SAP Certified Associate - SAP S/4HANA Cloud Private Edition - Transportation Management Sample Questions (Q74-Q79):

NEW QUESTION # 74

Which of the following can you determine using conditions in change management? Note: There are 2 correct answers to this question.

- A. Carrier in the freight agreement
- B. Rate table
- C. Freight agreement
- D. Validity date of the rate table

Answer: B,C

NEW QUESTION # 75

Which of the following are features of the transportation cockpit? Note: There are 3 correct answers to this question.

- A. Distance calculation
- B. Gantt chart
- C. Command line
- D. Multiple screens
- E. Cost determination

Answer: B,C,D

Explanation:

Transportation Management Overview and Fundamentals

NEW QUESTION # 76

Which of the following can you determine using conditions in transportation charge management? Note: There are 2 correct answers to this question.

- A. Carrier in the freight agreement
- B. Rate table
- C. Freight agreement
- D. Validity date of the rate table

Answer: B,C

Explanation:

In SAP S/4HANA Transportation Management, conditions are used to determine specific objects or settings during charge calculation based on predefined rules. According to the SAP documentation:

* Freight agreement (A): Conditions can be used to select the appropriate freight agreement based on attributes like carrier, purchasing organization, or transportation lane.

* Rate table (D): Conditions can determine the specific rate table (D) to be used for charge calculation, based on criteria such as source/destination or service type.

The other options are incorrect:

* Carrier in the freight agreement (B) is determined during carrier selection, not through conditions in charge management.

* Validity date of the rate table (C) is defined in the rate table configuration and is not determined dynamically via conditions.

NEW QUESTION # 77

To which document type would you assign the event profile to calculate event-based charges in a rail transport?

- A. Freight unit
- B. Transportation unit
- C. Freight order
- **D. Freight booking**

Answer: D

NEW QUESTION # 78

Which of the following can you use to determine a stage sequence in a forwarding order? Note: There are 2 correct answers to this question.

- **A. Movement type**
- B. Stage type
- **C. Stage profile**
- D. Shipping type

Answer: A,C

Explanation:

In SAP S/4HANA Transportation Management for LSPs, the stage sequence in a forwarding order defines the transportation legs (e.g., pre-carriage, main carriage). According to the SAP documentation, the stage sequence can be determined using:

* Stage profile (A): A stage profile defines the sequence of stages for a forwarding order based on predefined rules, ensuring consistency across similar orders.

* Movement type (C): Movement types specify the type of transport (e.g., road, rail) for each stage and are used to determine the stage sequence in forwarding orders.

The other options are incorrect:

* Stage type (B) defines attributes of individual stages but does not determine the sequence.

* Shipping type (D) categorizes the overall transport mode but does not control stage sequencing.
