

# 2V0-11.25 Lead2pass, New 2V0-11.25 Test Bootcamp

100% Real Questions & Correct Answers from Lead2pass

**Vendor:** VMware

**Exam Code:** 2V0-642

**Exam Name:** VMware Certified Professional 6 - Network  
Virtualization (NSX v6.2) Exam

**Question 161—Question 170**

[Click to Download All 2V0-642 Q&As From Lead2pass](#)

**QUESTION 161**

Which Virtual Machine cannot be protected by the Distributed Firewall?

- A. A Virtual Machine connected to a vDS Portgroup running on an ESXi 5.1 host.
- B. A Virtual Machine connected to a vSS Portgroup running on an ESXi 5.5 host.
- C. A Virtual Machine connected to a vDS Portgroup running on an ESXi 5.5 host.
- D. A Virtual Machine connected to a logical switch running on an ESXi 5.1 host.

**Answer:** D

**QUESTION 162**

Which statement is correct when upgrading vShield Data Security to NSX Data Security?

- A. NSX Data Security does not support a direct upgrade.
- B. NSX Controller must be deployed before the upgrade.
- C. The vCloud Network and Security Virtual Wires must have been upgraded.
- D. vCloud Network and Security must be at least version 5.1 before starting the upgrade.

**Answer:** A

What's more, part of that PracticeTorrent 2V0-11.25 dumps now are free: [https://drive.google.com/open?id=1wsdnYc17wgHQ5kxOtuJM3RWhd9261D\\_G](https://drive.google.com/open?id=1wsdnYc17wgHQ5kxOtuJM3RWhd9261D_G)

All the PracticeTorrent VMware 2V0-11.25 practice questions are real and based on actual VMware Cloud Foundation 5.2 Administrator (2V0-11.25) exam topics. The web-based VMware Cloud Foundation 5.2 Administrator (2V0-11.25) practice test is compatible with all operating systems like Mac, IOS, Android, and Windows. Because of its browser-based VMware 2V0-11.25 Practice Exam, it requires no installation to proceed further. Similarly, Chrome, IE, Firefox, Opera, Safari, and all the major browsers support the VMware Cloud Foundation 5.2 Administrator (2V0-11.25) practice test.

In the competitive society, if you want to compete with others, you should equip yourself with strong technological skills. Recently, the proficiency of 2V0-11.25 certification has become the essential skills in job seeking. Now, 2V0-11.25 latest exam torrent will give you a chance to be a certified professional by getting VMware certification. With the study of 2V0-11.25 Study Guide torrent, you will feel more confident and get high scores in your upcoming exams.

## Fully Updated VMware 2V0-11.25 Dumps With Latest 2V0-11.25 Exam Questions [2026]

Practice tests are also a core part of the PracticeTorrent product. We recognize that retention of information is crucial, and

interactive learning tools, such as practice exams are provided to help students retain the information they have learned. These 2V0-11.25 Practice Tests simulate the actual exam conditions and provide applicants with an accurate assessment of their readiness for the test.

