SAP S/4HANA Cloud Private Edition - Production Planning and Manufacturing Sample Questions (Q36-Q41):

NEW QUESTION # 36
Which actions does the system perform by default when you save a confirmation for a finished product in repetitive manufacturing?
Note: There are 3 correct answers to this question.

- A. Post production costs to the planned order.
- B. Reduce run schedule quantities.
- C. Update statistics for the Business Information Warehouse.
- D. Post the goods receipt for the finished product.
- E. Create associated capacity requirements.

Answer: A,B,E

NEW QUESTION # 37
You have a scheduling agreement with a vendor. You want classic MRP to automatically create schedule lines in case of material shortage. What must you do?
Note: There are 2 correct answers to this question.

- A. Add the agreement to the source list mark it for MRP relevance.
- B. Add the agreement to the quota arrangement mark it for MRP relevance.
- C. Set the creation indicator for purchase requisitions on the initial screen of the MRP run.
- D. Set the creation indicator for delivery schedule lines on the initial screen of the MRP run.

Answer: A,D

NEW QUESTION # 38
Which standard item categories can you select inside a bill of material (BOM)? Note: There are 2 correct answers to this question.

- A. WBS item
- B. Variable-size item
- C. Preliminary item
- D. Work item

Answer: B,C

Explanation:
In SAP S/4HANA, the item category in a BOM (transaction CS01/CS02, field: Item Category) classifies components and determines their handling in production and procurement. Standard item categories include:
* Variable-size item(A): Item category "R" (Variable-Size Item) is used for components with dimensions (e.g., sheets, pipes) where quantity is calculated based on size data (entered in the Variable-Size Item Data tab). It's common in manufacturing for materials cut or sized during production.
* Preliminary item(C): Item category "V" (Preliminary Item) is a placeholder for components not yet fully specified (e.g., during design phase). It allows BOM creation to proceed, with details added later, and is valid for planning purposes.
Work item(B) is not a standard BOM item category-"L" (Stock Item) or "N" (Non-Stock Item) might apply to work-related components, but "Work Item" isn't a defined term.WBS item(D) (Work Breakdown Structure, category "W") relates to Project Systems (PS) BOMs, not standard production BOMs in PP, requiring PS integration. This is per SAP's BOM item category definitions.

NEW QUESTION # 39
Which options do you have to plan both quantities and capacities during line loading in repetitive manufacturing? Note: There are 2 correct answers to this question.

- A. Run MRP with automatic selection of production version.
- B. Run PP/DS heuristics for repetitive manufacturing.
- C. Assign planned orders manually in the planning table.
- D. Run MRP with quota arrangement.

Answer: B,D

Explanation:
In SAP S/4HANA repetitive manufacturing, line loading involves planning production quantities and capacities across production lines. Options include:
* Run MRP with quota arrangement(B): MRP (MD01/MD02) with a quota arrangement (MEQ1, marked MRP-relevant) distributes production quantities across multiple production lines (production versions) based on predefined quotas (e.g., 60% Line A, 40% Line B). This plans quantities and implicitly considers capacity via the linked work centers, visible in MF50.
* Run PP/DS heuristics for repetitive manufacturing(D): PP/DS heuristics (e.g., SAP_PP_002 in /SAPAPO/CDPSB0) plan both quantities (e.g., creating planned orders) and capacities (e.g., finite scheduling on production lines) for REM scenarios. This integrates detailed scheduling with line loading, optimizing resource use.
Assign planned orders manually in the planning table(A) (MF50) adjusts existing quantities but doesn't inherently plan capacities-it's a manual tweak. Run MRP with automatic selection of production version(C) selects one version (e.g., via alphanumeric order), planning quantities but not dynamically balancing capacities across lines. This is per SAP's REM planning options.

NEW QUESTION # 40
What are the advantages of collective orders? Note: There are 2 correct answers to this question.

- A. To post confirmations for the entire collective order
- B. To perform availability checks across the entire collective order
- C. To show the flow of batches across the entire collective order
- D. To coordinate orders in the planning board for a collective order

Answer: A,B
