The CASPO-001 Exam is ideal for individuals who are involved in product development, such as product owners, product managers, business analysts, project managers, and team leads. It is also suitable for professionals who want to enhance their knowledge and skills in Agile Scrum methodologies and product development. Certified Agile Scrum Product Owner (CASPO) certification is recognized by organizations worldwide, making it a valuable addition to one's resume and a stepping stone to career advancement.

GAQM Certified Agile Scrum Product Owner (CASPO) Sample Questions (Q39-Q44):

NEW QUESTION # 39

True or False: Scrum mandates the use of burndown charts.

- A. True
- B. False

Answer: B

Explanation:

Scrum does not mandate specific tools like burndown charts; it focuses on outcomes (e.g., a "Done" Increment) rather than prescriptive practices. The Scrum Guide mentions progress tracking as optional:

"Various practices exist to forecast progress, like burn-downs, burn-ups, or cumulative flows. While proven useful, these do not replace the importance of empiricism."

* A: False-burndown charts are optional.

NEW QUESTION # 40

What two things should be done if the Product Owner is unavailable? (Choose the best two answers)

- A. There should be a Product Owner team to allow a different person from that team to instantly take over the role of Product Owner.
- B. In a permanent state of unavailability, a new Product Owner needs to be appointed. Development efforts without a Product Owner are not employing Scrum.
- C. Within the Sprint, the Developers make the best decisions possible to assure progress toward the Sprint Goal, re-aligning with the Product Owner once he/she is available again.

Answer: B,C

Explanation:

The Product Owner is a singular, critical role in Scrum: "The Product Owner is one person, not a committee." Temporary or permanent unavailability requires specific actions:

* A: During a Sprint, the Developers' self-management allows them to proceed toward the Sprint Goal, adjusting with the Product Owner later, per: "The Developers are self-managing, meaning they internally decide who does what, when, and how."

* C: Permanent absence means Scrum isn't being followed without a Product Owner, necessitating a replacement: "For Product Owners to succeed, the entire organization must respect their decisions."

NEW QUESTION # 41

Holding a Sprint 0 is the most effective way to: (Choose the best answer)

- A. Define a reference architecture
- B. Work on team development
- C. Create a complete Product Backlog
- D. There is no Sprint 0 in Scrum

Answer: D

Explanation:

"Sprint 0" is a concept from pre-Scrum practices and isn't part of the official framework. The Scrum Guide mandates that Sprints deliver value: "A Sprint is a time-box of one month or less during which a 'Done', usable, and potentially releasable product Increment is created." A preparatory "Sprint 0" for architecture, team building, or backlog creation contradicts this by not producing an Increment.

* A, B, C: These may occur outside Sprints, but not as a "Sprint 0."

NEW QUESTION # 42

Which phrase best describes a Product Owner? (Choose the best answer)

- A. Value optimizer
- B. Requirements engineer
- C. Go-between between Developers and customers
- D. Team manager

Answer: A

Explanation:

The Scrum Guide defines the Product Owner as "accountable for maximizing the value of the product resulting from the work of the Scrum Team." Option B (Value optimizer) encapsulates this core focus on value delivery. Option A (Requirements engineer) is too narrow-while they manage requirements, their role transcends engineering to strategic vision. Option C (Team manager) is incorrect-

they don't manage the team; the Scrum Master supports team self-management. Option D (Go-between) understates their authority; they actively shape the product, not just relay information. Thus, B is the best description.

NEW QUESTION # 43

What is typical work for a Product Owner in a Sprint? (Choose the best two answers)

- A. Create financial reporting upon the spent hours reported by the Developers.
- B. Attend every Daily Scrum to answer functional questions on the discussed Sprint Backlog items.
- C. Update the work plan for the Developers on a daily basis.
- **D. Work with the Developers on Product Backlog refinement.**
- **E. Collaborate with stakeholders, user communities, and product managers.**

Answer: D,E

Explanation:

The Scrum Guide outlines the Product Owner's responsibilities as maximizing value through Product Backlog management, which includes:

* C: "Developing and explicitly communicating the Product Goal" and refining the Product Backlog with Developers to ensure clarity and readiness.

NEW QUESTION # 44

.....

According to the survey from our company, the experts and professors from our company have designed and compiled the best CASPO-001 cram guide in the global market.