## VMware 2V0-11.25 Exam Syllabus Topics:

| Topic   | Details  |
|---------|--|
| Topic 1 | <ul style="list-style-type: none"> <li>Plan and Design the VMware by Broadcom Solution: There are no testable objectives in this section. Still, it is intended for solution architects who need to plan and design VMware Cloud Foundation deployments, focusing on sizing, architecture selection, and network storage design.</li> </ul>  |
| Topic 2 | <ul style="list-style-type: none"> <li>Install, Configure, Administrate the VMware by Broadcom Solution: This section of the exam measures skills of the VMware Cloud Foundation administrator and covers the installation and configuration processes for VMware Cloud Foundation components, deploying and configuring management domains, NSX Edge Clusters, and the VMware Aria Suite Lifecycle. It assesses the ability to deploy workload domains, enable vSphere IaaS control plane, create vSphere namespaces, manage stretched clusters, and use VMware Cloud Foundation APIs. Candidates are also tested on scaling deployments, performing Day 2 operations like backup, recovery, lifecycle management, VM lifecycle management, configuring networking and storage, managing ESXi hosts, implementing encryption, and operationalizing VMware NSX, vSAN, and Aria Suite. The section is comprehensive, targeting those responsible for the ongoing administration and optimization of VMware environments.</li> </ul> |
| Topic 3 | <ul style="list-style-type: none"> <li>VMware by Broadcom Solution: This section of the exam measures skills of the cloud administrator and covers identifying VMware Cloud Foundation components like vSphere, vSAN, and NSX, as well as their architecture, including stretched configurations. It also assesses knowledge of requirements for implementing private cloud solutions, use cases for VMware Aria Suite components, vSphere IaaS control plane, Data Services Manager, and VMware Cloud Foundation Add-Ons. The focus is on the ability to recognize and apply the correct VMware solutions for various enterprise scenarios.</li> </ul>  |
| Topic 4 | <ul style="list-style-type: none"> <li>IT Architectures, Technologies, Standards: There are no testable objectives in this section. However, this area establishes the foundational knowledge expected of cloud administrators, such as understanding basic IT infrastructure, virtualization, and cloud models. This section is relevant for cloud administrators and infrastructure engineers.</li> </ul>  |
| Topic 5 | <ul style="list-style-type: none"> <li>Troubleshoot and Optimize the VMware by Broadcom Solution: This section of the exam measures skills of the cloud infrastructure support engineer and covers diagnosing and resolving technical issues related to VMware Cloud Foundation deployment and operations. It includes troubleshooting the deployment process, vSphere, networking, vSAN, SDDC Manager, and Aria Suite. The section also evaluates the ability to optimize infrastructure performance, manage resources, and ensure efficient operation, focusing on the practical aspects of maintaining and enhancing VMware Cloud Foundation environments.</li> </ul>   |

## VMware Cloud Foundation 5.2 Administrator Sample Questions (Q18-Q23):

### NEW QUESTION # 18

An organization is implementing a downtime avoidance solution and wants to ensure continuous availability of applications across separate sites that are connected via a high bandwidth/low latency link.

Which two VMware Cloud Foundation components support this capability with stretched clusters? (Choose two.)

- A. vSphere Replication
- B. vSphere
- C. vSAN
- D. vVOL
- E. NSX Firewall

**Answer: B,C**

Explanation:

vSAN: vSAN supports stretched clusters, allowing data to be mirrored across multiple sites to ensure continuous availability and enable high availability for virtual machines in case of a site failure.

vSphere: vSphere also supports stretched clusters, enabling the high availability of applications across multiple sites by allowing virtual machines to be run on either site in the event of a failure.

#### NEW QUESTION # 19

An administrator has a requirement to share the contents of a Content Library across multiple vCenter instances. What steps should the administrator perform to meet this requirement?

- A. Create a Subscribed content library on a single vCenter instance and perform a synchronization
- B. Create a Local content library on each vCenter instance and perform a synchronization
- C. Create a Local content library on a single vCenter instance and enable publishing
- D. Create a Subscribed content library on each vCenter instance and enable publishing

**Answer: C**

Explanation:

To share the contents of a Content Library across multiple vCenter instances, you need to create a Local content library on one vCenter instance and enable publishing. This allows the library to be accessible by other vCenter instances, where they can subscribe to it, ensuring the content is shared.

#### NEW QUESTION # 20

Which vSphere component is essential for providing persistent storage to Kubernetes workloads deployed on IaaS Control Plane?

- A. Container Image Virtual Disks
- B. Control Plane Storage Policy
- C. Pod Service
- D vSAN

**Answer: C**

Explanation:

The vSphere Pod Service is essential for providing persistent storage to Kubernetes workloads deployed on IaaS Control Plane (formerly vSphere with Tanzu). It enables the integration of Kubernetes with vSphere, allowing the creation of persistent volumes and the management of storage resources for Kubernetes workloads, ensuring that they can utilize vSphere's storage capabilities like vSAN.

