UiPath-ABAv1問題集はいつ更新されますか？

説明：あなたが見ているように、最新の更新時間がページに表示されます。問題集の高命中率を保証するために、UiPath-ABAv1問題集を定期的に更新されています。更新はもとの基礎の上でいくつかの新しい問題を追加することができて、すべての内容がすべて変えるではありません。試験問題の数が増えるので、試験中に新しい問題に出会う確率が上がります。

[UiPath-ABAv1 試験を開始する\(0回\)](#)

弊社は多くの受験者たちの愛用するソフト版とオンライン版を提供しています。UiPath-ABAv1問題集のソフト版はオンライン版の内容と同じで、真実の試験の雰囲気を感じることができます。ソフト版は復習のパソコンで実行することができて、windowsのみで使用することができます。UiPath-ABAv1問題集のオンライン版はWindows/Mac/Android/iOS対応です。みんなはソフト版とオンラインでUiPath-ABAv1問題を繰り返して操作することができます。

## UiPath UiPath-ABAv1 認定試験の出題範囲：

トピック	出題範囲
トピック 1	<ul style="list-style-type: none"><li>Version Control Integration: It focuses on utilizing Git integration in Studio to add a project, clone a repository is explained, including common Git operations.</li></ul>
トピック 2	<ul style="list-style-type: none"><li>Data Manipulation: String manipulation, array operations, list initialization, dictionary usage, and DataTable operations are discussed in this topic.</li></ul>
トピック 3	<ul style="list-style-type: none"><li>Orchestrator: Understanding Orchestrator entities, tenant entities, provisioning robots, defining roles, and utilizing logging features are covered in this topic.</li></ul>
トピック 4	<ul style="list-style-type: none"><li>Studio Interface: Here, the topic covers installing Studio Community Edition, connecting to Orchestrator, and navigating the Studio interface. It also includes explanations of different Studio profiles, management of packages, use of activity project settings, and the use of options in the Studio Backstage view.</li></ul>
トピック 5	<ul style="list-style-type: none"><li>Working with Files and Folders: Creating, managing, and iterating through local files and folders are covered here.</li></ul>
トピック 6	<ul style="list-style-type: none"><li>Workflow Analyzer: This topic covers the use of Workflow Analysis, along with configuring Workflow Analyzer settings.</li></ul>
トピック 7	<ul style="list-style-type: none"><li>Implementation Methodology: Understanding project implementation stages, interpreting PDDs and SDDs, and conducting peer reviews are discussed here.</li></ul>
トピック 8	<ul style="list-style-type: none"><li>Object Repository: Creation, publication, and consumption of UI libraries with static and dynamic descriptors are covered in this section.</li></ul>
トピック 9	<ul style="list-style-type: none"><li>UI Automation: UI Automation principles, including modern and classic design experiences, are discussed alongside utilizing modern recorder and input output activities.</li></ul>

- PDF Automation: It discusses extracting data from native and scanned PDFs. Moreover, the topic focuses on different techniques for working with PDF documents.

## 実際的-完璧なUiPath-ABA1試験過去問試験-試験の準備方法UiPath-ABA1復習問題集

UiPathのUiPath-ABA1認証試験の合格証は多くのIT者になる夢を持つ方がとりたいです。でも、その試験はITの専門知識と経験が必要なので、合格するために一般的にも大量の時間とエネルギーをからなければならなくて、助簡単ではありません。Fast2testは素早く君のUiPath試験に関する知識を補充できて、君の時間とエネルギーが節約させるウェブサイトでございます。Fast2testのことに興味があったらネットで提供した部分資料をダウンロードしてください。

### UiPath Certified Professional Automation Business Analyst Professional v1.0 認定 UiPath-ABA1 試験問題 (Q47-Q52):

#### 質問 #47

When will a Transaction Item be in status Retried?

- A. The item failed with an application exception and was retried
- B. The item failed with a business exception and was retried
- C. The item was sent to a Set Transaction Status activity, which changed its status to Retried
- D. The item has been manually selected from the Transactions page and marked as Retried

正解: A

#### 解説:

In UiPath Orchestrator, a Transaction Item will be in status 'Retried' when it fails due to an application exception and the system automatically retries it. This is part of the queue's transaction handling, where items that encounter application exceptions can be set to retry based on the retry policy defined in Orchestrator1. The 'Retried' status indicates that the item has been attempted again after the initial failure.

