multicloud Environment: This section of the exam measures the skills of Cloud Analysts and Systems Engineers and covers custom monitoring for optimized performance management. Candidates must analyze performance charts, set retention policies, create custom service level agreements (SLAs), and manage storage based on policies. Creating reports involves identifying the required type, selecting generation frequency, determining retention properties, and customizing report formats for different monitoring needs. Effective monitoring ensures better resource utilization, system efficiency, and proactive issue resolution within the multi-cloud environment.
Topic 2	• Manage VMs within a Nutanix Multicloud Environment: This section of the exam measures the skills of Cloud Administrators and Virtualization Engineers and covers managing virtual machines (VMs) within a Nutanix multicloud environment. It includes creating and updating VMs by determining hardware requirements, boot modes, sizing, and configuration based on application needs. Candidates must understand how to deploy VMs using templates, snapshots, and image configurations, ensuring the correct formats for importing and exporting VMs. Migration processes require knowledge of prerequisites, storage, network settings, and software compatibility. Additionally, configuring VM categories and attributes is essential for proper organization and management within the environment, ensuring alignment with labels, storage policies, and security settings.
Topic 3	• Configure Disaster Recovery and Data Protection within a Nutanix Multicloud Environment: This section of the exam measures the skills of Disaster Recovery Specialists and Cloud Engineers and covers configuring protection policies and domains for data security and recovery. Candidates need to identify the right entities for protection, schedule backups, define retention policies, and set up replication to remote sites. Recovery plans must be configured and executed with proper scripting, network mapping, and failover strategies. Metro replication requires understanding failover methodologies, comparing solutions on different hypervisors, and preventing split-brain scenarios. Effective disaster recovery planning ensures minimal downtime and data integrity across environments.
Topic 4	• Manage Clusters within a Nutanix Multicloud Environment: This section of the exam measures the skills of Infrastructure Engineers and Systems Administrators and covers the administration of Nutanix clusters. Storage management includes creating, reading, updating, and deleting storage containers and volume groups. Configuring AOS and Prism Central settings involves authentication, SSL certificate management, IAM role-based access control, and configuring network segmentation. Network administration procedures focus on creating VLAN-backed subnets, virtual switches, and load-balancing policies while monitoring NIC usage. Lifecycle management includes performing hardware and software updates and maintaining firmware. Hardware maintenance involves adding or removing nodes and physical disks while ensuring proper upgrades and replacements. Intelligent operations require configuring capacity policies, discovering application relationships, and simulating scenarios to optimize performance.
Topic 5	• Troubleshoot a Nutanix Multicloud Environment: This section of the exam measures the skills of Technical Support Engineers and IT Operations Specialists and covers diagnosing and resolving common issues within a Nutanix multi-cloud environment. Troubleshooting protection policies and recovery plans requires identifying network mapping failures, vNIC issues, script execution problems, and connectivity failures. Metro replication troubleshooting involves addressing naming conventions, network limitations, and replication states. Security issues in AOS and Prism Central must be resolved by managing CVM communications, security warnings, and log analysis. LCM operations require diagnosing failures in inventory updates and version upgrades. Performance troubleshooting involves analyzing logs, reading performance charts, and adjusting VM configurations to meet performance needs.

Nutanix Certified Professional - Multicloud Infrastructure (NCP-MCI v6.10) Sample Questions (Q35-Q40):

NEW QUESTION # 35

If an administrator creates a report with no retention policy configured, how many instances of the report are retained by default?

- A. 0
- B. 1
- C. 2
- D. 3

Answer: D

Explanation:
By default, Nutanix Prism Central retains the last 10 instances of a report if no retention policy is configured.
Option B (10) is correct:
Nutanix stores up to 10 reports, after which older reports are automatically deleted.
Options A (5), C (15), and D (20) are incorrect:
While retention policies can be customized, the default setting is 10 reports.

NEW QUESTION # 36

An administrator notices high CPU usage on a VM and wants to determine whether adding more vCPUs would improve performance. Which two metrics should be analyzed to make this decision? (Choose two.)

- A. VM CPU Ready Time
- B. Host CPU Usage
- C. VM CPU Usage
- D. Host Memory Swap Out Rate

Answer: A,C

Explanation:
When diagnosing CPU performance issues, CPU Ready Time and CPU Usage are the key indicators of whether more vCPUs are needed.
* Option A (VM CPU Ready Time) is correct:
* High CPU Ready Time means the VM is waiting for CPU resources, indicating CPU contention.
* Option B (VM CPU Usage) is correct:
* If CPU usage is consistently high, adding more vCPUs may improve performance.
* Option C (Host CPU Usage) is incorrect:
* Host-wide CPU usage does not indicate whether a specific VM needs more vCPUs.
* Option D (Host Memory Swap Out Rate) is incorrect:
* Memory swapping affects RAM performance, not CPU allocation.

* Nutanix KB#Understanding CPU Ready Time and VM Performance

NEW QUESTION # 37

Which two actions occur by default on a node that is placed in Maintenance Mode? (Choose two.)

- A. All eligible VMs on the host are migrated to other hosts in the cluster.
- B. Non-migratable VMs are powered off and restarted on other hosts in the cluster.
- C. Non-migratable VMs are powered off.
- D. All eligible VMs on the host are powered off.

Answer: A,C

Explanation:
When a node is placed into Maintenance Mode, Nutanix follows a structured process to ensure service continuity and data integrity.
* Option B (All eligible VMs on the host are migrated to other hosts) is correct:

* Live Migration automatically moves VMs to other hosts to avoid downtime.
* This ensures workloads remain operational during maintenance.
* Option D (Non-migratable VMs are powered off) is correct:
* Some VMs, such as those using GPU pass-through or local storage dependencies, cannot be live-migrated.
* These VMs must be powered off before placing the host into Maintenance Mode.
* Option A is incorrect:
* Non-migratable VMs are not automatically restarted on other hosts-they remain powered off until manually restarted.
* Option C is incorrect:
* Eligible VMs are live-migrated, not powered off.

NEW QUESTION # 38

Which feature in Nutanix AHV provides network microsegmentation to enhance VM security?

* A. Acropolis SDN
* B. vSwitch
* C. Flow
* D. Nutanix Prism

Answer: C

NEW QUESTION # 39

Which Nutanix feature allows users to clone multiple VMs from a single template efficiently?

* A. One-Click Upgrade
* B. Fast Clone
* C. Prism Central
* D. Image Service

Answer: B

NEW QUESTION # 40

......

Today, in an era of fierce competition, how can we occupy a place in a market where talent is saturated? The answer is a certificate. What the certificate main? All kinds of the test NCP-MCI-6.10 certification, prove you through all kinds of qualification certificate, it is not hard to find, more and more people are willing to invest time and effort on the NCP-MCI-6.10 Exam Guide, because get the test NCP-MCI-6.10 certification is not an easy thing, so, a lot of people are looking for an efficient learning method. Our NCP-MCI-6.10 exam questions are the right tool for you to pass the NCP-MCI-6.10 exam.