#### NEW QUESTION # 21

A Cloud Administrator has been tasked with verifying all of the prerequisites are in place prior to deploying VMware Aria Suite Lifecycle. The following information has been provided for the Aria Suite Lifecycle implementation:

hostname: lcm

domain: vcf.company.com

IP address: 10.0.0.150/24

IP gateway: 10.0.0.1

Which two items must the Cloud Administrator ensure are available prior to deploying VMware Aria Suite Lifecycle? (Choose two.)

- A. A DNS PTR Record for 10.0.0.1 that points to lcm.vcf.company.com
- B. A DNS A Record for lcm.vcf.company.com that points to 10.0.0.150
- C. A CA-signed SSL certificate for Aria Suite Lifecycle added to SDDC Manager
- D. An Application Virtual Network is configured in SDDC Manager
- E. An allocated IP address for the NSX standalone Tier-1 Gateway

**Answer: B,E**

Explanation:

A DNS A record is necessary to resolve the hostname (lcm.vcf.company.com) to the specified IP address (10.0.0.150) so that it can be correctly accessed during the deployment.

A DNS PTR record is required for reverse DNS lookup, which ensures proper identification of the IP address (10.0.0.1) to the

hostname (lcm.vcf.company.com), which is important for network validation during the deployment process.

### NEW QUESTION # 22

An administrator is unable to log in to the SDDC Manager UI on their local workstation. After entering the correct URL, the login page does not load and the administrator is unable to enter their credentials in order to view the SDDC Manager inventory. They confirm that the SDDC Manager appliance responds to a ping command from their local workstation against both its FQDN and IP address.

After checking the VM console of the SDDC Manager appliance in the management vCenter UI, they determine that the operating system is online and they can log in to it with the relevant administrator level accounts.

What two actions could the administrator take whilst logged in to the SDDC Manager VM via the VM console to help identify the root cause of the UI not loading? (Choose two.)

- A. Perform a restart of the services using the command `systemctl restart`.
- B. Verify the health of the SDDC Manager services using the command `sos --get-vcf-services-summary`.
- C. Verify that there is free disk space remaining using the command `df -h`.
- D. Perform a restart of the network adapter using the command `systemctl restart`.
- E. Verify that port 80 is open and listening for connections using the command `netstat`.

**Answer: B,C**

Explanation:

Comprehensive and Detailed Explanation From Exact Extract:

According to the VMware Cloud Foundation 5.2 Administration Guide and troubleshooting documentation, when the SDDC Manager UI does not load even though the appliance is reachable and online, administrators should check both the health of services and the system resources. Here's the detailed reasoning and exact documentation extracts:

Option C: Verify the health of the SDDC Manager services using the command `sos --get-vcf-services-summary`.

Official documentation states:

"You can check the status of SDDC Manager services by running the `sos` command on the SDDC Manager VM. This command provides a summary of all SDDC Manager services and their current state. If any service is stopped or unhealthy, this may prevent the UI from loading." Reference:

Option E: Verify that there is free disk space remaining using the command `df -h`.

Official documentation specifies:

"If the SDDC Manager appliance runs out of disk space, the UI and related services may become unresponsive. Use the `df -h` command to check for available disk space on the appliance." Why Not the Other Options?

Option A: Port 80 is not used for the SDDC Manager UI; the UI listens on port 443 (HTTPS).

Option B and D: Restarting the network adapter or services without first identifying the root cause is not a recommended troubleshooting step according to the official documentation.

Summary:

The administrator should check the SDDC Manager services health (C) and ensure there is free disk space (E) on the appliance, as recommended by the VMware official documentation for troubleshooting UI access issues in VMware Cloud Foundation 5.2.

### NEW QUESTION # 23

.....

The PracticeTorrent is committed to ace the 2V0-11.25 exam preparation and success journey successfully in a short time period. To achieve this objective the PracticeTorrent is offering VMware Cloud Foundation 5.2 Administrator (2V0-11.25) practice test questions with high-in-demand features. The main objective of PracticeTorrent VMware 2V0-11.25 Practice Test questions features to assist the 2V0-11.25 exam candidates with quick and complete VMware 2V0-11.25 exam preparation.