#### 質問 #48

You are a Business Analyst tasked to analyse the feasibility of automating a process that takes as input a few hundred invoices per day. The invoices are received from a few dozen vendors. What is the best data extraction method for this process having in mind the robustness of the process?

Make all checks payable to ACME Corporation

If you have any questions concerning this invoice, contact Road Runner

THANK YOU FOR YOUR BUSINESS!

- A. Form based extractor
- B. Model-based extractor
- C. RegEx based extractor
- D. Rule-based extractor

正解: A

#### 解説:

Given that the invoices are coming from a few dozen vendors (and likely have similar formats), the Form- based extractor in UiPath Document Understanding is the best approach for this scenario. The form-based extractor is specifically designed for structured or semi-structured documents that share a consistent layout, like invoices, forms, and other documents with key-value pairs.

"Form Extractor extracts data from structured forms or documents with fixed templates by mapping the field names directly in the document." This makes the extraction process more robust and accurate because the layout is predictable, ensuring reliable data extraction.

#### 質問 # 49

What should the RPA Business Analyst do during the Build RPA phase?

- A. Validate changes and evaluate the impact
- B. Prepare test data with the SME
- C. Coordinate unit & technical testing
- D. Create test scenarios and test cases

正解: D

解説:

During the Build RPA phase, the RPA Business Analyst is responsible for creating test scenarios and test cases. This role entails working closely with stakeholders to perform in-depth process analysis for selected processes, defining business requirements, and ensuring the created documents accurately reflect the automation solution(UiPath Academy).

For a more detailed understanding of the role and responsibilities of an Automation Business Analyst, you can explore further onUiPath Academy.

#### 質問 # 50

When executing test cases during the User Acceptance Testing phase of Automation Implementation and an unexpected scenario arises that was not covered in the initial plan, what should the Business Analyst do?

- A. The Business Analyst should escalate the new scenario to the project manager or the testing manager to get a solution instead of working with the automation development team.
- B. The Business Analyst should log the new scenario as a deviation, communicate it to the automation implementation team, and together they should decide on how to handle this new situation.
- C. The Business Analyst should ignore the new scenario as it was not initially included in the UAT plan and focus on the scenarios that were agreed upon.
- D. The Business Analyst must handle this new situation independently, make necessary changes, and ensure that the automation performs as expected in this new scenario.

正解: B

解説:

During the User Acceptance Testing (UAT) phase, unforeseen scenarios are not uncommon. The Business Analyst (BA) plays a crucial role in ensuring that these scenarios are managed effectively to maintain the integrity and functionality of the automation.

\* Understand the Role of UAT:

\* UAT is designed to ensure that the developed automation aligns with the agreed-upon business requirements.  
\* It involves validating both happy path and exception scenarios. Any new scenario not documented in the UAT plan needs to be addressed systematically.

\* Why Option B is Correct:

\* Logging the scenario as a deviation ensures transparency and accountability.  
\* Collaborating with the implementation team allows the BA to leverage their technical expertise for a resolution.  
\* This approach ensures that the scenario is evaluated, documented, and potentially included in future testing cycles.

\* Why Other Options Are Incorrect:

\* Option A: Handling the situation independently disregards team collaboration, potentially leading to gaps in understanding or misaligned fixes.  
\* Option C: Escalating the issue to the project manager without involving the development team delays resolution and bypasses the experts directly responsible for the automation.

\* Option D: Ignoring the scenario undermines the purpose of UAT, risking the deployment of incomplete or non-functional automation.

\* References to UiPath Practices:

\* The PDD and UAT plans emphasize logging deviations and continuously updating documentation during UAT.  
\* Change management principles highlight the importance of documenting new requirements and involving the relevant teams. By logging and addressing deviations collaboratively, the BA ensures the automation solution is robust, efficient, and aligned with business needs.

## 質問 #51

What UiPath deployment model should a customer use if they would like a full-platform experience that is self-hosted in cloud or on-premises?

- A. Automation Platform
- B. Automation Cloud
- C. Standalone
- D. Automation Suite

正解：D

### 解説:

For customers seeking a full-platform experience that can be self-hosted either in the cloud or on-premises, the UiPath Automation Suite is the recommended deployment model. This suite provides a comprehensive set of tools and services for enterprise automation, supporting complex and scalable RPA initiatives under the organization's control.
